(57) Abstract :

Costs, reimbursements, legal changes, and cultural requirements have long been obstacles in the way of healthcare transformation. The epidemic altered everything. But that doesn't mean the sector wasn't already undergoing a digital makeover. Paper-based systems had already been steadily replaced by electronic health records (EHR), and telehealth solutions were slowly gaining popularity as an additional means of providing patients with ease, portability, and quick access. However, the pandemic hastened mainstream acceptance and altered the debate about how patient care will be provided in the future.
