- (b) perform internal risk assessments and
- (c) support the maintenance of quality and professional standards in the conduct and delivery of services (e.g., quality reviews of the services delivered, to identify and mitigate any KPMG quality, conduct or related risk management issues, facilitate requests by regulators, or the establishment and maintenance of knowledge databases).

We are still responsible for ensuring confidentiality if Confidential Information is shared with or accessed by such parties.

7.4 We may use information we obtain in performing the Services, anonymised and/or aggregated, so that no Personal Data or commercially sensitive information is disclosed, for development of expertise and know-how, benchmarking, analytics, quality assurance and other purposes related to our business.

7.5 Except as required by law or as set forth in this paragraph, neither Party shall acquire any right hereunder to use the name or logo of the other Party or any part thereof, without the express written consent of the other Party. You agree that we may refer to you in our internal and external communication, indicating the general services rendered. Further, for purposes of the Services, you hereby grant to us a limited, revocable, non-exclusive, non-transferable, paid up and royalty-free license, without right of sublicense, to use your logo solely for presentations or reports to you or for internal presentations and intranet sites.

7.6 Where you are a listed entity in India or shall disclose to us any information related to a listed entity in India, the provisions of this clause shall apply. You shall comply with the provisions of the SEBI (Prohibition of Insider Trading) Regulations, 2015, including amendments thereof, ("Regulations") and the restrictions imposed thereby. ## 8. Our Charges

8.1 We shall invoice you as per the Engagement Letter for the Charges which shall be payable on presentation of our invoice (or at such other time as may be specified in the Engagement Letter) without set-off.

8.2 Upon termination of the Agreement, we shall be entitled to payment of our Charges for Services performed up to the date of termination. In this event, our Charges will be calculated at our agreed hourly rates (or if none are agreed then our relevant standard rates) at the time the Services were performed.

8.3 Where there is more than one addressee of the Engagement Letter, unless the Engagement Letter provides otherwise, each of you shall be jointly and severally liable to pay our Charges.

8.4 If we are required by law, or a regulatory or parliamentary body in any proceedings, forum, or investigation (in which we are not a party or participant but you are) to provide information or produce documents relating to the Services, you shall pay our fees incurred in satisfying such requirements based on our standard rates at that time and any costs; expenses and applicable taxes.

## 9. Managing conflicts of interest

9.1 KPMG Persons may be delivering services to, or approached to deliver services to, or act for another party or parties during and after this engagement with interests that conflict with or are adverse to yours (a "Conflicting Party" or "Conflicting Parties").

9.2 KPMG Persons are free to deliver services to Conflicting Parties, but where the interests of any Conflicting Party directly conflict with yours in relation to the subject matter of the Services then the Engagement Team shall not deliver services to the Conflicting Party and Other KPMG Persons may only deliver services to the Conflicting Party where appropriate Barriers are in place. Where this process is followed and such Barriers are in place, you agree that this will be sufficient to manage such conflict.

9.3 "Barriers" means reasonable safeguards to facilitate the protection of our clients' interests, through information handling procedures and deployment of professionals.

## 10. Third parties and their rights

10.1 KPMG Persons (other than the KPMG contracting Party) may exercise rights given to them in this Agreement.

10.2 The Parties may end or vary this Agreement without anyone else's consent, including any Other Beneficiaries.

10.3 You agree to and accept the provisions of the Agreement on your own behalf and as agent for Other Beneficiaries. Other Beneficiaries (if any) acquire rights and become subject to obligations under this Agreement as if they had each signed a copy of the Engagement Letter and agreed to be bound by it.

10.4 Except as provided herein, the Agreement shall not create or give rise to, nor shall it be intended to create or give rise to, any third party rights. No third party shall have any right to enforce or rely on any provision of the Agreement which does or may confer any right or benefit on any third party, directly or indirectly, expressly or impliedly.

## 11. Circumstances beyond your or our control

11.1 No Party shall be in breach of its obligations under this Agreement or incur liability to the other Party if that Party is unable to comply with this Agreement due to any cause beyond their reasonable control.

11.2 If such an event occurs, the affected Party shall, as soon as reasonably practical, notify the other Party, who may suspend or terminate this Agreement by giving seven days' notice, taking effect if the affected Party has not recommenced the performance of its obligations in that period.

## 12. Waiver, assignment and sub-contractors

12.1 Failure by a Party to exercise or enforce any rights under this Agreement is not a waiver of such rights.

12.2 No Party may assign the benefit of this Agreement.

12.3 We may appoint sub-contractors to assist in delivering the Services, but we remain responsible for performing the Services and we shall procure that they treat your Confidential Information under confidentiality obligations equivalent to those in this Agreement. Where any sub-contractor is not a KPMG Person we will notify you first.

### 13. Limitations on our liability

13.1 Our liability and that of any KPMG Person, in aggregate, to you and to Other Beneficiaries for direct losses or damages under this Agreement and for all claims connected to it, in contract, tort (including negligence), statutory liability or otherwise, shall be limited to the fees paid to us for the Services in last twelve (12) months preceding the claim. Nothing in this Agreement limits our liability for direct losses or damages arising from our fraud or deliberate breach of duty or any other liability which cannot be limited by law.

13.2 In no event shall we (including KPMG Persons) be liable for loss of profits, goodwill, anticipated savings or wasted time and for indirect, special, incidental, exemplary, punitive or consequential loss, claims, costs, expenses or damages.

13.3 Where there is more than one beneficiary of the Services (a "Beneficiary") the limitation on our liability in clause 13.1 shall be apportioned by the Beneficiaries amongst them. No Beneficiary shall dispute or challenge the validity or operation of clause 13.1 on the grounds that no apportionment has been agreed or that the share of the limitation amount apportioned to any Beneficiary is unreasonably low. In this clause, "Beneficiary" includes you and Other Beneficiaries.

13.4 Neither you nor any Other Beneficiaries shall bring any claim against any KPMG Person except KPMG in respect of loss or damage suffered by you arising out of or in connection with this Agreement or the Services. This clause is enforceable by any KPMG Person.

13.5 Any claim from you or Other Beneficiaries in respect of loss or damage suffered as a result of, arising from or in connection with the Agreement must be made within three years from the date of cause of action arising. It is agreed between the Parties that the cause of action shall be deemed to arise on the date on which the activity giving rise to the claim was performed. For the purposes of this clause, a claim shall be made when court or other dispute resolution proceedings are commenced.

### 14. Third Party Claims

14.1 You shall indemnify and hold us harmless from time to time and at all times hereafter, from and against all losses, damages, costs, charges and expenses, harm or injury suffered or incurred by us or any of us arising out of any third party notices, claims, demands, action, suits or proceedings given, made or initiated against us on account of or in relation to (a) the performance, by us or any of us, of all or any of our obligations hereunder (provided that the indemnity under (a) shall not, however, be applicable to the extent that any such notices, claims, demands,

actions, suits or proceedings are found by a competent court in its final judgement to have resulted primarily from our wilful default in performing the Services described in the Engagement Letter) or (b) use, copy, duplication or distribution of the Deliverable or Program (or any part thereof) in a manner because of which there is any claim made or threatened against us (c) any default committed by you in the performance of all or any of your obligations hereunder, including breach of our IPRs or (d) providing a copy of our Deliverable to a third party as agreed by us under the Engagement Letter or in writing otherwise.

14.2 If any payment is made by you under this clause you shall not seek recovery of that payment from us at any time.

14.3 In this clause "us" shall include KPMG Persons and "you" shall include Other Beneficiaries.

### 15. Termination and Survival

15.1 Either you or we can terminate this Agreement by giving at least 30 days' prior notice to the other Party at any time. Except where termination is on account of clause 15.2 below, it is agreed between the Parties that (i) the Program shall be completed for all participants who have not finished the Program as on the date of the termination notice by a Party; and (ii) there will not be any new intake of participants for the Program from the date of termination notice by a Party.

15.2 We may terminate this Agreement immediately if: (i) there is a change of law, rule, regulation or professional standard, or circumstances arise that we reasonably believe would cause the relationship between the Parties to violate such law, rule, regulation or professional standard or would prejudice any KPMG Person's ability to comply with applicable independence requirements; or (ii) we believe a conflict of interest cannot be managed, but in that case we shall consult you before we do so.

### **ABSTRACT:**

The seaweed is a large and diverse group of marine macro algae that can be found in intertidal and sub tidal coastal regions around the world. Seaweeds are simpler in their structural composition because they take up the nutrients into their blades or fronds directly from the seawater, unlike more complex land plants which take up the nutrients through their roots. There are three different types of marine macro algae—red algae (Rhodophyta), brown algae (phaeophyta), green algae (chlorophyta). They are grouped according to their unique photosynthetic pigments, which give them their characteristic color and unique properties. Secondary metabolites from natural resources are a potential source that leads and drugs can be exploited to combat antimicrobial resistance in microorganisms. The present study investigated to explore the preliminary phytochemical constituents of marine red and brown seaweed such as *Gracilaria corticata*, *Gracilaria edulis*, *Sargassum wightii* where Methanol, Acetone and Aqueous were used as a solvent system for the preparation of the extract.

**KEYWORDS:** Seaweeds, *Gracilaria corticata*, *Gracilaria edulis*, *Sargassum wightii*, Phytochemical, solvents.

### **INTRODUCTION:**

Seaweeds constitute a vital and important part of the marine ecosystem. It was estimated that about 90% are algae, and over 50% of global photosynthesis were contributed from algae<sup>1</sup>. Seaweed has no formal definition. Seaweed may belong to one of several groups of multicellular algae such as the red algae, green algae and brown algae, but these three groups do not have a common multicellular ancestor. Seaweeds are commonly grown close to the littoral zone. The genera of *Sargassum wightii* and *Gracilaria* are free floating and occupy a wide range of ecological niches and also used widely in the field of medicine<sup>2</sup>.

Over the past decades seaweeds had been consumed by humans as a medicine, food and their extracts have generated enormous amount of interest in the pharmaceutical industry as fresh source of bioactive compounds with lots of massive medicinal potential<sup>3</sup>. Marine seaweed was used as the potent source of human health because of its active constituents which is responsible for its various pharmacological activities. Being a unique plant structure and its biochemical composition, it could be exploited for its multi-functional properties in the form of food and medicine<sup>4</sup>. The seaweeds offer more curative properties both externally and internally by intake of raw and dried seaweeds which may give more healthy benefits. Seaweeds are toxin free and also provide hundreds of organic compounds<sup>5</sup>.

Among the coastal region of Tamilnadu, South India supports a rich vegetation of marine algae. Among macro algae brown and red algae were growing abundantly in the shores of Kanyakumari and Ramanathapuram districts of Tamilnadu state, India.

### ABSTRACT

**Objective:** The present study was to evaluate the biological activity of Red algae, *Gracilaria corticata*, collected from the southeast coast of Mandapam, Ramanathapuram, Tamil Nadu. Seaweeds are rich in bioactive compounds. Seaweeds are highly diverse group of organism from secondary metabolites of the natural source are a potential source. The marine seaweed is the interesting group of their broad spectrum of biological activities such as antibacterial, antioxidant, and anticancer.

**Methods:** The antibacterial activity of *G. corticata* was tested against *Staphylococcus aureus* and *Escherichia coli* by disk diffusion method. *In vitro* antioxidant activity was determined by 1,1-diphenyl-2-picrylhydrazyl (DPPH) radical scavenging assay. 3-(4,5-dimethylthiazol-2-yl)-2,5-diphenyltetrazolium bromide assay was employed to study the anticancer activity against (MDA-MB 231) human breast cancer cell line.

**Results:** The DPPH assay screening of methanolic extract of *G. corticata* showed specific activity of inhibition. In antibacterial shows the growth of two virulent strains of pathogenic bacteria, *E. coli* and *Bacillus subtilis*. In anticancer activity obtained results indicated that the methanol extracts of *G. corticata* were cytotoxic against (MDA-MB231) human breast cancer cell.

**Conclusion:** These results show that *G. corticata* has a great biological potential, which could be considered for future uses in pharmaceutical, food, and cosmetics purpose.

**Keywords:** Seaweeds, *Gracilaria corticata*, Antibacterial, Antioxidant, Anticancer.

### INTRODUCTION

In recent years, natural products have been playing a major role in search of novel drugs against many infectious diseases, inflammation, cancer, and many other complex illnesses. They are considered as treasure for researchers due to their enormous structural diversity and complexity. The marine algae or seaweed represents a largely untapped source for the isolation of novel bioactive compounds [1].

Seaweeds are the primitive angiosperm that has incomparable mineral source, particularly marine red and brown algae. They are used as commercial products; stabilizers, thickeners, emulsifiers, foods, etc. In recent years, phycologists focus the bioactive substances of marine plants because of the presence of macro and trace elements and their cell wall composition. Seaweeds or marine algae are classified into three main categories: Brown algae (Phaeophyta), green algae (Chlorophyta), and red algae (Rhodophyta) [2]. Thus, macroalgae have been recognized as a promising ultimate source of bioactive secondary metabolites with antitumor [3], antibacterial, antioxidant, anti-inflammatory, anticancer, anticholesterolemic activity, antidiabetic activity, and hepatoprotective activity [4]. Several red algae contain agar as a water-soluble sulfated galactan located in the intercellular spaces. Agar is a mixture of polysaccharide, which can be composed of agarose and agarpectin with similar structural and functional properties as carrageenan of red algae [5]. Thus, the study was to assess antibacterial, antioxidative, and anticancer potentialities of *G. corticata* settled along the Mandapam coast of Tamil Nadu.

### METHODS

#### Collection of sample

The sample *G. corticata* (Red algae) was collected from intertidal zone of Mandapam coast (Lat. 9°17'N; Lon. 79°19'E) of Gulf of Mannar,

southeast coast of Tamil Nadu, India. The collected sample was cleaned with seawater to remove the epiphytes and sand particle, and the sample has been packed in polythene bag and brought to laboratory. Then, the sample was washed with freshwater and shade dried. The shade dried sample is stored.

#### Sample identification

The seaweeds were identified and authenticated by Dr. Ganesan, Senior Scientist, Central Salt and Marine Research Institute, Mandapam Camp, Ramanathapuram, Tamil Nadu, India (Fig. 1).

#### Preparation of extract

##### Methanol extraction

The acetone extract of *G. corticata* was extracted using 50 g of the power sample with 150 ml of acetone. The mixture was placed in the orbital shaker for 24 h at 32°C in room temperature. After squeezing, the solvent was taken out and extraction liquid was filtered using Whatman filter paper. The extracted sample was condensed using Soxhlet extractor at 50°C.

##### Aqueous extraction

The aqueous extract of seaweed *G. corticata* was dried. After drying, 3 g of seaweed is measured and pulverize it gently. Then, add 50 ml of distilled water to the added seaweed in the conical flask. The solution was filtered using Whatman filter paper and the filtered solution was condensed using Soxhlet extractor. The solution was stored in a refrigerator for further use as crude extract of aqueous.

##### Antibacterial activity

The *G. corticata* tested against various Gram-positive and Gram-negative strains using agar disc diffusion technique with *Escherichia coli* and *Bacillus subtilis* both bacterial culture were smeared in the agar disc
