Provision for enquiry and information: Human assistance, reader, scribe, soft copies of reading material, screen reading

VISTAS providing provisions for enquiry and information with human assistance is crucial for ensuring that persons with disabilities have equitable access to the resources and support they need. VISTAS can create a more inclusive and supportive environment that enables students with disabilities to fully engage in academic pursuits and achieve their educational goals. VISTAS creating a disability-friendly help desk provision involves ensuring that the help desk is accessible and equipped to assist individuals with disabilities effectively.

VISTAS Creating a lecture facility that accommodates the needs of disabled individuals involves implementing several strategies to ensure effective communication and equal access to educational content.

For individuals with blindness or severe visual impairments, accessing teaching videos at university computer systems typically involves the use of assistive technologies and accessible formats. VISTAS Providing audio descriptions for teaching videos allows blind / deaf students to access visual information that is not conveyed through dialogue or sound effects with English subtitle.

By implementing these strategies, colleges can create lecture facilities that are accessible to deaf students, promoting equal participation and academic success for all students regardless of their hearing abilities.
