

## DREAM TEAM DIAGNOSTIC TEST FOR PRE-FINAL YEAR COMPUTING STUDENTS

A Dream Team Diagnostic Test was conducted on **9th April 2025** for **pre-final year Computing students** as part of their placement preparedness program. Based on an initial scrutiny of overall academic performance, **163 students** were shortlisted to take part in the test, and **all selected students actively participated**.

The diagnostic assessment aimed to evaluate students' technical aptitude, logical reasoning, and problem-solving skills. The results will be utilized to design targeted training modules, helping students strengthen their competencies and align with industry expectations. This initiative highlights the university's strategic approach to nurturing placement-ready graduates.
