## NSS DAY CELEBRATION

**Date of the Event: 24-09-2021**

**Name of the Event: Celebrations on NSS Day**

**Venue: VISTAS, Pallavaram**

The Unit of National Service Scheme (NSS), VISTAS celebrated NSS Day on 24th September 2021. The National Service Scheme (NSS) is a public service program conducted by the Ministry of Youth Affairs and Sports. Every year, NSS day is observed on September 24th across India. The National Service Scheme was launched in 1969 on the account of Birth centenary year of Mahatma Gandhi. In the year 1952, the government emphasized the requirement of social and labour service by Indian students for a year.

**Dr. P. Jagadeesan, NSS Coordinator** organized the “**Tree Saplings Plantation Programme**” and **Special talk on Drug Abuse** which was given by **Pallavaram Assistant Commissioner** on the account of 75<sup>th</sup> Year of Independence and NSS Day Celebrations in our campus. The institution is deeply concerned about the growing drug menace. NSS volunteers have to take up a pioneering role in creating an atmosphere where drug abusers will have no place in society. And the NSS team along with Programme officers planted 75 saplings in around our campus. 75 NSS Student Volunteers assisted and involved actively for successful conduction of programme. As the whole world is facing the problem of global warming and another environmental-related issue so as to recover from such a problem planting the trees is become inevitable one of the most important aspects today. The idea behind the tree plantation activity was to propagate the message to all student community that planting the trees helps to maintain clear eco-friendly environment reduces pollution and improves the green ambience.

**Work: "World Water Day"**

**Date: 22 March, 2022**

The Units of National Service Scheme, VISTAS celebrated **World Water Day** every year on **March 22**. The day is intended to promote the responsible management of freshwater resources. 70% of the Earth's surface is covered in water but still, there are many places that have a scarcity of water. Only a tiny percentage of earth's water is fresh, which we need for growing food, drinking, and more. The current scenario, the population and consumption of water are growing day by day, which also impacts the climate. Climate change directly puts a lot of pressure on the water. In the recent World Economic Forum, the crisis related to water is one of the top reasons hindering global economic growth. 650 million people don't have access to fresh drinking water because the water, which is accessible to them, is not safe to drink. The theme for this year's **World Water Day is Groundwater, making the invisible visible**". Groundwater is one of the most important resources of water, which provides the world with more than half of drinking water. Protecting, exploring, and finding sustainable ways of using groundwater will be the main objectives of **World Water Day this year**.

With the global day's groundwater theme, the **event focused on digital tools and how technology can help manage both groundwater and surface water**.
