

PHARMACY PRACTICE CLUB ACTIVITIES

RARE DISEASE DAY 2022

Rare Disease Day is an observance held on the last day of February to raise awareness for rare diseases and improve access to treatment and medical representation for individuals with rare diseases and their families.

The pharmacy practice club organized a Programme on the rare disease day and the students staged a series of events. A roleplay was done by the students of second year (current third year) on leukoencephalopathy with Brain stem and Spinal core involvement and Lactate elevation. The play shed light on the misunderstanding of the condition and the problems faced by the patient's family

Quiz was conducted to evaluate the knowledge of the students in rare diseases. Myths revolving around rare diseases were also discussed and the actual facts were also mentioned.
