Minutes of 11th BOS Meeting

Venue

Computer Networks Lab, MGR Block

Date & Time

18.03.2022 & 11.00 am

MINUTES OF BOARD OF STUDIES

The meeting of the Board of Studies in Computer Science and Engineering (M.E- CSE, B.E – CSE, B. Tech – IT, B.Tech – Computer Science and Engineering Specialization with Artificial Intelligence and Machine Learning and B.Tech - Computer Science and Engineering Specialization with Data Science) of Department of Computer Science and Engineering, VISTAS was held on 18.03.2022 at 02:00p.m in Data Structures Lab, Engineering Block to discuss the inclusion of Elective course of PG Program Curriculum & Syllabus of M.E. Computer Science and Engineering and framing of new curriculum structure for the following for UG Programmes

- B.E- CSE - Regulation 2022
- B.Tech - IT - Regulation 2022
- M.E CSE -Regulation 2022
- B.Tech - CSE Specialization with AI & ML - Regulation 2021
- B.Tech - CSE Specialization with AI & DS - Regulation 2021

The following members were present for the BoS meeting

S. No	Name of the Board Member	Designation	Institute/Industry	Role
INTERNAL MEMBERS				
1	Dr. R. Anandan	Professor & Head Department of Computer Science and Engineering	Vels Institute of Science, Technology & Advanced Studies (VISTAS)	Chairman
2	Dr. S. Arun	Director, IQAC	Vels Institute of Science, Technology & Advanced Studies (VISTAS)	Internal Member
3	Dr. R. A. Karthika	Associate Professor Department of Computer Science and Engineering	Vels Institute of Science, Technology & Advanced Studies (VISTAS)	Internal Member
4	Dr. A. Rajesh	Associate Professor Department of Computer Science and Engineering	Vels Institute of Science, Technology & Advanced Studies (VISTAS)	Internal Member
5	Mrs. K. Kalaivani	Assistant Professor Department of Computer Science and Engineering	Vels Institute of Science, Technology & Advanced Studies (VISTAS)	Internal Member
EXTERNAL EXPERT MEMBERS				
1	Dr. Asnath Vicky Phamila Y	Associate Professor	School of Computer Science and Engineering Vellore Institute of Technology - VIT Chennai	Academic Expert
2	Mr. Santhosh Gopynadhan	Senior Director	Optum Global Solutions (India) Private Limited, Chennai	Industrial Expert
3	Mr. Pavan Srivatsav	Project Associate	Cognizant Technology Solutions, Chennai	Alumni

AGENDA OF THE MEETING

Item No.	Particulars
BoS / 2022 / CSE / UG / 11.1	Review and confirm minutes of the 10th BOS meeting held on 07.06.2021
BoS / 2022 / CSE / UG / 11.2	Review the curriculum based on Choice Based Credit System (CBCS) and Outcome Based Education (OBE).
BoS / 2022 / CSE / UG / 11.3	To review the revision for new syllabus for B.E Computer Science and Engineering from Regulation 2018 to Regulation 2022
BoS / 2022 / CSE / UG / 11.4	To review the revision for new syllabus for B.TECH Information Technology from Regulation 2018 to Regulation 2022
BoS / 2022 / CSE / UG / 11.5	To review the Feedback from Stakeholders to ensure that the syllabus of the courses includes skill development, employability, and entrepreneurship
BoS / 2022 / CSE / UG / 11.6	To review the UGC policy for CBCS and OBE curriculum.

MINUTES OF THE MEETING

Dr.R.Anandan, Professor and Head Department of Computer Science and Engineering, Chairman, BoS initiated the meeting with a warm welcome and introduced the external members, the internal and co-opted members, and thanked them for accepting the invitation to the 11th BoS meeting.

Item No: 1 BoS / 2022 / CSE / UG & PG / 11.1

Review and confirm minutes of the 10th BOS meeting held on 07.06.2021

The Tenth BoS Meeting for B.E. CSE, B.TECH IT and M.E CSE under regulation 2018 was held on 07-06-2021 and confirmed the following points:

- To implement the guidelines and suggestions of the new education policy
- To deliberate present trend in the Information Technology sector and industry relevant interdisciplinary courses.
- To eliminate the obsolete syllabus contents and introducing the latest / updated technologies, new knowledge and practices.
- To design the curriculum focusing on skill development, Employability and Entrepreneurship
- To introduce 2 new programs in Department of Computer Science and Engineering B.Tech. CSE (Artificial Intelligence and Machine Learning) and B.Tech. CSE (Data Science).

Item No: 2 BoS / 2022/CSE / UG & PG / 11.2

Review the curriculum based on Choice Based Credit System (CBCS) and Learning Outcome Based Education (OBE).

- To develop the curriculum and syllabi based on the guidelines of Choice Based Credit System (CBCS) and Outcome Based Education (OBE) shown in annexures.

Item No: 3 BoS / 2022/CSE / UG & PG / 11.3

To review Revision for new syllabus for B.E Computer Science and Engineering from regulation 2018 to Regulation 2022

- To develop the curriculum based on Outcome-based Education (OBE).
- To consider the present trend in the respective fields.
- To implement the guidelines and suggestions of the new education policy while preparing the curriculum.
- To eliminate the obsolete syllabus contents and to introduce the latest / updated technologies, new knowledge and practices.
- To design the curriculum focusing on Skill Development, Employability and Entrepreneurship.

% of Syllabus Revision in the Program:

B.E Computer Science and Engineering : 25 %

. No.	Available Course		Revised Course		% of Syllabus Revised
	Code	Name	Code	Name	
1	18CGMA11	Mathematics –I	22CGMA11	Mathematics –I	40
2	18PBCE12	Chemistry Lab	22PBCE12	Chemistry Lab	40
3	18CBCE21	Physics	22CBCE21	Physics	25
4	18GCMA21	Mathematics –II	22GCMA21	Mathematics –II	40
5	18CBEE23	Basic Electrical Engineering	22CBEE23	Basic Electrical Engineering	25
6	18GPPH21	Physics Lab	22GPPH21	Physics Lab	40
7	18CBCE34	Design and Analysis of Algorithms	22CBCE34	Design and Analysis of Algorithms	25
8	18CBIC45	Python Programming	22CBIC45	Python Programming	25
9	18CBCE52	Theory of Computation	22CBCE52	Theory of Computation and compiler Design	80
10	18DBCE73	Big Data Programming	22DBCE73	Big Data Analytics	60
11	18DBCE72	Cloud computing	22DBCE72	Cloud Computing	25
12	18DBCE74	Game Theory	22DBCE74	Game Programming	40
13	18DBCE63	Robotics	22DBCE63	Robotics and Its Applications	25
14	18DBCE64	Digital Image Processing	22DBCE64	Digital Image Processing	25

New Course Introduced:

Code	Name of the Course
22CBCE13	Basics of Civil and Mechanical Engineering
22CBCE15	Student Induction Program
22CBCE14	Universal Human Values
22BESY31	Basic Life Skills
22CBCE45	Introduction to AI & ML
22GLCI21	Gender Sensitivity Related Course
22CBCE51	Java and Web Programming
22CBCE52	Computer Graphics and Multimedia
22CBCE53	Fundamentals of Blockchain and Use cases
22PBCE51	Java and Web Programming Lab
22PBCE52	Computer Graphics and Multimedia Lab
22CBCE61	Industrial Training/ Mini Project/ MOOC Course
22CBCE61	.Net Programming
22PBCE61	.Net Programming Lab
22CBCE71	Full Stack Web Development
22PBCE71	Full Stack Web Development Lab
22EBCEX2	Introduction to Data Analytics
22EBCEX4	Agile Methodologies
22EBCEX5	Data Exploration and Visualization

Item No: 4 BoS / 2022/CSE / UG & PG / 11.4

To review the revision for new syllabus for B.TECH Information Technology from Regulation 2018 to Regulation 2022

- To develop the curriculum based on Outcome Based Education (OBE).
- To consider the present trend in the respective fields.
- To implement the guidelines and suggestions of the new education policy while preparing the curriculum.
- To eliminate the obsolete syllabus contents and to introduce the latest / updated technologies, new knowledge and practices.
- To design the curriculum focusing on Skill Development, Employability and Entrepreneurship.

NEW COURSES INTRODUCED:

CODE	Name of the Course
22PBIC11	Software Foundation and Programming 1 Laboratory
22CBCE15	Student Induction Program
22CBCE14	Universal Human Values - 2
22PBIC21	Software Foundation and Programming 2 Laboratory
22EBCE54	Fundamentals of Blockchain and Use cases
22CBCE45	Introduction to AI & ML
22GLCI21	Gender Sensitivity Related Course
22CBCE51	Java and Web Programming
22CBCE61	Foundation Course in Cloud Computing
22PBCE53	Industrial Training/ Mini Project/ MOOC Course (NPTEL/SWAYAM/Coursera/Mathworks)
22CBCE71	Development of IOT-based Applications
22PBCE71	Development of IOT-based Applications Lab
22PBCE61	Cloud Computing Lab
	Data Warehousing and Data Mining
22EBCE55	Fundamentals of Requirement Analysis and Management
22EBCEX2	Introduction to Data Analytics
22EBCEX1	Deep Learning
22EBCEX6	Agile Methodologies
22CBCE62	Enterprise Mobile Application Development using IBM Worklight
22PBCE62	Enterprise Mobile Application Development using IBM Worklight Lab
22EBCEX7	Block Chain Technologies
22EBCEX8	Applications of AI
22EBCEX9	Data Exploration and Visualization
22EBCEX10	Distributed Computing
22EBCEX11	Mobile Databases
22EBCEX12	Cloud Computing and Virtualization

Item No: 6 BoS / 2022/CSE / UG & PG / 11.5

To review the Feedback from Stakeholders to ensure that the syllabus of the courses include skill development, employability, and entrepreneurship

Feedback from Stakeholders:

S.No	Name & Designation	Comments	Role
1	Mr. Santhosh Gopynadhan, Senior Director, Optum Global Solutions (India) Private Limited, Chennai	The syllabus is to be revised with the current trends of Literature and Academia.	Industry Expert
2	Dr. Asnath Vicky Phamila Y, Associate Professor, School of Computer Science and Engineering, Vellore Institute of Technology - VIT Chennai	The curriculum has the scope for development of requisite skills among the students.	Academic Expert
3	Dr. R. Anandan, Professor & Head, Department of Computer Science and Engineering, Vels Institute of Science, Technology & Advanced Studies (VISTAS)	The curriculum designed for the programme is updated one and has the scope for providing knowledge on recent developments.	Internal Member
4	Mr. Pavan Srivatsav, Project Associate, Cognizant Technology Solutions, Chennai	The curriculum is in tune with therecent trends in literature	Alumni

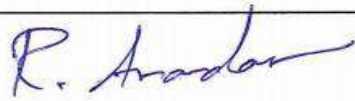

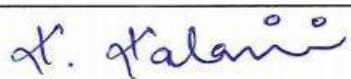

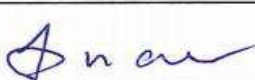

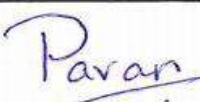

Item No: 6 BoS / 2022/CSE / UG & PG / 11.6

To review the UGC policy for CBCS and OBE curriculum

Status of Implementation of CBCS & OBE :

- Revised Curriculum and Syllabus is based Choice Based Credit System (CBCS) and following Outcome Based Education (OBE) guidelines and template. Considered the Program Curriculum and Syllabus presented before the Board of Studies and discussed in details and resolved as follows:
- Resolved to recommend that the Curriculum & Syllabus for B.E (CSE) ,B.TECH (IT) and M.E (CSE) designed as per the guidelines and Model Curriculum Framework of the UGC for the Academic year 2021 - 2022 be approved.
- Revised Curriculum & syllabus of UG & PG Programmes courses focused on Activities / Content with direct on Employability / Competency / Entrepreneurship / Skill development / Cross-Cutting Issues / Interdisciplinary enclosed in Annexures.

Signature of the Members:

B.E. Computer Science and Engineering

Curriculum and Syllabus

Regulation 2022

(Based on Choice Based Credit System (CBCS)

and

Outcome Based Education (OBE))

Effective from the Academic year

2022-2023

**Department of
Computer Science and Engineering**

School of Engineering

VISION AND MISSION OF THE DEPARTMENT

VISION

To develop a knowledge hub for Computer Science Engineers and Technocrats in application of their competence for the betterment of the Individual, Industry and Society.

MISSION

- To nurture the students to be industry ready by providing a strong conceptual foundation and by enhancing their employability and entrepreneurial skills.
- To provide holistic growth by conducting relevant enrichment programs, which includes curricular, co-curricular, extra-curricular and extension activities.
- To inculcate innovation and creativity through practically viable Internships and Project works.
- To create a research oriented mindset and focus in fulfilling growing demands of the society through mentoring and lifelong learning.

PROGRAM EDUCATIONAL OBJECTIVES(PEO)

PEO 1: To design, analyze, innovate and synthesize information in the field of Computer Science and Engineering relating to Industrial applications and Research.

PEO 2: To become Entrepreneurs or Employees of Reputed Organizations or Pursue Higher Education.

PEO 3: To exhibit leadership capability, endeavoring Social and Economical commitment and a mindset to inculcate community service and to conserve the Environment.

PEO 4: To accomplish any tasks with ethical values and commitment to meet the Social needs.

PEO 5: To work in a Multidisciplinary environment by providing solutions to real time problems.

PROGRAM OUTCOMES (PO)

- PO 1: Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- PO 2: Problem analysis:** Identify, formulate, research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- PO 3: Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- PO 4: Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- PO 5: Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- PO 6: The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- PO 7: Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- PO 8: Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- PO 9: Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- PO 10: Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- PO 11: Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- PO 12: Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PROGRAMME SPECIFIC OUTCOMES (PSO)

PSO 1: An expert who will be able to design, develop, analyze and apply acquired knowledge in computer software and hardware.

PSO 2: A Professional who can solve problem in varied fields and appraise environmental as well as social issues with ethics.

COMPETENCIES AND PERFORMANCE INDICATORS

PO 1: Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialisation for the solution of complex engineering problems.

1.1	Demonstrate competence in mathematical modelling	1.1.1	Apply the knowledge of discrete structures, linear algebra, statistics and numerical techniques to solve problems
		1.1.2	Apply the concepts of probability, statistics and queuing theory in modeling of computer-based system, data and network protocols.
1.2	Demonstrate competence in basic sciences	1.2.1	Apply laws of natural science to an engineering problem
1.3	Demonstrate competence in engineering fundamentals	1.3.1	Apply engineering fundamentals
1.4	Demonstrate competence in specialized engineering knowledge to the program	1.4.1	Apply theory and principles of computer science and engineering to solve an engineering problem

PO 2: Problem analysis: Identify, formulate, research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

2.1	Demonstrate an ability to identify and formulate complex engineering problem	2.1.1	Evaluate problem statements and identifies objectives
		2.1.2	Identify processes/modules/algorithms of a computer-based system and parameters to solve a problem
		2.1.3	Identify mathematical algorithmic knowledge that applies to a given problem
2.2	Demonstrate an ability to formulate a solution plan and methodology for an engineering problem	2.2.1	Reframe the computer-based system into interconnected subsystems
		2.2.2	Identify functionalities and computing resources.
		2.2.3	Identify existing solution/methods to solve the problem, including forming justified approximations and assumptions
		2.2.4	Compare and contrast alternative solution/methods to select the best methods
		2.2.5	Compare and contrast alternative solution processes to select the best process.
2.3	Demonstrate an ability to formulate and interpret a model	2.3.1	Able to apply computer engineering principles to formulate modules of a system with required applicability and performance.

		2.3.2	Identify design constraints for required performance criteria.
2.4	Demonstrate an ability to execute a solution process and analyze results	2.4.1	Applies engineering mathematics to implement the solution.
		2.4.2	Analyze and interpret the results using contemporary tools.
		2.4.3	Identify the limitations of the solution and sources/causes.
		2.4.4	Arrive at conclusions with respect to the objectives.
PO 3: Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for public health and safety, and cultural, societal, and environmental considerations.			
3.1	Demonstrate an ability to define a complex/ open-ended problem in engineering terms	3.1.1	Able to define a precise problem statement with objectives and scope
		3.1.2	Able to identify and document system requirements from stake- holders
		3.1.3	Able to review state-of-the-art literature to synthesize system requirements.
		3.1.4	Able to choose appropriate quality attributes as defined by ISO/IEC/IEEE standard
		3.1.5	Explore and synthesize system requirements from larger social and professional
		3.1.6	Able to develop software requirement specifications (SRS).
3.2	Demonstrate an ability to generate a diverse set of alternative design solutions	3.2.1	Able to explore design alternatives.
		3.2.2	Able to produce a variety of potential design solutions suited to meet functional requirements.
		3.2.3	Identify suitable non-functional requirements for evaluation of alternate design solutions.
3.3	Demonstrate an ability to select optimal design scheme for further development	3.3.1	Able to perform systematic evaluation of the degree to which several design concepts meet the criteria.
		3.3.2	Consult with domain experts and stakeholders to select candidate engineering
3.4	Demonstrate an ability to advance an engineering design to defined end state	3.4.1	Able to refine architecture design into a detailed design within the existing constraints.
		3.4.2	Able to implement and integrate the modules.

		3.4.3	Able to verify the functionalities and validate the design.
PO 4: Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.			
4.1	Demonstrate an ability to conduct investigations of technical issues consistent with their level of knowledge and understanding	4.1.1	Define a problem for purposes of investigation, its scope and importance
		4.1.2	Able to choose appropriate procedure/algorithm, dataset and test cases.
		4.1.3	Able to choose appropriate hardware/software tools to conduct the experiment.
4.2	Demonstrate an ability to design experiments to solve open-ended problems	4.2.1	Design and develop appropriate procedures/methodologies based on the study objectives
4.3	Demonstrate an ability to analyze data and reach a valid conclusion	4.3.1	Use appropriate procedures, tools and techniques to collect and analyze data
		4.3.2	Critically analyze data for trends and correlations, stating possible errors and limitations
		4.3.3	Represent data (in tabular and/or graphical forms) so as to facilitate analysis and explanation of the data, and drawing of conclusions
		4.3.4	Synthesize information and knowledge about the problem from the raw data to reach appropriate conclusions
PO 5: Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.			
5.1	Demonstrate an ability to identify/create modern engineering tools, techniques and resources	5.1.1	Identify modern engineering tools, techniques and resources for engineering activities
		5.1.2	Create/adapt/modify/extend tools and techniques to solve engineering problems
5.2	Demonstrate an ability to select and apply discipline specific tools, techniques and resources	5.2.1	Identify the strengths and limitations of tools for (i) acquiring information, (ii) modeling and simulating, (iii) monitoring system performance, and (iv) creating engineering designs.
		5.2.2	Demonstrate proficiency in using discipline-specific tools

5.3	Demonstrate an ability to evaluate the suitability and limitations of tools used to solve an engineering problem	5.3.1	Discuss limitations and validate tools, techniques and resources
		5.3.2	Verify the credibility of results from tool use with reference to the accuracy and limitations, and the assumptions inherent in their use.
PO 6: The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal, and cultural issues and the consequent responsibilities relevant to the professional engineering practice.			
6.1	Demonstrate an ability to describe engineering roles in a broader context, e.g. pertaining to the environment, health, safety, legal and public welfare	6.1.1	Identify and describe various engineering roles; particularly as pertains to protection of the public and public interest at the global, regional and local level
6.2	Demonstrate an understanding of professional engineering regulations, legislation and standards	6.2.1	Interpret legislation, regulations, codes, and standards relevant to your discipline and explain its contribution to the protection of the public
PO 7: Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and the need for sustainable development.			
7.1	Demonstrate an understanding of the impact of engineering and industrial practices on social, environmental and in economic contexts	7.1.1	Identify risks/impacts in the life-cycle of an engineering product or activity
		7.1.2	Understand the relationship between the technical, socio-economic and environmental dimensions of sustainability
7.2	Demonstrate an ability to apply principles of sustainable design and development	7.2.1	Describe management techniques for sustainable development
		7.2.2	Apply principles of preventive engineering and sustainable development to an engineering activity or product relevant to the discipline
PO 8: Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.			
8.1	Demonstrate an ability to recognize ethical dilemmas	8.1.1	Identify situations of unethical professional conduct and propose ethical alternatives
8.2	Demonstrate an ability to apply the Code of Ethics	8.2.1	Identify tenets of the ASME professional code of ethics

		8.2.2	Examine and apply moral & ethical principles to known case studies
PO 9: Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.			
9.1	Demonstrate an ability to form a team and define a role for each member	9.1.1	Recognize a variety of working and learning preferences; appreciate the value of diversity on a team
		9.1.2	Implement the norms of practice (e.g. rules, roles, charters, agendas, etc.) of effective team work, to accomplish a goal.
9.2	Demonstrate effective individual and team operations-- communication, problem solving, conflict resolution and leadership skills	9.2.1	Demonstrate effective communication, problem-solving, conflict resolution and leadership skills
		9.2.2	Treat other team members respectfully
		9.2.3	Listen to other members
		9.2.4	Maintain composure in difficult situations
9.3	Demonstrate success in a team-based project	9.3.1	Present results as a team, with smooth integration of contributions from all individual efforts
PO 10: Communication: Communicate effectively on complex engineering activities with the engineering community and with the society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions			
10.1	Demonstrate an ability to comprehend technical literature and document project work	10.1.1	Read, understand and interpret technical and non-technical information
		10.1.2	Produce clear, well-constructed, and well-supported written engineering documents
		10.1.3	Create flow in a document or presentation - a logical progression of ideas so that the main point is clear
10.2	Demonstrate competence in listening, speaking, and presentation	10.2.1	Listen to and comprehend information, instructions, and viewpoints of others
		10.2.2	Deliver effective oral presentations to technical and non-technical audiences
10.3	Demonstrate the ability to integrate different modes	10.3.1	Create engineering-standard figures, reports and drawings to complement writing and presentations

	of communication	10.3.2	Use a variety of media effectively to convey a message in a document or a presentation
PO 11: Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's work, as a member and leader in a team, to manage projects and in multidisciplinary environments.			
11.1	Demonstrate an ability to evaluate the economic and financial performance of an engineering activity	11.1.1	Describe various economic and financial costs/benefits of an engineering activity
		11.1.2	Analyze different forms of financial statements to evaluate the financial status of an engineering project
11.2	Demonstrate an ability to compare and contrast the costs/benefits of alternate proposals for an engineering activity	11.2.1	Analyze and select the most appropriate proposal based on economic and financial considerations.
11.3	Demonstrate an ability to plan/manage an engineering activity within time and budget constraints	11.3.1	Identify the tasks required to complete an engineering activity, and the resources required to complete the tasks.
		11.3.2	Use project management tools to schedule an engineering project, so it is completed on time and on budget.
PO 12: Life-long learning: Recognise the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.			
12.1	Demonstrate an ability to identify gaps in knowledge and a strategy to close these gaps	12.1.1	Describe the rationale for the requirement for continuing professional development
		12.1.2	Identify deficiencies or gaps in knowledge and demonstrate an ability to source information to close this gap
12.2	Demonstrate an ability to identify changing trends in engineering knowledge and practice	12.2.1	Identify historic points of technological advance in engineering that required practitioners to seek education in order to stay current
		12.2.2	Recognize the need and be able to clearly explain why it is vitally important to keep current regarding new developments in your field
12.3	Demonstrate an ability to identify and access sources for new information	12.3.1	Source and comprehend technical literature and other credible sources of information

		12.3.2	Analyze sourced technical and popular information for feasibility, viability, sustainability, etc.
PSO 1: An expert who will be able to design, develop, analyze and apply acquired knowledge in computer software and hardware.			
13.1	Ability to investigate complex problems	13.1.1	Identify problem statements and develop smart solutions for real time applications
		13.1.2	Investigate all the probable solutions towards the identified problem
13.2	Design and Develop solutions systematically	13.2.1	Specify the design tools that may help in finding the solution
		13.2.2	Systematically evaluate and identify the testing strategies to develop an optimal solution
		13.2.3	Implement an optimal solution for the desired problem
PSO 2: A Professional who can solve problem in varied fields and appraise environmental as well as social issues with ethics.			
14.1	Develop cost benefit solutions using engineering principles and practices	14.1.1	Describe the rationale for choosing solutions based on engineering principles
		14.1.2	Conduct feasibility and cost-benefit analysis for implementing the solution
14.2	Ability to understand and develop the social and environmental issues using the current technology	14.2.1	Identify the problem and develop an appropriate solution
		14.2.2	Design solution with ethics for social and environmental problems

**VELS INSTITUTE OF SCIENCE, TECHNOLOGY & ADVANCED STUDIES (VISTAS)
SCHOOL OF ENGINEERING**

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

The Panel members for Board of studies meeting are listed below

S. No	Name of the Board Member	Designation	Institute / Industry
Internal Members			
1	Dr. R. Anandan	Professor & Head Department of Computer Science and Engineering Vels Institute of Science, Technology & Advanced Studies (VISTAS)	Chairman
2	Dr. S. Arun	Director, IQAC Vels Institute of Science, Technology & Advanced Studies (VISTAS)	Internal Member
3	Dr. R. A. Karthika	Associate Professor Department of Computer Science and Engineering Vels Institute of Science, Technology & Advanced Studies (VISTAS)	Internal Member
4	Dr. A. Rajesh	Associate Professor Department of Computer Science and Engineering Vels Institute of Science, Technology & Advanced Studies (VISTAS)	Internal Member
5	Dr. K. Kalaivani	Assistant Professor Department of Computer Science and Engineering Vels Institute of Science, Technology & Advanced Studies (VISTAS)	Internal Member
External Expert Members			
1	Dr. Asnath Vicky Phamila Y	Associate Professor School of Computer Science and Engineering Vellore Institute of Technology - VIT Chennai	Academic Expert
2	Mr. Santhosh Gopynadhan	Senior Director Optum Global Solutions (India) Private Limited, Chennai	Industrial Expert
Student Member			
1	Mr. Pavan Srivatsav	Project Associate Cognizant Technology Solutions, Chennai	Alumni

CSE	Engineering Chemistry	L	T	P	Credits
		3	0	0	3

Course Objectives

- To learn about the molecular orbitals, ionic interactions and periodic properties.
- Rationalise periodic properties such as ionization potential, electronegativity, oxidation states and electro negativity.
- List major chemical reactions that are used in the synthesis of molecules.

UNIT I Atomic and molecular structure, Intermolecular forces and potential energy surfaces 9

Molecular orbitals of diatomic molecules and plots of the multicentre orbitals. Equations for atomic and molecular orbitals. Energy level diagrams of diatomics. Pi-molecular orbitals of butadiene, benzene and aromaticity. Valence Bond Theory and the energy level diagrams for transition metal ions and their magnetic properties. Ionic, dipolar and van Der Waals interactions, potential energy surfaces of H₃, H₂F and HCN.

UNIT II Spectroscopic techniques and applications 9

Principles of spectroscopy and selection rules. Electronic spectroscopy. Vibrational, rotational spectroscopy of diatomic molecules, Morse equations and Mossbauer spectroscopy . Applications. Diffraction and scattering

UNIT III Use of free energy in chemical equilibria 9

Thermodynamic functions: energy, entropy , free energy and fugacity. Estimations of entropy and free energies. Free energy and emf. Cell potentials, the Nernst equation and applications. Acid base, oxidation reduction and solubility equilibria. Water chemistry. Corrosion.

UNIT IV Periodic properties 9

Variations of s, p, d and f orbital energies of atoms in the periodic table, electronic configurations, atomic and ionic sizes, ionization energies, electron affinity and electronegativity, diagonal relationship, anomalous behaviour of Lithium, carbon and Nitrogen, polarizability, oxidation states, coordination numbers and geometries, hard soft acids and bases, molecular geometries.

UNIT V Organic reactions and synthesis of a drug molecule 9

Introduction to reactions involving substitution, addition, elimination, oxidation, reduction, cyclization, Coupling reaction and ring openings. Synthesis of a commonly used drug molecule.

TOTAL: 45 hours

Text Books

COURSE OUTCOMES

At the end of this course the students will be able to,

CO1: Analyze microscopic chemistry in terms of atomic and molecular orbitals and intermolecular forces.

CO2: Distinguish the ranges of the electromagnetic spectrum used for exciting different molecular energy levels in various spectroscopic techniques.

CO3: Analyze bulk properties and processes using thermodynamic considerations.

CO4: Classify the properties and reactivity of different types of elements based on the periodic table.

CO5: Apply the basic terms involved in an Organic reactions and synthesis of a drug molecule.

CSE	Mathematics-I (Calculus and Linear Algebra)	3L:1T:0P:4 credits
-----	---	--------------------

Course Objectives

The objective of this course is to familiarize the prospective engineers with techniques in basic calculus and linear algebra. It aims to equip the students with standard concepts and tools at an intermediate to advanced level that will serve them well towards tackling more advanced level of mathematics and applications that they would find useful in their disciplines

Unit-I: Calculus (12 hours)

Rolle's theorem-Mean value theorems-Taylor's and Maclaurin theorems -Indeterminate forms and L'Hospital's rule-Curvature-radius of curvature – Evolutes and envelopes.

Unit-II: Multivariable Calculus (12hours)

Limits-continuity- partial derivative – total derivative – maxima and minima- saddle points-method of Lagrange multipliers

Unit-III: Sequence and series (12hours)

Convergence of sequence and series – test for convergence- power series – Comparison test- Root test, D'Alembert's test and Leibnitz's test

Unit-IV: Matrices (12 hours)

Introduction to Matrices- Rank of matrix- Linear systems of equations-symmetric- skew symmetric matrix and orthogonal matrices-Eigen values and Eigen vectors Diagonalization of matrices- Cayley-Hamilton theorem and orthogonal transformation.

Unit-V: Vector spaces (12 hours)

Vector Space- linear Independence and dependence of vectors, basis, dimension- Linear transformations (maps), range and kernel of a linear map, rank and nullity- Inner product spaces-Gram-Schmidt Orthogonalization.

Total Hours: 60

Textbooks:

1. G.B.Thomas and R.L.Finney, Calculus and Analytic geometry, 9thEdition,Pearson,Reprint, 2002.
2. Ramana B.V., Higher Engineering Mathematics,Tata McGraw Hill New Delhi, 11,Reprint,2010

3. N.P. Bali and Manish Goyal, A text book of Engineering Mathematics, Laxmi Publications, Reprint, 2008.

Reference books:

1. P. Sivaramakrishna Das and C. Vijayakumari, Mathematics-I, First Edition, Pearson India Education services Pvt. Ltd.
2. Erwinkreyszig, Advanced Engineering Mathematics, 9 Edition, John Wiley&Sons, 2006.
3. VeeraranjanT.,Engineering Mathematics for firstyear,TataMcGraw-Hill,NewDelhi,2008.
4. D.Poole, LinearAlgebra: A ModernIntroduction,2nd Edition, Brooks/Cole,2005.
5. B.S.Grewal, Higher Engineering Mathematics, Khanna Publishers, 36 Edition,2010.

Course Outcome

CO1:	Apply the concept of differential calculus and to evaluate the curvature, radius of curvature and envelope	K3
CO2:	Understand the concept of limits, continuity and to evaluate derivatives	K2
CO3:	Analyze the convergence of the series using root test, D’Alembert’s test, Leibnitz’s test	K3
CO4:	Determine the rank of a matrix, linear system of Equation and Eigen values and Eigenvectors	K3
CO5:	Evaluate the linear independence and dependence of vectors, linear transformations and inner product space.	K4

CSE	PROGRAMMING FOR PROBLEM SOLVING	3	0	0	3
------------	--	----------	----------	----------	----------

Course Objectives

- To understand the basic concepts of programming – Flow chart, Pseudocode.
- To learn the fundamentals of C programming - declarations, operators, expressions and control statements.
- To learn the manipulation of strings, functions, pointers and file operations.
- To understand the concepts of arrays, basic sorting and searching algorithms.
- To find the order of time complexity of basic algorithms

UNIT I INTRODUCTION TO PROGRAMMING **9 hours**
 Introduction to Programming (Flow chart/pseudo code, compilation etc.), Variables (including data types), Input / Output - Arithmetic expressions and precedence, Conditional Branching and Loops -Writing and evaluation of conditionals and consequent branching - Iteration and loops

UNIT II ARRAYS AND BASIC ALGORITHMS **9 hours**
 Arrays (1-D, 2-D), Character arrays and Strings, Searching, Basic Sorting Algorithms, Finding roots of equations, Notion of order of time complexity through example programs

UNIT III FUNCTIONS AND POINTERS **9 hours**
 Functions (including using built in libraries), Parameter passing in functions, call by value, Passing arrays to functions: idea of call by reference, Recursion with example programs such as Finding Factorial, Fibonacci series, etc. Pointers- Defining pointers, Use of Pointers in self-referential structures

UNIT IV STRUCTURES AND UNIONS **9 hours**
 Structures - Defining structures and Array of Structures, Structures containing Pointers, Unions - Storage classes: auto, static, extern, register – Dynamic memory allocation

UNIT V STRING FUNCTIONS AND FILES **9 hours**
 Strings - library string functions, pointers in strings, pointers and function arguments, Files - file Operations, processing a file, Preprocessor directives, use of typedef, Command line arguments, Enumerated data types.

TOTAL : 45 hours

Text Books:

- T1: E. Balaguruswamy, "Programming in ANSI C", Tata McGraw-Hill
 T2: Byron Gottfried, "Schaum's Outline of Programming with C", McGraw-Hill

Reference Books:

- R1: Brian W. Kernighan and Dennis M. Ritchie, "The C Programming Language", PrenticeHall of India

 R3: Ashok.N.Kamthane, "Computer Programming", Pearson Education (India)

Web Links:W1. <https://www.edx.org/course/c-programming-getting-started>**COURSE OUTCOMES**

CO1:	Determine a pictorial representation with a stepwise procedure for solving complex problems	K2
CO2:	Develop a high level programming code using c languages.	K3
CO3:	Evaluate the various functional operations for solving problem.	K4
CO4:	Make use of various c operations like array, pointer, strings and searching method	K3
CO5:	Develop a C module for a given set of instruction.	K4

CSE	BASIC CIVIL AND MECHANICAL ENGINEERING	3	0	0	3
------------	---	----------	----------	----------	----------

OBJECTIVES:

- To provide the students an illustration of the significance of the Civil and Mechanical Engineering Profession in satisfying the societal needs.
- To help students acquire knowledge in the basics of surveying and the materials used for Construction.
- To provide an insight to the essentials of components of a building and the infrastructure Facilities.
- To explain the component of power plant units and detailed explanation to IC engines their Working principles.
- To explain the Refrigeration & Air-conditioning system.

UNIT I PART A: OVERVIEW OF CIVIL ENGINEERING

(5 hours)

Civil Engineering contributions to the welfare of Society - Specialized sub disciplines in Civil Engineering – Structural, Construction, Geotechnical, Environmental, Transportation and Water Resources Engineering – National building code – terminologists: Plinth area, Carpet area, Floor area, Buildup area, Floor space index - Types of buildings: Residential buildings, Industrial buildings.

UNIT I PART B: OVERVIEW OF MECHANICAL ENGINEERING

(4 hours)

Overview of Mechanical Engineering - Mechanical Engineering Contributions to the welfare of Society – Specialized sub disciplines in Mechanical Engineering – Manufacturing, Automation, Automobile and Energy Engineering - Interdisciplinary concepts in Mechanical Engineering.

UNIT II SURVEYING AND CIVIL ENGINEERING MATERIALS

(9 hours)

Surveying: Objects – Classification – Principles – Measurements of Distances and angles – Leveling – Determination of areas– Contours. Civil Engineering Materials: Bricks – Stones – Sand – Cement – Concrete – Steel - Timber – Modern Materials, Thermal and Acoustic Insulating Materials, Decorative Panels, Water Proofing Materials. Modern uses of Gypsum, Pre-fabricated Building component (brief discussion only)

UNIT III BUILDING COMPONENTS AND INFRASTRUCTURE

(9 hours)

Building plans – Setting out of a Building - Foundations: Types of foundations - Bearing capacity and settlement – Brick masonry – Stone Masonry – Beams – Columns – Lintels – Roofing – Flooring – Plastering. Types of Bridges and Dams – Water Supply Network - Rain Water Harvesting – Solid Waste

Management - Introduction to Highways and Railways - Introduction to Green Buildings.

CSE	WORKSHOP AND MANUFACTURING PRACTICES	1	0	4	3
-----	--------------------------------------	---	---	---	---

COURSE OBJECTIVES:

1. To study bench fitting drawings for making male and female fittings as per the given dimensions and Tolerances.
2. To study sheet metal development drawings for making common metal parts/components as per the given dimensions.

DETAILED CONTENTS:

1. Manufacturing Methods- casting, forming, machining, joining, advanced manufacturing methods
(3 lectures)

- 2. CNC machining, Additive manufacturing (1 lecture)
- 3. Fitting operations & power tools (1 lecture)
- 4. Electrical & Electronics (1 lecture)
- 5. Carpentry (1 lecture)
- 6. Plastic moulding, glass cutting (1 lecture)
- 7. Metal casting (1 lecture)
- 8. Welding (arc welding & gas welding), brazing (1 lecture)

WORKSHOP PRACTICE:

1. Machine shop (9 hours)
 Machining: Basics of Machining Processes Equipment'S, Simple turning of cylindrical surface on MS rod using lathe machine tool, To make Facing and plain turning, step turning, drilling in the lathe

2. Fitting shop (9hours)
 To make square, V joint in bench fitting as per the given dimension and tolerances, Tools and demonstration of producing model

3. Carpentry (9 hours)
 Basics of Carpentry operations, Equipment's , To make half lap joint, dovetail, TEE Lap joint , Cross halving joint of two wooden pieces at perpendicular direction,

4. Welding shop (9 hours)
 To make single, butt, lap and T fillet joint by arc welding with the back hand and fore hand welding techniques as per the given dimensions. To make simple Dust pan, Rectangular trays in sheet metal with the jigs as per the given Dimensions.

5. Plumbing Works (9 hours)
 Study of pipeline joints, its location and functions: valves, taps, couplings, unions, reducers, elbows in household fittings. Basic pipe connections – Mixed pipe material connection – Pipe connections with different joining components.

TOTAL : 45 hours

COURSE OUTCOMES

CO1:	Experiment with facing, Turning and various types of fitting joint	K 1
CO2:	Develop the half lap joint, TEE Lap joint carpentry and welding.	K 5
CO3:	Practice casting, moulding, & smithy trades	K 2

CO4:	Developments of sheet metal jobs from GI sheets, knowledge of basic concepts of soldering	K 5
CO5:	Make a Basic pipe connections for Mixed pipe material connection and Pipe connections with different joining components	K 1

TEXT/REFERENCE BOOKS:

CSE	CHEMISTRY LABORATORY	0	0	2	1
------------	-----------------------------	----------	----------	----------	----------

Course Objectives

- The chemistry laboratory course will consist of experiments illustrating the principles of chemistry relevant to the study of science and engineering.
- The students will learn to:
 - Estimate rate constants of reactions from concentration of reactants/products as a function of time.
 - Measure molecular/system properties such as surface tension, viscosity, conductance of solutions, redox potentials, chloride content of water, etc
 - Synthesize a small drug molecule.

Experiments

1. Determination of the rate constant of a reaction.
2. Determination of the partition coefficient of a substance between two immiscible liquids.
3. Determination of surface tension and viscosity.
4. Thin layer chromatography.
5. Determination of chloride content in water.
6. Determination of cell constant and conductance of solutions.
7. Synthesis of a polymer/drug.
8. Determination of saponification / acid value of an oil.
9. Determination of redox potentials and emf by Potentiometric method.
10. Estimate the adsorption of acetic acid by charcoal.

Text Books

- T1: S. Sundaram and K. Raghavan "Practical Chemistry", S. Viswanathan. Co. 3rd edition 2011.
T2: Gnanaprakasam, Ramamurthy, "Organic Chemistry Lab Manual" S. Viswanathan Pvt. Ltd. 3rd edition 2011.

2. <https://www.youtube.com/watch?v=qdmKGskCyh8>
3. https://www.youtube.com/watch?v=7_6_dKlo67k

COURSE OUTCOMES

At the end of this course the students will be able to,

- CO1: Estimate the rate constants of reactions and partition coefficient of immiscible liquids.
CO2: Find the viscosity and to test the purity of the compound.
CO3: Estimate the amount of chlorine content present in drinking water and to know the conductance of a solution.

CO4: Develop a small drug molecule and to know the saponification of an oil.

CO5: Find out the unknown element by Potentiometric method and to remove some of the toxic chemical by charcoal method.

CSE	PROGRAMMING FOR PROBLEM SOLVING LABORATORY	0	0	2	1
-----	--	---	---	---	---

Course Objectives

➤ To design and develop C Programs for various applications

Any Eight Experiments

1. Familiarization with programming environment
2. Simple computational problems using arithmetic expressions
3. Problems involving if-then-else structures
4. Iterative problems
5. 1D Array manipulation
6. Matrix problems
7. String operations
8. Simple functions
9. Solving Numerical methods problems
10. Recursive functions
11. Pointers and structures
12. File operations

COURSE OUTCOMES

At the end of this course the students will be able to

CO1: Determine the advanced features of the C language.

CO2: Develop the model data using primitive and structured types.

CO3: Construct programs that demonstrate effective use of C features including arrays, structures, pointers and files.

CO4: Develops the ability to analyze a problem, develop an algorithm to solve it.

CO5: Develops the use of the C programming language to implement various algorithms, and develops the basic concepts and terminology of programming in general.

CSE	UNIVERSAL HUMAN VALUES 2 : UNDERSTANDING HARMONY	2	0	0	0
-----	--	---	---	---	---

COURSE OBJECTIVES:

- Development of a holistic perspective based on self-exploration about themselves (human being), family, society and nature/existence.
- Understanding (or developing clarity) of the harmony in the human being, family, society and nature/existence
- Strengthening of self-reflection.
- Development of commitment and courage to act.

UNIT I Course Introduction - Need, Basic Guidelines, Content and Process for Value Education

Understanding the need, basic guidelines, content and process for Value Education, Self-Exploration—what is it? - its content and process; ‘Natural Acceptance’ and Experiential Validation- as the mechanism for self exploration, Continuous Happiness and Prosperity- A look at basic Human Aspirations, Right understanding, Relationship and Physical Facilities- the basic requirements for fulfillment of aspirations of every human being with their correct priority, Understanding Happiness and Prosperity correctly- A critical appraisal of the current scenario, Method to fulfill the above human aspirations: understanding and living in harmony at various levels.

UNIT II Understanding Harmony in the Human Being - Harmony in Myself

Understanding human being as a co-existence of the sentient ‘I’ and the material ‘Body’, Understanding the needs of Self (‘I’) and ‘Body’ - Sukh and Suvidha, Understanding the Body as an instrument of ‘I’ (I being the doer, seer and enjoyer), Understanding the characteristics and activities of ‘I’ and harmony in ‘I’, Understanding the harmony of I with the Body: *Sanyam* and Health; correct appraisal of Physical needs, meaning of Prosperity in detail, Programs to ensure *Sanyam* and Health

UNIT III Understanding Harmony in the Family and Society- Harmony in Human-Human Relationship

Understanding harmony in the Family- the basic unit of human interaction, Understanding values in human-human relationship; meaning of *Nyaya* and program for its fulfillment to ensure *Ubhay-tripti*; Trust (*Vishwas*) and Respect (*Samman*) as the foundational values of relationship, Understanding the meaning of *Vishwas*; Difference between intention and competence, Understanding the meaning of *Samman*, Difference between respect and differentiation; the other salient values in relationship, Understanding the harmony in the society (society being an extension of family): *Samadhan*, *Samridhi*, *Abhay*, *Sah-astitva* as comprehensive Human Goals, Visualizing a universal harmonious order in society- Undivided Society (*AkhandSamaj*), Universal Order (*SarvabhaumVyawastha*) - from family to world family!.

UNIT IV Understanding Harmony in the Nature and Existence - Whole existence as Co-existence

Understanding the harmony in the Nature, Interconnectedness and mutual fulfillment among the four orders of nature- recyclability and self-regulation in nature, Understanding Existence as Co-existence (*Sah-astitva*) of mutually interacting units in all-pervasive space, Holistic perception of harmony at all levels of existence.

UNIT V Implications of the above Holistic Understanding of Harmony on Professional Ethics

Natural acceptance of human values, Definitiveness of Ethical Human Conduct, Basis for Humanistic Education, Humanistic Constitution and Humanistic Universal Order, Competence in Professional Ethics:

a) Ability to utilize the professional competence for augmenting universal human order, b) Ability to identify the scope and characteristics of people-friendly and eco-friendly production systems, technologies and management models, Case studies of typical holistic technologies, management models and production systems, Strategy for transition from the present state to Universal Human Order: a) At the level of individual: as socially and ecologically responsible engineers, technologists and managers, b) At the level of society: as mutually enriching institutions and organizations.

Course Outcome:

On completion of this course, the students will be able to

1. Understand the significance of value inputs in a classroom, distinguish between values and skills, understand the need, basic guidelines, content and process of value education, explore the meaning of happiness and prosperity and do a correct appraisal of the current scenario in the society
2. Distinguish between the Self and the Body, understand the meaning of Harmony in the Self the Co-existence of Self and Body.
3. Understand the value of harmonious relationship based on trust, respect and other naturally acceptable feelings in human-human relationships and explore their role in ensuring a harmonious society
4. Understand the harmony in nature and existence, and work out their mutually fulfilling participation in the nature.
5. Distinguish between ethical and unethical practices, and start working out the strategy to actualize a harmonious environment wherever they work.

CSE	ENGLISH	L	T	P	Credits
		2	0	0	2

Course Objective:

- To acquire ability to speak effectively in real life situations.
- To write letters and reports effectively in formal and business situations.
- To develop listening skills for academic and professional purposes.
- To gain effective speaking and listening skills in communication.
- To develop the soft skills and interpersonal skills to excel in their career.
- To enhance the performance of students at Placement Interviews, Group Discussions and other recruitment procedures.

UNIT I VOCABULARY BUILDING

08

General Vocabulary –Nouns--Compound nouns, Synonyms , Antonyms, Prefixes and Suffixes, Homonyms, Homographs and Homophones, Changing words from one form to another, Acronyms and Abbreviations.- Instructions.

UNIT II BASIC WRITING

08

Sentences structures –Kinds of sentences, Types of sentences, Clauses and Phrases, Punctuations, Blending and Clipping, Framing questions- Yes/No types and “Wh” questions, Summarizing, Precise writing, Paragraph Writing.

UNIT III IDENTIFYING COMMON ERRORS IN ENGLISH

08

Articles, Prepositions, Subject-verb Agreement, Pronouns - Relative pronouns, Demonstrative pronouns, Misplaced Modifiers, Redundancies, Clichés, Infinitives& Gerund, Checklist.

UNIT IV NATURE AND STYLE OF SENSIBLE WRITING

08

Situational Dialogues, Process description, Definitions, Numerical Expressions, Recommendation, Information Transfer- Flow chart Bar chart and Pie chart, ,Writing introduction and conclusion.

UNIT V WRITING PRACTICES

08

Active voice and Passive voice, ,Making negative sentences ,Tenses, Letter Writing- Formal & Informal Letters, Report Writing- Letter Report, Accident Report, Investigation Report and Survey, Essay writing, Reading Comprehension Passages.

Course Outcomes

The student will acquire basic proficiency in English including reading and listening comprehension, writing and speaking skills.

CO 1 Improve the language proficiency of a technical under-graduate in English with emphasis on Learn, Speak, Read and Write skills.

CO 2 Develop listening skills for academic and professional purposes.

CO 3 Acquire the ability to speak effectively in English in real life situations

CO 4 Provide learning environment to practice listening, speaking, reading and writing skills.

CO 5 Variety of self-instructional modes of language learning and develop learner autonomy.

CSE	PHYSICS	3	0	0	3
------------	----------------	----------	----------	----------	----------

Course Objectives

- To learn the basics of electronic materials, semiconducting materials and their interaction with light, new engineered semiconductor devices.
- To apply these fundamental principles to solve practical problems related to materials used for engineering applications.

UNIT I Electronic materials

9

Energy bands in solids -Types of electronic materials: metals - semiconductors and insulators - Direct and indirect band gaps - Free electron theory - electrical conductivity and thermal conductivity - Fermi distribution- Effect of temperature on Fermi function – Density of energy states - Kronig-Penny model - E-k diagram.

UNIT II Semiconductors

9

Intrinsic semiconductor - carrier concentration derivation – Variation of Fermi energy level with temperature -extrinsic semiconductors – derivation- carrier concentration in n type and p type semiconductor – Variation of Fermi energy level with temperature and impurity concentration.

UNIT III Light-semiconductor interaction

9

Optical transitions in bulk semiconductors: absorption - spontaneous emission and stimulated emission - Einstein's coefficient- derivation - Photovoltaic effect - Solar cells – principle and working - excitons

UNIT IV Semiconductor devices and Measurements

9

Semiconductor diodes: construction and working – PN diode – Zener diode – Light Emitting Diode (LED) – Measurements: UV-Vis spectroscopy - Hall effect – Determination of Hall coefficient – Applications.

UNIT V Engineered semiconductor materials

9

Shape Memory Alloys (SMA) – Characteristics, Properties of Ni-Ti alloy - Applications - Semiconductor Nanomaterials: Synthesis, properties and applications of nanophase materials – Quantum confinement - Quantum nanostructures: quantum dots - quantum wires - quantum wells.

CSE	Mathematics-II (Probability and Statistics)	3	1	0	4
-----	--	----------	----------	----------	----------

Course Objective:

The objective of this course is to familiarize the students with statistical techniques. It aims to equip the students with standard concepts and tools at an intermediate to advanced level that will serve them well towards tackling various problems in the discipline.

UNIT I: Basic Probability:

12

Introduction to Probability-Conditional probability – Baye’s Theorem- Random Variables-Discrete random variables-Continuous Random Variables –Probability mass function-Probability density function.

UNIT II: Standard Distributions:

12

Introduction to theoretical distribution-Discrete Distributions- Binomial, Poisson, Geometric Distributions- Continuous Distribution-Uniform, Normal, Exponential and Gamma distribution-Properties.

UNIT III: Correlation and Regression Analysis:

12

Correlation: Types of Correlation-Methods of studying correlation- Scatter diagram method, Karl Pearson’s Coefficient of correlation, Spearman’s Rank Correlation Coefficient. Regression: Regression Lines and Regression equations - simple problems

UNIT IV: Basic Statistics:

12

Introduction-Measures of Central tendency: Mean, Median and Mode- Measure of Dispersion- Range, Mean deviation- Standard Deviation and coefficient of variation

UNIT V: Sampling :

12

Introduction to small sample – t-test-Single mean, difference of means, and Paired t-test- F-test- Chi-square test for goodness of fit and independence of attributes.

Total Hours: 60

Course Outcome:

CO1: Apply the fundamental concepts of probability.

CO2: Understand of standard distributions which can describe real life phenomenon.

CO3: Understand and critically discuss the issues surrounding of correlation and Regression

CO4: Evaluate the underlying assumptions of analysis tools of measures of central tendency and dispersion

CO5: Analyze the uses and limitations of Testing of hypothesis used in engineering

CSE	BASIC ELECTRICAL ENGINEERING	3	0	0	3
------------	-------------------------------------	----------	----------	----------	----------

Course Objectives

- To obtain basic knowledge on electrical quantities such as current, voltage, power and energy.
- To provide employability skill of adequate working knowledge on basic DC and AC circuits used in electrical and electronic devices. To understand the working principle, construction, applications of DC machines, AC machines & measuring instruments.

UNIT I DC Circuits 12

Electrical circuit elements (R, L and C), voltage and current sources, Kirchoff current and voltage laws, Mesh and Nodal analysis, Analysis of simple circuits with dc excitation, Wye↔Delta Transformation, Superposition, Thevenin and Norton Theorems.

UNIT II AC Circuits 12

Representation of sinusoidal waveforms, peak and rms values, phasor representation, real power, reactive power, apparent power, power factor. Analysis of single-phase ac circuits consisting of R, L, C, RL, RC, RLC combinations (series and parallel), resonance. Three phase balanced circuits, voltage and current relations in star and delta connections.

UNIT III Transformers 12

Magnetic materials, BH characteristics, ideal and practical transformer, equivalent circuit, losses in transformers, regulation and efficiency. Auto-transformer and three-phase transformer connections.

UNIT IV Electrical Machines & Power Converters 12

Generation of rotating magnetic fields, Construction and working of a three-phase induction motor, Significance of torque-slip characteristic. Construction of Single phase induction motor. Construction, working, torque-speed characteristic and speed control of separately excited dc motor. DC-DC buck and boost converters, duty ratio control. Single phase Bridge Rectifier, Single Phase voltage source inverters.

UNIT V Basics of Electronics 12

Intrinsic semiconductors, Extrinsic semiconductors – P-type and N-type, P-N junction, VI Characteristics of PN junction diode, Zener effect, Zener diode, Zener diode Characteristics. Binary Number System — Boolean Algebra theorems— Logic gates- Introduction to sequential Circuits— Flip-Flops.

CSE	ENGINEERING GRAPHICS AND DESIGN	1	0	4	3
------------	--	----------	----------	----------	----------

COURSE OBJECTIVES:

- To develop in students, graphic skills for communication of concepts, ideas and design of engineering products.
- To expose them to existing national standards related to technical drawings.

CONCEPTS AND CONVENTIONS (Not for Examination)

Importance of graphics in engineering applications – Use of drafting instruments – BIS conventions and specifications – Size, layout and folding of drawing sheets – Lettering and dimensioning.

UNIT I INTRODUCTION TO ENGINEERING DRAWING AND PLANE CURVES 12

Curves used in engineering practices: Conics – Construction of ellipse, Parabola and hyperbola by eccentricity method – Construction of cycloid, Epicycloid, Hypocycloid – construction of involutes of square and circle – Drawing of tangents and normal to the above curves. Scales – Plain, Diagonal and Vernier Scales.

UNIT II PROJECTION OF POINTS, LINES AND PLANE SURFACES 12

Projection of points and straight lines located in the first quadrant – Determination of true lengths and true inclinations – Projection of polygonal surface and circular lamina inclined to both reference planes - Auxiliary Planes.

UNIT III PROJECTION OF SOLIDS 12

Projection of simple solids like prisms, pyramids, cylinder and cone when the axis is inclined to one reference plane by change of position method - Auxiliary Views.

UNIT IV 12

Sectioning of above solids in simple vertical position by cutting planes inclined to one reference plane and perpendicular to the other – Obtaining true shape of section - Auxiliary Views. Development of lateral surfaces of simple and truncated solids – Prisms, pyramids, cylinders and cones – Development of lateral surfaces of solids with cylindrical cutouts, perpendicular to the axis.

UNIT V 12

Free hand sketching: Representation of Three-Dimensional objects – General principles of orthographic projection – Need for importance of multiple views and their placement - layout views – Developing visualization skills through free hand sketching of multiple views from pictorial views of objects. Principles of isometric projection – isometric scale – isometric projections of simple solids, truncated prisms, pyramids, cylinders and cones.

TOTAL: 60 Hours

TEXT BOOKS:

1. N.D. Bhatt, "Engineering Drawing" Charotar Publishing House, 46 th Edition, (2003).
2. K. V. Natrajan, "A text book of Engineering Graphics", Dhanalakshmi Publishers, Chennai (2006).

REFERENCES

1. M.S. Kumar, "Engineering Graphics", D.D. Publications, (2007).
2. K. Venugopal & V. Prabhu Raja, "Engineering Graphics", New Age International (P) Limited (2008).

6. Basant Agarwal and Agarwal C.M., "Engineering Drawing", Tata McGraw Hill Publishing Company Limited, New Delhi, (2008).

Course Outcomes

CO1:	Understand the theory of projection able to know and understand the conventions and the methods of engineering drawing	K2
CO2:	Improve their visualization skills so that they can apply these skills in projections of surfaces	K3
CO3:	Improve their visualization skills so that they can apply these skills in projections of solids	K3
CO4:	Impart and inculcate a proper understanding of the theory of projection. Improve the visualization skills	K3
CO5:	Understand the various concepts like dimensioning, conventioning and standards related to working drawings in order to become professionally efficient. Impart the knowledge for understanding and drawing of simple residential/office buildings	K4

CSE	ENGINEERING PRACTICAL – ENGLISH	0	0	2	1
-----	---------------------------------	---	---	---	---

Course Objectives

- To enable the student to explore the knowledge in communication skills.
- To gain knowledge in the process of Placement Interviews, Group Discussions and other recruitment procedures.

List of Experiments

40

1. Introduction to English sounds
2. Consonants and vowels
3. Syllable and Stress
4. Intonation
5. Communication Skills
6. Summarizing
7. Report Writing
8. Information Transfer
9. Presentation Skills
10. Group Discussion
11. Letter Writing
12. Cover letter and Resume

Text Books:

1. Department of English, Anna University, Mindscapes, 'English for Technologists and Engineers', Orient Longman Pvt. Ltd, Chennai: 2012.
2. M.AshrafRizvi, "Effective Technical Communication", Tata McGraw-Hill Publishing Company Limited, New Delhi.2009.

Reference Books:

3. Practical English Usage. Michael Swan. OUP. 1995.
4. Communication Skills. Sanjay Kumar and PushpLata. Oxford University Press. 2011.
5. Exercises in Spoken English. Parts. I-III. CIEFL, Hyderabad. Oxford University Press

Weblinks:

- <https://online.rice.edu/courses/communication-skills-for-engineers-specialization>

Course Outcome

CO1 Distinguish various listening & written contexts for understanding the implied meanings and responding to them accordingly.

CO2 Use appropriate pronunciation and rhythm of spoken language in oral communication.

CO3 Draft and interpret the written communication in official contexts like narrative, descriptive, creative, critical and analytical reports.

CO4 Infer implied meanings of different genres of texts and critically analyze and evaluate them for ideas, as well as for method of oral presentation.

CO5 Make use of suitable communicative strategies to express their point of views convincingly in any type of discussions, negotiation and conversations.

CSE	PHYSICS LABORATORY	0	0	2	1
------------	---------------------------	----------	----------	----------	----------

Course Objectives

- To enable the student to explore the field of Mechanics of Solids and Properties of Matter.
- To gain knowledge in the scientific methods and learn the process of measuring different Physical variables.

Experiments

1. Determination of Rigidity Modulus – Torsional pendulum
2. Determination of wavelength and particle size using laser
3. Ultrasonic Interferometer
4. Determination of band gap of a semiconductor material
5. Hooke's law – Determination of spring constant
6. Determination of Young's Modulus – Uniform Bending
7. Determination of Young's Modulus – Non Uniform Bending
8. Determination of Viscosity of a liquid - Poiseuille's method
9. Spectrometer – Grating
10. Deflection Magnetometer - Tan A position
11. Deflection Magnetometer - Tan B position
12. Potentiometer - Calibration of low range Voltmeter

2. <https://vlab.amrita.edu/index.php?sub=1&brch=280&sim=1509&cnt=4>

COURSE OUTCOMES

At the end of this course the students will be able to,

CO1: Measure the wavelength and particle size of semiconductor diode laser.

CO2: Analyze the coefficient of viscosity of a liquid.

CO3: Estimate the band gap energy of given semiconductor material.

CO4: Determine the compressibility of the liquid using ultrasonic interferometer.

CO5: Measure the Young's modulus of the given solid materials.

CSE	Basic Electrical and Electronics Engineering Laboratory	0	0	2	1
------------	--	----------	----------	----------	----------

Course Objectives

- To provide comprehensive idea about AC and D C circuit analysis, working principles and applications of basic machines in electrical engineering.
- To expose the students to learn experimental skills about Transformers, DC Motor, Converters.

LIST OF EXPERIMENTS

1. Basic safety precautions. Introduction and use of measuring instruments – voltmeter, ammeter, multi-meter, oscilloscope. Real-life resistors, capacitors and inductors.
2. Sinusoidal steady state response of R-L, and R-C circuits – impedance calculation and verification.
3. Loading of a transformer: measurement of primary and secondary voltages and currents, and power
4. Three-phase transformers: Star and Delta connections. Voltage and Current relationships (line-line voltage, phase-to-neutral voltage, line and phase currents).
5. Load Characteristics of a DC Motor
6. Torque - Slip Characteristic of an Induction motor
7. Three phase induction motors – Direction reversal by change of phase-sequence of connections.
8. Demonstration of DC-DC Converter.
9. Demonstration of DC-AC converter.
10. Demonstration of AC-DC converter.

TOTAL: 30 hours

COURSE OUTCOMES

CO1:	Understand the basic safety precautions and learn to make use of measuring instruments	K2
CO2:	Analyse the steady state response of R-L, R-C circuits	K3
CO3:	Experiment with loading of transformer to measure the primary and secondary voltages, currents and power and classify the different types of transformer connections	K3
CO4:	Understand and Experiment with single phase induction motor and three phase induction motor	K2
CO5:	Demonstrate DC-DC, DC-AC and AC-DC converters	K4

CSE	CONSTITUTION OF INDIA	2 0 0 0
------------	------------------------------	----------------

COURSE OBJECTIVES:

- The purpose of the course is to acquaint the students with basic principles of the Constitution of India and its working.
- To help students be familiar with the historical and significant aspects of the constitution of India.
- To make students aware of their fundamental duties and rights.
- To know about central and state government functionalities in India.

UNIT I NATURE, OBJECT AND SCOPE OF THE CONSTITUTION 6

Nature, object and scope of Constitutional Law and Constitutionalism – Historical Perspective of the Constitution of India – Salient Features and Characteristics of Constitution of India.

UNIT II FUNDAMENTAL RIGHTS 6

Nature and scope of Fundamental Rights – Scheme of Fundamental Rights – Right to Equality – Right to Freedom of Speech and Expression – Right to Life – Right against Exploitation – Right to Religious Freedom – Minority Rights.

UNIT III DIRECTIVE PRINCIPLES OF STATE POLICY AND FUNDAMENTAL DUTIES 6

Directive Principles of State Policy – Importance and Implementation – Scheme of Fundamental Duties and its Legal Status.

UNIT IV FEDERAL STRUCTURE 6

Federal Structure – Distribution of Legislative and Financial Powers between the Union and the States – Parliamentary Form of Government in India – Constituent Powers and Status of the President of India.

UNIT V AMENDMENT AND EMERGENCY PROVISIONS 6

Amendment of the Constitution – Procedure – Historical Perspective of the Constitutional Amendments in India – Emergency Provisions – National Emergency – President Rule – Financial Emergency – Local Self Government – Constitutional Scheme in India.

TOTAL: 30 h

COURSE OUTCOME:

At the end of this course the students will be able to,

- CO1:Elaborate the constitution of India and its salient features.
- CO2:Know the fundamental rights and duties.
- CO3:Discuss the Parliamentary Form of Government in India.
- CO4:Recognize the Directive Principles of State Policy.
- CO5:Understand and abide the rules of the Indian constitution and to appreciate different culture among the people.

TEXT BOOKS:

CSE	MATHEMATICS III (Fourier Series and Transforms)	3	1	0	4
------------	--	----------	----------	----------	----------

Course Objective:

This course aims to provide the students to study Fourier Transforms and some concepts of infinite Fourier Sine and Cosine transforms, finite Fourier Sine and Cosine transforms and applications to solve some infinite and boundary value problems using finite and infinite transforms.

UNIT I FOURIER SERIES

12

Dirichlet's conditions – Fourier series – Odd and even functions – Half range sine series – Half range cosine series – Complex form of Fourier Series- Parseval's identity – Harmonic Analysis.

UNIT II FOURIER TRANSFORM

12

Fourier integral theorem (without proof) – Fourier transform pair – Fourier Sine and Cosine transforms – Properties – Transforms of simple functions – Convolution theorem – Parseval's identity.

UNIT III PARTIAL DIFFERENTIAL EQUATIONS

12

Formation of partial differential equations - singular integrals- Solutions of standard types of first order partial differential equations – Lagrange's linear equation - Linear partial differential equations of second and higher order with constant coefficients of homogeneous functions.

UNIT IV APPLICATIONS OF PARTIAL DIFFERENTIAL EQUATIONS

12

Classification PDE-Method of separation of variables – One dimensional wave equation and One dimensional heat equation of heat conduction – Steady state solution of two-dimensional heat equation of heat conduction (square plate only) .

UNIT V Z -TRANSFORM AND DIFFERENCE EQUATIONS

12

Z-transform –Introduction- properties – Inverse Z-transform (using partial fraction and residues) – Convolution theorem - Formation of difference equations – Solution of difference equations using Z- transform.

Total Hours: 60

TEXTBOOKS:

1. Grewal. B.S, "Higher Engineering Mathematics", Khanna Publications, Delhi,43rd Edition, 2013.
2. Ramana B.V, "Higher Engineering Mathematics", Tata McGraw Hill Publishing Company, New Delhi, 6th reprint,2008.
3. Sivaramakrishna Das. P & Vijayakumari. C , A Text book of Engineering Mathematics-III

REFERENCE BOOKS:

1. Bali.N.P. and Manish Goyal 'A Textbook of Engineering Mathematics', Laxmi Publications, 9th edition,2011.
2. Erwin Kreyszig, "Advanced Engineering Mathematics", Wiley India, 9th Edition, 2011.
3. Glyn James, "Advanced Modern Engineering Mathematics", Pearson Education,3rd Edition, 2012.

Course Outcome:

At the end of the course the students will be able to

CO1: Develop Fourier series for different types of functions.

CO2: Acquaint the student with Fourier Transform techniques used in wide variety of situations.

CO3: Introduce the basic concepts of Partial differential equations for solving standard Partial differential equations

CO4: Analyze the student with Fourier series techniques in solving heat flow problems used in various situations.

CO5: Understand the z-transforms and its properties

CSE	Python Programming	3	1	0	4
------------	---------------------------	----------	----------	----------	----------

Course Objectives

- To learn the basic concepts of Python
- To create a web application using Django
- To explore GUI Programming in tkinter and PyQt5

UNIT I PYTHON BASICS 9 Hours

Introduction to Python, Python Interpreter and its working, Syntax and Semantics- Data Types: Booleans - Numbers - Lists - Tuples – Set - Dictionaries - Comprehensions - Assignments and Expressions, Control Flow Statements - Functions and lambda expressions

UNIT II PYTHON : ADVANCED FEATURES 9 Hours

Iterations and Comprehensions - Handling text files - Modules, Classes and OOP - Exception Handling -- Strings and Regular Expressions

UNIT III PYTHON WEB FRAMEWORK 9 Hours

Introduction to Frameworks, Full Stack Frameworks vs Micro Frameworks, Installing Django creating an application using Django and project folder structure- URLs and views -Models –Migrating the models- Experimenting with models API - Django Template Engine-Creating an Administration Interface- Users, groups, and permissions - Object relational mapper

UNIT IV GUI PROGRAMMING - tkinter 9 Hours

Introduction to tkinter, Top Level Windows, Dialogs, Message and Entry - Event Handling, Menus, List boxes and Scrollbars, Text - SQL Database interfaces with sqlite3 : Basic operations and table load scripts

UNIT V GUI PROGRAMMING - PyQt5 9 Hours

Creating a User Interface with Qt Components – Radio button, Checkbox, List. Combo box, Scrollbars, Progress bar- Understanding dialog-Layout, Displaying tabular data using Table Widget, Database Handling

TOTAL : 45 Hours

Text Books:

CSE	OPERATING SYSTEM	3	0	0	3
------------	-------------------------	----------	----------	----------	----------

Course Objectives

- To understand the features of operating system and its role in managing various system resources.
- To learn the Structure and functions of OS, Process scheduling, Deadlocks, Device management, Memory management and File systems

UNIT I PROCESSES AND THREADS 9 hours

Introduction to operating systems – review of computer organization – operating system structures – system calls – system programs – system structure – virtual machines. Processes: Process concept – Process scheduling – Operations on processes – Cooperating processes – Inter process communication – Communication in client-server systems. Threads: Multi-threading models – Threading issues.

UNIT II PROCESS SCHEDULING AND SYNCHRONIZATION 9 hours

CPU Scheduling: Scheduling criteria – Scheduling algorithms – Multiple-processor scheduling – Real time scheduling – Algorithm Evaluation. Process Synchronization: The critical-section problem – Synchronization hardware – Semaphores – Classic problems of synchronization – critical regions – Monitors. Deadlock: System model – Deadlock characterization – Methods for handling deadlocks – Deadlock prevention – Deadlock avoidance – Deadlock detection – Recovery from deadlock.

UNIT III STORAGE MANAGEMENT 9 hours

Memory Management: Background – Swapping – Contiguous memory allocation – Paging – Segmentation – Segmentation with paging. Virtual Memory: Background – Demand paging – Process creation – Page replacement – Allocation of frames – Thrashing.

UNIT IV FILE SYSTEMS 9 hours

File-System Interface: File concept – Access methods – Directory structure – File system mounting – Protection. File System Implementation: Directory implementation – Allocation methods – Free-space management – efficiency and performance – recovery – log-structured file systems.

UNIT V I/O SYSTEMS 9 hours

I/O Systems – I/O Hardware – Application I/O interface – kernel I/O subsystem – streams – performance. Mass storage Structure: Disk scheduling – Disk management – Swap-space management – RAID – disk attachment – stable storage – tertiary storage.

TOTAL : 45 hours

Text Books:

- T1: Silbers chatz, Galvin, and Gagne, "Operating System Concepts", Sixth Edition, Wiley India Pvt Ltd, 2003
T2: Andrew S. Tanenbaum, "Modern Operating Systems", Second Edition, Pearson Education, 2004

CSE	Design and Analysis of Algorithms	3	0	2	4
------------	--	---	---	---	---

Course Objectives:

- To provide a mathematical foundation for analyzing and proving the efficiency of an algorithm.
- To understand and apply the algorithm analysis techniques.
- To critically analyze the efficiency of alternative algorithmic solutions for the same problem
- To understand different algorithm design techniques

UNIT I INTRODUCTION 12 hours

Notion of an Algorithm – Fundamentals of Algorithmic Problem Solving – Important Problem Types – Algorithm Design Techniques- Fundamentals of the Analysis of Algorithmic Efficiency – Time Space Tradeoff –Asymptotic Notations and their properties. AnalysisFramework–Empiricalanalysis–RecurrenceEquations–SolvingRecurrenceEquations–Analysisoflinearsearch.

UNIT II DIVIDE-AND-CONQUER AND GREEDY TECHNIQUE 12 hours

Divide and Conquer Methodology – Binary Search – Finding Maximum and Minimum – Closest-Pair and Convex Hull Problems – Matrix multiplication: Strassen’s algorithm, Greedy Algorithms: General Method – Container Loading – Prim’s algorithm and Kruskal’s Algorithm – 0/1 Knapsack problem – Minimum Spanning Tree (Kruskals Algorithm) – Huffman Trees.

UNIT III DYNAMIC PROGRAMMING AND BACKTRACKING 12 hours

Dynamic programming: General Method - Multi stage graphs - All Pair Shortest Paths-Optimal Binary Search- 0/1 Knapsack Problem, Travelling Salesman Problem – Floyd’s algorithm. Backtracking- State Space Tree – General and Recursive Backtracking Algorithm – Estimating the Efficiency – 8- Queens problem– Sum of Subsets – Graph Colouring – Hamiltonian Circuit Problem – Knapsack Problem.

UNIT IV GRAPH AND COMPLEXITY CLASS 12 hours

Graph Traversals – Breadth and Depth first search Traversal – Connected Components – Biconnected Components -Floyd-Warshall Algorithm. Network Flows - Flow Networks, Maximum Flows – Ford-Fulkerson Algorithm - Minimum Cost Flows – Cycle Cancelling Algorithm-The Class P, The Class NP, Reducibility and NP-completeness

UNIT V STRING MATCHNG, APPROXIMATION AND RANDOMIZED ALGORITHMS 12 hours

Naïve String-matching Algorithms, KMP algorithm, Rabin-Karp Algorithm, Approximation Algorithms - The set-covering problem – Vertex cover, K-center clustering, Randomized Algorithms - The hiring problem, Finding the global Minimum Cut

TOTAL: 60 hours

CSE	OPERATING SYSTEMS LAB	L	T	P	Credits
		0	0	2	1

Course Objective:

To practice various system calls and concepts of process management, memory management techniques.

List of Experiments:

1. Study of Linux commands.
2. Writing programs using the following system calls of UNIX operating system: fork, exec, getpid, exit, wait, close, stat, opendir, readdir
3. Writing programs using the I/O system calls of UNIX operating system (open, read, write, etc)
4. Writing C programs to simulate UNIX commands like ls, grep, etc.
5. Given the list of processes, their CPU burst times and arrival times, display/print the Gantt chart for FCFS and SJF. For each of the scheduling policies, compute and print the average waiting time and average turnaround time. (2 sessions).
6. Given the list of processes, their CPU burst times and arrival times, display/print the Gantt chart for Priority and Round robin. For each of the scheduling policies, compute and print the average waiting time and average turnaround time. (2 sessions)
7. Developing Application using Inter Process communication (using shared memory, pipes or message queues)
8. Implementation of Producer – Consumer problem using semaphores (using UNIX system calls).
9. Implementation of Deadlock avoidance using Banker's algorithm.
10. Implementation of some memory management schemes – I
11. Implementation of some memory management schemes – II
12. Implementation of any file allocation technique (Linked, Indexed or Contiguous)

Course Outcome	Description	Knowledge Level
----------------	-------------	-----------------

CO1	Implement the concept of Linux commands in Linux terminal.	K3
CO2	Develop a program using the system calls of UNIX operating system	K6
CO3	Analyze the performance of different CPU Scheduling Algorithms for the given process	K4
CO4	Develop Application using Inter Process communication.	K6
CO5	Solve Deadlock using Banker's algorithm.	K3

CSE	DATA STRUCTURES AND PYTHON LAB	0	0	2	1
------------	---------------------------------------	----------	----------	----------	----------

Course Objectives

- Understand various data representation techniques in the real world.
- Implement linear and non-linear data structures.
- Analyze various algorithms based on their time and space complexity.
- Develop real-time applications using suitable data structure.
- Identify suitable data structure to solve various computing problems

Experiments

1. Implementation of Single Linked List operations: (i) Creation (ii) insertion (iii) deletion (iv) traversal
2. Implementation of polynomial expression in memory using single linked list.
3. Implementation of Circular Linked List operations: (i) Creation (ii) insertion (iii) deletion (iv) traversal
4. Implementation of Double Linked List operations: (i) Creation (ii) insertion (iii) deletion (iv) traversal in both ways.
5. Design and implement Stack and its operations using List.
6. Implementation of stack operations:
 - a. To convert infix expression into postfix expression.
 - b. To evaluate the postfix expression.
7. Design and implement Queue and its operations using List.
8. Implementation of binary search tree operations: a. Creation of node. b. Traverse the above binary search tree recursively in pre-order, post-order and in-order. c. Count the number of nodes in the binary search tree.
9. Implementation of searching techniques:
 - Linear search b. Binary search c. Fibonacci search
10. Implementation of sorting techniques to arrange a list of integers in ascending order. a. Bubble sort b. Insertion sort c. Selection sort
11. Implementation of sorting techniques to arrange a list of integers in ascending order. a. Quick sort b. Merge sort
12. Implementation of graph traversal algorithms: a. Depth first search. b. Breadth first search.

Text Books:

COURSE OUTCOMES

At the end of this course the students will be able to,

CO1: Gain skills to design and analyze simple linear and non linear data structures.

CO2: Examine insertion, deletion and modification in singly and doubly linked list.

CO3: Construct Stack, Queue in array for which all insertions and deletions are made at both end using various operations

CO4: Apply Insertion, find and deletion operations in Binary Search Tree and Hashing functions.

CO5: Evaluate shortest path in an undirected graph using depth and breadth first algorithms

CSE	PERSONALITY DEVELOPMENT I	2	0	0	2
------------	----------------------------------	----------	----------	----------	----------

COURSE OBJECTIVES:

- To nurture and develop winning personalities and eventually leading them to become dynamic and socially responsible leaders

UNIT I SOFT SKILLS I 6

Introduction to Personality Development – Meaning–Features of personality – Dimensions of Personality Determinants of Personality–Features and Traits– Components of self concept–Barriers–Self analysis

UNIT II SOFT SKILLS II 6

Importance of Soft Skills – First impression–Work Place requirements–Discipline –Cleanliness Hygiene – general Appearance—Building Confidence—Concept of Thinking and Usage –Value of Time–Focus & Commitment.

UNIT III SOFT SKILLS IN ACTION 6

Grooming – Attire – Understanding others– Stability & Maturity Development – Strengths – Weakness – Opportunities–threats – Merits of SWOT Analysis – Components – how to convert weakness into strengths – Goal settings

UNIT IV SELF AWARENESS AND SELF ESTEEM 6

Definitions – Components of Self awareness – Developing Self awareness – Self esteem – meaning –Steps to improve self esteem.

UNIT V SELF MOTIVATION 6

Motivation – Meaning –Techniques of self motivation–Motivation & goal setting – Motivation and emotion – Motivation at work.

TOTAL: 30 h

COURSE OUTCOME:

At the end of this course the students will be able to,

TEXT BOOKS:

1. Personality Development And Soft Skills Barun K Mitra, Oxford Publication
2. Seven habits of Highly Effective people – Stephen R. Covey

REFERENCE BOOKS:

1. Emotion, motivation and Self regulation – Nathan C. Hall, McGill University, Canada Thomas Goetz, University of Konstanz, Germany <http://www.emeraldgrouppublishing.com>.
2. Psychology of Self esteem – Nathaniel Branden, Nash (1st edition), Jossey – Bass (32 nd anniversary edition)

COURSE OUTCOMES

CO1:	Discuss the features, dimensions and determinants of personality	K2
CO2:	Make a good first impression in professional and other situations	K3

CO3:	Demonstrate confidence, punctuality and commitment as an engineer	K3
CO4:	Set goals for development using SWOT analysis	K5
CO5:	Develop self-awareness and improve self esteem	K3

ASSESSMENT METHODS:

CAT 1	CAT 2	Model Exam	End Semester Exams	Assignments	Case Studies
			✓	✓	✓
Quiz	MCQ	Projects	Seminars	Demonstration/ Presentation	Open book test
✓	✓	✓	✓	✓	

CSE	BASIC LIFE SKILLS	2 0 0 0
------------	--------------------------	----------------

COURSE OBJECTIVE:

1. To provide value education to improve the students' character, understanding of principled life, physical health, maintaining youthfulness, measures and methods in five aspects of life.

UNIT I PHYSICALHEALTH 6

Manavalakalai (SKY) Yoga: Introduction - Education as a means for youth empowerment - Greatness of Education - Yoga for youth Empowerment.Simplified Physical Exercises: Hand, Leg, Breathing, Eye exercises - Kapalabathi, Makarasana Part I, Makarasana Part II, Body Massage, Acu pressure, Relaxation exercises - Benefits.Yogasanas: Pranamasana – HasthaUttanasana - PadaHasthasana – AswaSanjalana Asana – ThuvipathaasvaSanjalana asana – AstangaNamaskara - Bhujangasana–AthaMukthaSavasana – AswaSanjalana Asana - PadaHasthasana–HasthaUttanasana - Pranamasana.Pranayama: Naddisuddi - Clearance Practice - Benefits.

UNIT II LIFE FORCE 6

Reasons for Diseases - Natural reasons (Genetic / imprints, Planetary Position, Natural calamities and climatic changes) - Unnatural reasons (Food habits, Thoughts, Deeds).Philosophy of Kaya kalpa - Physical body - Sexual vital fluid - Life force -Bio-Magnetism - Mind. Maintaining youthfulness. Postponing old age - Transformation of food into seven components - Importance of sexual vital fluid Measure and method in five aspects of life - Controlling undue Passion.Kayakalpa practice - Aswini Mudra - Ojas breath - Benefits of Kaya Kalpa.

UNIT III MENTAL HEALTH 6

Mental Frequencies - Beta, Apha, Theta and Delta wave - Agna Meditation explanation - benefits. Shanthi Meditation explanation – Benefits - Thuriya Meditation explanation – Benefit.Benefits of Blessing - Self blessing (Auto suggestion) - Family blessing - Blessing the others - World blessing - Divine protection

UNIT IV VALUES 6

Human Values Self-control - Self-confidence - Honesty Contentment - Humility – ModestyTolerance - Adjustment - Sacrifice – ForgivenessPurity (Body, Dress, Environment) - Physical purity - Mental purity - Spiritual puritySocial Values:Non-violence– ServicePatriotism – EqualityRespect for parents and elders - care and protection - Respect for teacher Punctuality - Time Management.

UNIT V MORALITY (VIRTUES) 6

Importance of Introspection - I - Mine (Ego, Possessiveness).Six Evil Temperaments - Greed - Anger - Miserliness - Immoral sexual passion - Inferiority and superiority Complex – Vengeance.Maneuvering of Six Temperaments - Contentment - Tolerance - Charity - Chastity - Equality - Pardon (Forgiveness).Five essential Qualities acquired through Meditation: Perspicacity - Magnanimity - Receptivity - Adaptability – Creativity. Improved Memory Power - Success in the Examination.

TOTAL: 30 h

COURSE OUTCOME:

At the end of this course the students will be able to,

- CO1: Utilize skills developed through participation in Manavalakalai (SKY) Yoga to help maintain lifelong health and fitness.
- CO2: Demonstrate foundational standing, sitting, balance postures with proper alignment and Maintain youthfulness through kaya kalpa practice.
- CO3: Explore relaxation techniques to observe thoughts and to manage emotions and stress, and reflect on those techniques which are most effective to them.
- CO4: Demonstrate an understanding of anatomy and physiology as it applies to the intentional integration of breath, postures, and movement within the practice of yoga to understand the human values.
- CO5: Achieve a greater sense of awareness, wisdom, introspection, and a deeper sense of relaxation through meditation to keep up morality in life.

CSE	Mathematics-IV (Random Process & Queuing Theory)	3L:1T:0P	4Credits
-----	---	-----------------	-----------------

Course Objective:

- To understand and conduct computer systems modeling and performance analysis.
- To introduce the basic probability tools and concepts this is useful in modeling, such as Markov models and queuing theory.
- To provide necessary mathematical support and confidence to tackle real life problems.
- To provide the required mathematical support to develop probabilistic models which can be used in several areas of science and engineering.

UNIT I: CLASSIFICATION OF RANDOM PROCESSES 12

Definition and examples – First order – Second order – Strictly stationary – Wide-sense stationary and ergodic process – Markov process – Poisson and Normal process.

UNIT II: QUEUEING THEORY-I 12

Markovian queues – Birth and Death Queuing models- Steady state results- Single server queuing models- (M/M/1): (∞ /FIFO) Model – (M/M/1): (k /FIFO) Model - Characteristics of parameters of models.

UNIT III: QUEUEING THEORY-II 12

Multiple server queuing models- Little's Formula - queues with finite waiting rooms- Finite source models.- (M/M/C): (∞ /FIFO) Model – Characteristics of parameters of models, (M/M/C): (k /FIFO) Model – Characteristics of parameters of models.

UNIT IV: NON-MARKOVIAN QUEUES 12

Finite source models - M/G/ ∞ queues – Pollaczek -Khinchine formula - M/G/1:(∞ /GD) model as special cases.

UNIT V: QUEUEING NETWORKS 12

Queueing Networks - Classification and Basic Concepts. Open and Closed Networks of M/M/m Type Queues, Jackson's Theorem.

Total hours:60

TEXT BOOKS:

- T1: Gross. D. and Harris C.M, "Fundamentals of Queueing Theory", Wiley Student edition, 2004.
T2: Sivaramakrishna Das. P and Vijayakumari. C, "Probability & Queueing Theory", Pearson Education Asia, 6th Edition, 2013.
T3. S.Palaniammal, "Probability & Queueing Theory", Eastern Economy Edition, 2012.

REFERENCE BOOKS:

5. <https://www.youtube.com/watch?v=mbYVI-5cPUU>

COURSE OUTCOMES

At the end of this course the students will be able to,

CO1:	Demonstrate the problems on Ergodic process, Poisson process and Markov chain.	K2
CO2:	Analyzethe basic characteristic features of a queuing system and acquire skills in analyzing queuing models.	K4
CO3:	Apply M/M/C model with finite and infinite capacity.	K3
CO4:	Analyze a network of queues with Poisson external arrivals, exponential service requirements and independent routing. (Jackson networks)	K4
CO5:	Identifyvarious elements of a queuing networks and each of its description	K3

Course Outcomes:

At the end of this course the students will be able to,

Course Outcome	Description	Knowledge Level
CO1	Apply the basic features of operational concepts with its functional operations.	K3
CO2	Determine hardware blocks and control lines are used for specific instructions that execute at different operational level.	K5
CO3	Demonstrate the operation like add and multiply integers and floating-point numbers using two's complement and IEEE floating point representation for various models.	K5

CO4	Analyze clock periods, performance, and instruction throughput of single-cycle, multi-cycle, and pipelined implementations of a simple instruction set	K4
CO5	Deduct and describe the pipeline hazards and identify possible solutions to those hazards	K5

CSE	DATABASE MANAGEMENT SYSTEMS	3	0	0	3
------------	------------------------------------	----------	----------	----------	----------

Course Objectives

➤ To help the learner to understand the concepts, techniques, security features, how data is stored in the system, Query Languages used and different types of Statements used in the Query Processing in Database Management Systems.

UNIT I INTRODUCTION 9

Database system application-Purpose of database system-View of data-Database language-Relational database-Data storage and queuing-Transaction management-Database architecture-Database users and administrators-History of database system

UNIT II INTRODUCTION TO SQL 9

SQL Data Definition and its types – Specifying Constraints in SQL – Basic Retrieval Queries in SQL – INSERT, UPDATE, DELETE Statements in SQL – Aggregate Functions in SQL – GROUPING : The GROUP BY and HAVING Clause – JOIN Expressions - VIEWS - TRANSACTIONS – SUBQUERIES

UNIT III DATABASE DESIGN& PROGRAMMING TECHNIQUES 9

Functional Dependencies – First, Second, Third Normal Forms, Dependency Preservation – Boyce/Codd Normal Form–Multi-valued Dependencies and Fourth Normal Form – Join Dependencies and Fifth Normal Form– Entity relationship Model –Entity relationship Diagram and Examples

UNIT IV TRANSACTION MANAGEMENT AND DATABASE SECURITY 9

Transaction - Simple Transaction Model – Serializability- Lock based protocols-Time stamp based protocol-Deadlock handling- Two Phase Commit – Introduction to Database Security Issues – Access Control Based on Granting and Revoking Privileges – Challenges of Database Security

UNIT V DATA STORAGE AND QUERYING 9

UNIT III NETWORK LAYER 9

Logical Addressing-IPV4 Addresses - IPV6 Addresses-Inter Networking – Address Mapping – ARP, RARP,DHCP, ICMP- Delivery-Forwarding-Unicast Routing protocols- Intra Domain Routing-Inter domain Routing- Distance Vector Routing – Link State Routing – Path Routing – Multicast Routing Protocol-Subnetting – Congestion avoidance in network layer.

UNIT IV TRANSPORT LAYER 9

Duties of transport layer –Process to Process Delivery-Client Vs Server Paradigm - Multiplexing – DeMultiplexing – Sockets – User Datagram Protocol (UDP) – Transmission Control Protocol (TCP) – Flow Control – Error Control – Congestion Control – Open loop congestion control - closed loop congestion control - Quality of services (QoS)- Techniques to improve up QoS.

UNIT V APPLICATION LAYER 9

Domain Name Space (DNS) – Name Space- Domain Name Space –Distribution of Name Space –DNS in the Internet- DDNS – Electronic Mail- SMTP – POP – IMAP - FTP – HTTP - WWW – Cryptography-Symmetric Key Cryptography - Asymmetric Key Cryptography- Network Security –Security Services- Digital Signatures- IPsec-PGP.

CSE	Introduction to AI and ML	3	0	2	4
------------	----------------------------------	----------	----------	----------	----------

Course Objectives

- To understand the basics of Machine Learning (ML)
- Able to program in Python ML Packages
- To understand the methods of Machine Learning
- To visualize a dataset

UNIT I INTRODUCTION TO ARTIFICIAL INTELLIGENCE 12 hours

Introduction – Foundations of AI – History of AI – Intelligent agent – Types of agents- Structure of agents – Problem solving agents –Uninformed search strategies – Breadth first search – Uniform cost search – Depth first search – Depth limited search –Bidirectional search – Searching with partial Information.

UNIT II INTRODUCTION TO MACHINE LEARNING 12 hours

Machine learning: Types of Machine Learning - Understanding data – Continuous variable, categorical variable, Independent variable, dependent variable -Regression and classification- linear regression introduction- Over fitting and Underfitting - Bias and Variance -Machine Learning Life cycle -- Data Preprocessing techniques – Feature selection

UNIT III MACHINE LEARNING ALGORITHMS 12 hours

Classification and Regression- Naïve bayes- Decision trees- support vector machine (SVM) – Random forest- Linear Regression- Multiple Linear Regression-Logistic Regression. -K-nearest neighbor - Unsupervised learning - k-means clustering- Principal component analysis

UNIT IV MODEL EVALUATION 12 hours

Model Evaluation and Selection methods, Precision-Recall and ROC Curves Confusion Matrices, Regression Evaluation, Optimizing Classifiers for Different Evaluation Metrics

UNIT V MACHINE LEARNING USING PYTHON 12 hours

Scikit- learn Dataset - Understanding Dataframe-slicing a dataframe-managing data -Data Loading with NumPy and pandas- creating training and test sets - Implementation of Machine learning algorithms - predictions - implementation of metrics for validating machine learning algorithms - Scaling and normalization- Data visualization

TOTAL : --60 hours

CSE	DATABASE MANAGEMENT LAB	0	0	3	1
------------	--------------------------------	----------	----------	----------	----------

Course Objective:

To understand the various database management system concepts by working on databases.

Experiments:

1. DDL and DML Commands.
2. Join Queries.
3. Views and Set operations.
4. Built in functions.
5. Nested Queries
6. Triggers.
7. Aggregate Functions.
8. Roles and Privileges.
9. Cursors.
10. PL/SQL programs
11. PL/SQL cursor programs
12. Front end tools – Mini Project

COURSE OUTCOMES

CO1:	Identify the need of DML and DDL commands and Nested queries	K3
CO2:	Examine and compare various types of Joins and Set operators and write SQL queries	K4
CO3:	Design and develop Views, Triggers and Cursors using SQL	K6
CO4:	Test and solve various aggregate functions and built in functions using SQL	K6
CO5:	Discuss Roles and Privileges and develop a mini project using front end tool using SQL	K6

CSE	COMPUTER NETWORKS LAB	0	0	2	1
------------	------------------------------	----------	----------	----------	----------

Course Objective:

To help the learner to understand the underlying concepts of networked systems and to be able to develop networking programs using Java.

Experiments:

1. Programs using TCP Sockets (like date and time server & client, echo server & client, etc..)
2. Programs using UDP Sockets (like simple DNS)
3. Programs using Raw sockets (like packet capturing and filtering)
4. Programs using RPC
5. Simulation of sliding window protocols
6. Experiments using simulators (like OPNET)
7. Performance comparison of MAC protocols
8. Implementing Routing Protocols
9. Performance comparison of Routing protocols
10. Implementation of Logical and Physical Address
11. Simulation of ARP/RARP Protocol
12. Study of UDP and TCP performance

TOTAL: 30 h

Text Book:

T1. Behrouz A. Forouzan, "Data communication and Networking", Fourth Edition, Tata McGraw-Hill, 2006.

Reference Books:

- R1. Nader F. Mir, "Computer and Communication Networks", Pearson Education, 2007
R2. Comer, "Computer Networks and Internets with Internet Applications", Fourth Edition, Pearson Education, 2003.
R3. Andrew S. Tanenbaum, "Computer Networks", Fourth Edition, 2003. William Stallings, "Data and Computer Communication", Sixth Edition, Pearson Education, 2000

COURSE OUTCOMES

At the end of this course the students will be able to,

Course Outcome	Description	Knowledge Level
CO1	Experiment with TCP, UDP and Raw socket programming	K3
CO2	Construct an application model for RPC	K6

CO3	Model the simulation of sliding window protocol and ARP/RARP	K3
CO4	Identify the Performance comparison of MAC protocols, Routing protocol	K3
CO5	Compose the implementation of Logical and Physical Address	K6

MAPPING OF COURSE OUTCOMES TO PROGRAM OUTCOMES

CSE	ENVIRONMENTAL SCIENCE AND ENGINEERING	3	0	0	3
------------	--	---	---	---	---

Course Objectives

- At the end of this course the student is expected to understand what constitutes the environment, what are precious resources in the environment, how to conserve these resources, what is the role of a human being in maintaining a clean environment and useful environment for the future
- To provide understanding of component of environment, their function, quality, issues related to environment, effect of quality degradation on human beings and their solutions

UNIT I ENVIRONMENT, ECOSYSTEMS AND BIODIVERSITY

9

Definition – Scope and importance – Need for public awareness – Concepts of an Ecosystem – Structure and Function of an Ecosystem – Producers, Consumers and Decomposers – Energy Flow in the Ecosystem – Ecological Succession – Food Chains, Food Webs and Ecological Pyramids – Introduction, Types, Characteristic Features, Structure and Function of the (A) Forest Ecosystem (B) Grassland Ecosystem (C) Desert Ecosystem (D) Aquatic Ecosystems (Ponds, Streams, Lakes, Rivers, Oceans, Estuaries) – Introduction to Biodiversity – Definition: Genetic, Species and Ecosystem Diversity – Bio-geographical Classification of India – Value of Biodiversity: Consumptive Use, Productive Use, Social, Ethical, Aesthetic and Option Values – Biodiversity at Global, National and Local Levels – India as a Mega-Diversity Nation – Hot-Spots of Biodiversity – Threats to Biodiversity: Habitat Loss, Poaching of Wildlife, Man-Wildlife Conflicts – endangered and Endemic Species of India – Conservation of Biodiversity: In-Situ and Ex-Situ conservation of Biodiversity. Field Study of Common Plants, Insects and Birds.
Field study of simple ecosystems - pond, river, hill slopes, etc.

UNIT II ENVIRONMENTAL POLLUTION

9

Definition – Causes, Effects and Control Measures of (A) Air Pollution (B) Water Pollution (C) Soil Pollution (D) Marine Pollution (E) Noise Pollution (F) Thermal Pollution (G) Nuclear Hazards – Solid Waste Management:- Causes, Effects and Control Measures of municipal solid Wastes – Role of an Individual in Prevention of Pollution – Pollution Case Studies – disaster Management - Floods, Earthquake, Cyclone and Landslides. Field study of local polluted site – Urban / Rural / Industrial / Agricultural.

UNIT III NATURAL RESOURCES

9

Forest resources -Use and over – Exploitation – Deforestation – Case studies – Timber extraction – Mining – Dams and their ground water – Floods – Drought – Conflicts over water – Dams – Benefits and Problems – Mineral Resources- Use and Exploitation, Environmental Effects of Extracting and Using Mineral Resources, Case Studies – Food Resources: World Food Problems, Changes caused by Agriculture and Overgrazing, Effects of Modern Agriculture, Fertilizer- Pesticide Problems, Water Logging, salinity, Case Studies – Energy Resources:- Growing Energy Needs, Renewable and Non Renewable Energy Sources, Use of Alternate Energy Sources, Case Studies – Land Resources - Land as a Resource, Land Degradation, Man Induced Landslides, Soil Erosion and Desertification – Role of an Individual in Conservation of Natural Resources – Equitable use of Resources for Sustainable Lifestyles.
Field study of local area to document environmental assets – river / forest / grassland / hill / mountain.

UNIT IV SOCIAL ISSUES AND THE ENVIRONMENT

9

From Unsustainable To Sustainable Development – Urban Problems Related to energy – Water conservation, Rain Water Harvesting, Watershed Management – Resettlement and Rehabilitation of People, its Problems and Concerns, Case Studies Role of non – governmental organization - Environmental

Ethics- Issues and Possible Solutions – Climate Change, Global Warming, Acid Rain, Ozone Layer Depletion, Nuclear Accidents and Holocaust, Case Studies –Wasteland Reclamation – Consumerism and Waste Products – Environment Protection Act – Air (Prevention and Control of Pollution) Act – Water (Prevention and Control of Pollution) Act – Wildlife Protection Act – Forest Conservation Act – enforcement machinery involved in environmental Legislation – Central and state pollution control boards - Public Awareness.

UNIT V HUMAN POPULATION AND THE ENVIRONMENT

9

Population Growth, Variation among Nations – Population Explosion Family Welfare Programme – environment and Human Health – Human Rights –Value Education – HIV /AIDS – Women and Child Welfare – Role of Information Technology in Environment and Human Health – Case Studies.

TOTAL: 45 HOURS

Text Books:

1. Gilbert M.Masters, 'Introduction to Environmental Engineering and Science', 2nd edition, Pearson Education (2004).
2. Benny Joseph, 'Environmental Science and Engineering', Tata McGraw- Hill, New Delhi, (2006).

Reference Books

1. R.K. Trivedi, 'Handbook of Environmental Laws, Rules, Guidelines, Compliances and Standards', Vol.I and II, Enviro Media.
2. Cunningham, W.P. Cooper, T.H. Gorhani, 'Environmental Encyclopedia', Jaico Publ., House, Mumbai, 2001.
3. Dharmendra S. Sengar, 'Environmental law', Prentice hall of India PVT LTD, New Delhi, 2007.
4. Rajagopalan, R, 'Environmental Studies-From Crisis to Cure', Oxford University Press (2005)

3. <http://eagri.org/eagri50/ENVS302/pdf/lec14.pdf>
4. https://onlinecourses.nptel.ac.in/noc19_ge22/preview

COURSE OUTCOMES

At the end of this course the students will be able to,

CO 1: Understand the core concepts, methods of ecological and physical sciences, their application in environmental problem-solving.

CO 2: Apply system concepts and methodologies to analyse, understand the interactions between social and environmental processes.

CO 3: Apply the ethical, cross-cultural, and historical context of environmental issues and the link between human and natural systems.

CO 4: Develop the understanding based on the observations and illustration, drawn from the experiences of physical, biological, social and cultural aspects of life, rather than abstractions.

CO 5: Reflect critically about their roles and identities as citizens, consumers and environmental actors in a complex, interconnected world.

CSE	GENDER INSTITUTION AND SOCIETY	2	0	0	0
------------	---------------------------------------	---	---	---	---

Course Objective:

The course helps the student to understand concepts of social justice and gender justice. It provides the student with the knowledge of various institutions functioning worldwide which aim to eradicate discrimination against women. The course further aids students in understanding feminism and gender in relation to the society and to study the basic constitutional remedies available to women.

UNIT – I

Social Justice and Gender Justice – Theories relating to Social Justice – Theories relating to Gender Justice – Interrelationship between Gender justice and Social Justice

UNIT – II

International Conventions for protection of Women – Convention on the Elimination of All Forms of Discrimination Against Women (CEDAW) – National Commission for women – Constitutional remedies available for women under Indian Constitution.

UNIT – III

United Nations Entity for Gender Equality and the Empowerment of Women (UN Women) - Association for Women’s Rights in Development (AWID) –Women kind worldwide – Centre for reproductive rights - Women’s Environment and Development Organization (WEDO) - Global Fund for Women

UNIT – IV

International Center for Research on Women (ICRW) - European Institute for Gender Equality (EIGE) – Promundo - International Alliance of Women (IAW) - International Women’s Development Agency (IWDA).

UNIT – V

World Health organisation – Sex and Gender – Feminism – Theories relating to Feminism – Gender and society

TEXT BOOKS

1. Law relating to Women and children, Mamta Rao
2. Gender, Politics and Institutions: Towards a Feminist Institutionalism, by Mona Lena krook and Fiano Mackay,2010
3. Gender Justice and Feminist Jurisprudence, Dr.Sheetal Kanwal,2015
4. Narain’s Gender and society, P.Jain

REFERENCE BOOKS

1. Gender Justice and feminist Jurisprudence by Dr.Ishitha Chatterjee
2. Gender and Institutions, Moira Gatens and Alison Mackkinon

SUGGESTED READINGS:

1. Women and Gender : Society and Community , Siddhartha Sarkar

COURSE OUTCOMES:

After the completion of this Course, the student would be able to:

- CO 1: Understand the Concept of Social Justice and Gender Justice.
- CO 2: Learning the International Conventions and constitutional remedies available for women.
- CO 3: Identify the various gender Institutions and its functions for the development of women.
- CO 4: Assessing the International agencies.
- CO 5: Summarising the study on feminism and relation of gender and society.

CSE	Java and Web Programming	3	0	0	3
------------	---------------------------------	----------	----------	----------	----------

Course Objectives

- Will gain knowledge in the basic concepts of Data Analysis
- To acquire skills in data preparatory and preprocessing steps
- To understand the mathematical skills in statistics
- To learn the tools and packages in Python for data science
- To gain understanding in classification and Regression Model
- To acquire knowledge in data interpretation and visualization techniques

UNIT I JAVA INTRODUCTION

9 Hours

Review of object oriented programming - Objects and classes in Java – Defining classes – Methods - Access specifiers – static members – static fields - static methods - static variables – constructors - Default constructor - parameterized constructor – finalize method – Arrays – Strings – Packages – user defined packages – Java Doc comments

UNIT II OBJECT-ORIENTED PROGRAMMING IN JAVA

9 Hours

Inheritance – class hierarchy – polymorphism - Runtime polymorphism - compile time polymorphisms– Encapsulation - static and dynamic binding – final keyword – abstract classes – the Object class: Method of object class – java Reflection – interfaces – Properties of interfaces – object cloning – inner classes – use of inner classes – proxies-Design Patterns in Java

UNIT III HTML,CSS CLIENT SIDE SCRIPTING

9 Hours

Understanding Internet - Understanding websites and web servers - HTML - – forms – frames – tables – web page design – CSS - Java Script: An introduction to JavaScript–JavaScript DOM Model-Date and Objects,-Regular Expressions- JavaScript Events - Event Handling and Validation -Exception Handling-

UNIT IV SERVER SIDE PROGRAMMING

9 Hours

Understanding Java Server Pages-JSP Standard Tag Library(JSTL)-Creating HTML forms by embedding JSP code- Servlets: Java Servlet Architecture- Servlet Life Cycle- Form GET and POST actions- Session Handling- Understanding Cookies- Installing and Configuring Apache Tomcat Web Server;- DATABASE CONNECTIVITY: JDBC perspectives, JDBC program example – JSP:.

UNIT V Web Applications development with Rest APIs

9 Hours

Rest API development with spring boot, Spring boot project with STS/MAVEN, Controller and Rest Controller annotations, RequestBody, ResponseBody annotations, Error handling with spring boot

TOTAL : 45 Hours

Text Books:

T3: Herbert Schildt, "Java The complete reference", 8th Edition, McGraw Hill Education, 2011.

T4: Jeffrey C. Jackson, "Web Technologies--A Computer Science Perspective", Pearson Education, 2006.

Reference Books:

R3: Paul Deitel, Harvey Deitel, "Java SE 8 for programmers", 3rd Edition, Pearson, 2015.

R4: Cay S. Horstmann, Gary cornell, "Core Java Volume –I Fundamentals", 9th Edition,

Web Links:

1. https://onlinecourses.nptel.ac.in/noc22_cs47/preview

COURSE OUTCOMES

CO1:	Develop Java programs using OOP principles	K2
CO2:	Develop Java programs with the concepts inheritance and interfaces	K4
CO3:	Design simple web pages using markup languages like HTML and XHTML.	K3
CO4:	Program server side web pages that have to process request from client side web pages.	K4
CO5:	Understand various web services and how these web services interact..	K1

CSE	COMPUTER GRAPHICS AND MULTIMEDIA	3	1	0	4
-----	----------------------------------	---	---	---	---

Course Objectives:

- To comprehend the fundamental concepts of graphics and multimedia.
- To gain and apply the acquired knowledge pertaining to 2D and 3D concepts in graphics programming.
- To understand the basic 3D modeling and rendering techniques.
- To realize the importance of multimedia towards building the virtual environment and communication.

UNIT I ILLUMINATION AND COLOR MODELS

12

Light sources - basic illumination models – halftone patterns and dithering techniques; Properties of light - Standard primaries and chromaticity diagram; Intuitive colour concepts - RGB colour model - YIQ colour model - CMY colour model - HSV colour model - HLS colour model; Colour selection. Output primitives – points and lines, line drawing algorithms, loading the frame buffer, line function; circle and ellipse generating algorithms; Pixel addressing and object geometry, filled area primitives.

UNIT II TWO-DIMENSIONAL GRAPHICS

12

Two dimensional geometric transformations – Matrix representations and homogeneous coordinates, composite transformations; Two dimensional viewing – viewing pipeline, viewing coordinate reference frame; window-to-viewport coordinate transformation, Two dimensional viewing functions; clipping operations – point, line, and polygon clipping algorithms.

UNIT III THREE-DIMENSIONAL GRAPHICS

12

Three dimensional concepts; Three dimensional object representations – Polygon surfaces- Polygon tables- Plane equations - Polygon meshes; Curved Lines and surfaces, Quadratic surfaces; Blobby objects; Spline representations – Bezier curves and surfaces -B-Spline curves and surfaces. TRANSFORMATION AND VIEWING: Three dimensional geometric and modeling transformations – Translation, Rotation, Scaling, composite transformations; Three dimensional viewing – viewing pipeline, viewing coordinates, Projections, Clipping; Visible surface detection methods.

UNIT IV MULTIMEDIA SYSTEM DESIGN & MULTIMEDIA FILE HANDLING

12

Multimedia basics – Multimedia applications – Multimedia system architecture – Evolving technologies for multimedia – Defining objects for multimedia systems – Multimedia data interface standards – Multimedia databases. Compression and decompression – Data and file format standards – Multimedia I/O technologies – Digital voice and audio – Video image and animation – Full motion video – Storage and retrieval technologies.

UNIT V HYPERMEDIA- CASE STUDIES

12

Multimedia authoring and user interface - Hypermedia messaging -Mobile messaging – Hypermedia message component – Creating hypermedia message – Integrated multimedia message standards – Integrated document management – Distributed multimedia systems.CASE STUDY: BLENDER GRAPHICS Blender Fundamentals – Drawing Basic Shapes – Modelling – Shading & Textures

TEXT BOOKS:

Course Outcomes

CO 1: Design two-dimensional graphics.

CO 2: Apply two dimensional transformations.

CO 3: Apply three dimensional transformations and clipping techniques to graphics

CO 4: Understood Different types of Multimedia File Format

CO 5: Design Basic 3d Scenes using Blender

CSE	FUNDAMENTALS OF BLOCKCHAIN & USE CASES	3	0	0	3
------------	---	---	---	---	---

Course Objectives

- To understand a broad overview of the essential concepts of blockchain technology
- To familiarize students with Bitcoin protocol followed by the Ethereum protocol – to lay the foundation necessary for developing applications and programming
- To learn about different types of blockchain and consensus algorithms

UNIT I Basics of Blockchain 9

The Double-Spend Problem, Byzantine Generals' Computing Problems, Public-Key Cryptography, Hashing, Distributed Systems, Distributed Consensus. Technology Stack: Blockchain, Protocol, Currency

UNIT II Bitcoin Blockchain and Ethereum Blockchain 9

Bitcoin Blockchain: Structure, Operations, Features, Consensus Model, Incentive Model.

Ethereum Blockchain: Smart Contracts, Ethereum Structure, Operations, Consensus Model, Incentive Model.

UNIT III Tiers of Blockchain Technology 9

Blockchain 1.0, Blockchain 2.0, Blockchain 3.0, Types of Blockchain: Public Blockchain, Private Blockchain, Semi-Private Blockchain, Sidechains.

UNIT IV Types of Consensus Algorithms 9

Proof of Stake, Proof of Work, Delegated Proof of Stake, Proof Elapsed Time, Deposite-Based Consensus, Proof of Importance, Federated Consensus or Federated Byzantine Consensus, Practical Byzantine Fault Tolerance. Blockchain Use Case: Supply Chain Management.

UNIT V Blockchain Use Cases 9

Industry applications of Blockchain-Blockchain in Government-Government use cases-Preventing Cybercrime through block chain-Block Chain in defense, Financial Services Related Use Cases, Revolutionization of Global Trade, Healthcare Related Services, Blockchain and IOT, Blockchain and AI.

TOTAL : -- 45 hours

Text Books:

T1: Mastering Blockchain: Deeper insights into decentralization, cryptography, Bitcoin, and popular Blockchain frameworks by Imran Bashir, Packt Publishing (2017).

T2: Mastering Bitcoin: Unlocking Digital Cryptocurrencies, by Andreas Antonopoulos O'Reilly, First Edition, 2014

Reference Books:

- R1: Kirankalyan Kulkarni, Essentials of Bitcoin and Blockchain, Packt Publishing.
 R2: Tiana Laurence, Blockchain for Dummies, 2nd Edition 2019, John Wiley & Sons.
 R3: Blockchain: Blueprint for a New Economy by Melanie Swan, Shroff Publisher O'Reilly Publisher Media; 1st edition (2015).

CSE	JAVA AND WEB PROGRAMMING LAB	0	0	2	1
------------	-------------------------------------	---	---	---	---

Course Objectives

- To be familiar with Web page design using HTML/XML and style sheets
- To learn to create dynamic web pages using server side scripting.
- To be exposed to creating applications with AJAX
- To be familiar in API development with Spring boot

Experiments:

1. Create a web page with HTML elements
2. Create a web page validating with Form Controls using DHTML
3. Create a web page with all types of Cascading style sheets.
4. Programs in Java using Servlets
5. Invoke servlets from HTML forms.
6. Three-tier applications using servlets, JSP and Databases.
7. Webservices -Consider a case where we have two web Services- an airline service and a travel agent and the travel agent is searching for an airline. Implement this scenario using Web Services and Data base.
8. Get API development with Spring boot
9. Post API development -saving the data in database
10. Updating data in database with Put API
11. Response code 200, 400, 500 with spring boot

TOTAL : 30 hours

COURSE OUTCOMES

CO1:	Design simple web pages using markup languages like HTML and XHTML.	K4
CO2:	Create dynamic web pages using DHTML and java script that is easy to navigate and use.	K6
CO3:	Program server side web pages that have to process request from client side web pages.	K6
CO4:	Represent web data using XML and develop web pages using JSP.	K4
CO5:	Create Webservices for client server applications	K6

CSE	Computer Graphics and Multimedia Lab	0	0	2	1
------------	---	----------	----------	----------	----------

Course Objectives

- To make the students understand graphics concepts and develop, design and implement two- and three-dimensional graphical structures using OpenGL.
- To understand multimedia compression techniques and applications of multimedia.

Experiments:

1. Study of Fundamental Graphics Functions.
2. Implementation of Line drawing algorithms: DDA Algorithm, Bresenham's Algorithm
3. Implementation of Circle drawing algorithms: Bresenham's Algorithm, Mid-Point Algorithm.
4. Programs on 2D and 3D transformations
5. Write a program to implement Cohen Sutherland line clipping algorithm
6. Write a program to draw Bezier curve.
7. Using Flash/Maya perform different operations (rotation, scaling move etc..) on objects
8. To perform animation using any Animation software (Create Frame by Frame Animations using multimedia authoring tools)
9. To perform basic operations on image using any image editing software

TOTAL : --30 hours

COURSE OUTCOMES

CO1	Explain line drawing using programming language.	K1
CO2	Explain 2D and 3D transformations	K3
CO3	Demonstrate simple 2D animations using animation software.	K4
CO4	Prepare simple scenes using image editing software.	K1
CO5	Explain the linking between web and multimedia.	K5

CSE	.NET ENVIRONMENT	3	0	0	3
------------	-------------------------	----------	----------	----------	----------

Course Objectives

To assist the learner to understand the .NET Architecture, Object oriented concepts, to use ADO.NET for database connectivity and developing the ability to solve any type of problems by mapping with real world environment using ASP.NET and C#.

- Construct various applications using C# in .Net framework
- Familiar about Object Oriented concepts in C# language
- Demonstrate how to retrieve data from database using ADO.NET programming
- Create web based and windows based applications using ASP.NET
- Make the developer experience consistent across widely varying types of apps, such as Windows based apps and Web-based apps.

UNIT I **INTRODUCTION TO C#** **9**
Introducing C# - Introduction to .Net framework and Architecture - Understanding .NET-Overview of C#- Literals Variables-Constant Variables – Scope of Variables – Boxing and Unboxing - Data Types- Operators- Expressions Branching- Looping- Methods- Arrays- Strings- Structures- Enumerations.

UNIT II **OBJECT ORIENTED ASPECTS OF C#** **9**
Classes-Adding Variables – Adding Methods - Objects – Accessing class Members – Constructors – Abstract classes and Methods - Inheritance - Polymorphism – Interfaces - Operator Overloading - Delegates and Events - Errors and Exceptions.

UNIT III **ADO.NET** **9**
ADO.NET Introduction - ADO.NET Architecture : Connected and Disconnected Architecture – Data Provider Connection Object, Command Object, Data Reader - Datasets : Data Table , Data Column , Data Row , Data Constraints , Data Relation , Data Adapters

UNIT IV **WEB BASED APPLICATION DEVELOPMENT ON .NET** **9**
Building Windows Forms Applications -Programming Web Applications with Web Forms using ASP.NET - ASP.NET controls - Understand Data Binding and various Data Sources in ASP.NET - Understand the creation of Master Pages and themes - Configuration of web applications using IIS configurations - State management in ASP.NET Programming Web Services.

UNIT V **MVC FRAMEWORK** **9**
MVC basics , MVC Architecture, Web forms vs MVC, Create a controller , Create models ,Create a view ,Add a service class ,Use dependency injection ,Finish the controller ,Update the layout

TOTAL:45 h

COURSE OUTCOMES

At the end of this course the students will be able to,

- CO1: Construct various applications using C# in .Net framework 1
- CO2: Familiar about Object Oriented concepts in C# language 5
- CO3: Demonstrate how to retrieve data from database using ADO.NET programming 3
- CO4: Develop ASP.NET based web application using C# 2
- CO5: Develop desktop based, modern web based applications using Model View Controller. 2

CSE	THEORY OF COMPUTATION AND COMPILER DESIGN	3	0	0	3
------------	--	---	---	---	---

Course Objectives

- Provides the required theoretical foundation for a computational model and compiler design
- Discuss Turing machines as an abstract computational model
- Compiler algorithms focus more on low-level system aspects..

UNIT I INTRODUCTION TO LANGUAGES AND GRAMMAR 12hours

Overview of a computational model - Languages and grammars – alphabets – Strings – Operations on languages, Introduction to Compilers - Analysis of the Source Program - Phases of a Compiler – Finite automata– DFA – NFA – Equivalence of NFA and DFA (With Proof) – Regular expressions – Conversion between RE and FA (With Proof) Lexical Analysis - Recognition of Tokens - Designing a Lexical Analyzer using finite automata.

UNIT II CFG, PDAS AND TURING MACHINES 12hours

CFG – Chomsky Normal Forms - NPDA – DPDA - Membership algorithm for CFG. Syntax Analysis - Top-Down Parsing - Bottom-Up Parsing - Operator-Precedence Parsing - LR Parsers - Turing Machines – Recursive and recursively enumerable languages – Linear bounded automata - Chomsky's hierarchy – Halting problem.

UNIT III INTERMEDIATE CODE GENERATION 12hours

Intermediate Code Generation - Intermediate Languages – Declarations - Assignment Statements - Boolean Expressions - Case Statements – Backpatching - Procedure Calls.

UNIT IV CODE OPTIMIZATION 12 hours

Code Optimization - Basic Blocks and Flow Graphs – The DAG Representation of Basic Blocks - The Principal Sources of Optimization - Optimization of Basic Blocks - Loops in Flow Graphs - Peephole Optimization - Introduction to Global Data-Flow Analysis

UNIT V CODE GENERATION AND RUN TIME ENVIRONMENTS 12 hours

Code Generation – Issues in the Design of a Code Generator - The Target Machine - Run-Time Storage Management - Next-Use Information - Register Allocation and Assignment - A Simple Code Generator - Generating Code from DAG - Runtime Environments – Source Language issues – Storage Organization – Activation Records- Storage Allocation strategies – Static Allocation – Stack Allocation – Heap Allocation - Access to non-local names – Parameter Passing.

TOTAL : -- 60 hours

Text Books:

1. Introduction to Automata Theory, Languages, and Computation (3rd Edition), John E Hopcroft, Rajeev Motwani, Jeffery D. Ullman, Pearson education, 2013.
2. Principles of Compiler Design, Alfred V. Aho and Jeffery D. Ullman, Addison Wesley,2006

Reference Books:

1. Introduction to Languages and the Theory of Computation, John Martin, McGraw-Hill Higher Education,2010
2. Modern Compiler Implementation in Java, 2nd ed., Andrew W. AppelCambrdige University Press, 2012

COURSE OUTCOMES

Course Outcome	Description	Knowledge Level
CO1	Analysis to visualize languages and finite state machines and their equivalence.	K4
CO2	Illustrate the translation of regular expression into parse tree using syntax analyzer	K2
CO3	Construct the intermediate representation considering with the type systems	K6
CO4	Learn to implement code optimization techniques	K4
CO5	Design a sample code generator.	K5

Course Code	Compiler Design lab	0	0	2	1
--------------------	----------------------------	---	---	---	---

Course Objectives

- To be familiar with Lexical Analyzer using Lex tool & parser using YACC Tool.
- To learn to create front end of the compiler by means of generating Intermediate codes.
- To be familiar in code optimization techniques.

List of Experiments:

1. Implementation of Symbol Table.
2. Implementation of Lexical Analyzer using Lex Tool
3. Develop a Lexical Analyzer to Recognize a few patterns In C
4. Generate Yacc Specification for a few syntactic categories.
 - a) Program to recognize a valid variable which starts with a letter followed by any number of letters or digits.
 - b) Program to recognize a valid variable which starts with a letter followed by any number of letter or digits.
5. Implementation of calculator using Lex And Yacc
6. Implementation of Type Checking
7. Convert the BNF rules Into YACC Form and Write code to Generate Abstract Syntax Tree Using and YACC.
8. Implement Control Flow Analysis and Data Flow Analysis
9. Implement any one Storage Allocation Strategies (Heap,Stack,Static)
10. Construction of DAG
11. Implementation of Simple Code Optimization Techniques

TOTAL : --30 hours

COURSE OUTCOMES

CO1:	Design a compiler for a simple programming language	K4
-------------	---	-----------

CO2:	Apply the knowledge of Lex tool & Yacc tool to develop a scanner & parser.	K6
CO3:	Implement Optimization techniques and generate machine level code	K6
CO4:	Understand the importance of code optimization	K4
CO5:	Develop program for implementing symbol table.	K6

MAPPING OF COURSE OUTCOMES TO PROGRAM OUTCOMES

CSE	.NET ENVIRONMENT LABORATORY	L	T	P	Credits
		0	0	2	1

LIST OF EXPERIMENTS

1. Implement C# program

- a) Write a program in C# to count a total number of alphabets, digits and special characters in a string.
- b) Write a program in C# to count a total number of duplicate elements in an array.
- c) Design program to implement Stack in c#.

2. Basic C# program

- (a) Calculate Hypotenuse of triangle using dynamic initialization of variables
- (b) To get input from the user and perform calculations
- (c) Calculate the quadrant for the coordinates using if..else...ladder
- (d) Check whether the alphabet is a vowel or not using switch..case...
- (e) To understand about for..each loop and strings

3. Create a login page using controls.

4. Create a registration page with all controls.

5. Establish database connection using ado.net

6. Create a page with control values fetching from database

7. Create a master page for college application.

8. Apply themes and different CSS in a form.

9. Create a crud application

10. Create a web application with MVC framework

Text Books:

Course Objectives

- Will gain knowledge in the basic concepts of Javascript
- To acquire skills in frontend using Angular
- To understand the concepts in NodeJS
- To implement using ExpressJS
- Create a web application with database

UNIT I Javascript - Introduction **9**
H
o
ur
s

Purpose, architecture & debugging basics - Primitives & Non Primitives -Equality, Operators-Logic and Control Structures - Objects and Functions -Call, Apply and Bind - Callbacks & Promises - DOM handling - Error Handling - Array, String, Math, Date functions – Ajax -Browser storage techniques, webworkers

UNIT II Angular Concepts **9**
H
o
ur
s

Angular App-component, Custom components, ngFor, ngIf, ngClass, ngStyle, ngSwitch, Pipes, HTTP client, Get Requests, Post requests

UNIT III **Node JS** **9**
H
o
ur
s

Process Model - Callbacks & Events – Modules -Rest APIs-CLI application-Web sockets -File & Stream operations-Promises-Important Node libraries-NPM framework

UNIT IV **Ex** **9**
pr **H**
es **o**

Rest APIs & Routing - Writing middlewares - Cookies & Session - Authentication and authorization
- Error routing-JWT-Mongoose - MongoDB ORM-Sequelize - SQL ORM

UNIT V MongoDB

9
H
o
ur
s

Installation & setup - Mongo queries and CRUD - Aggregation framework - Replication & Sharding concepts

TOTAL : 45 Hours

LIST OF ALL PROFESSIONAL ELECTIVE COURSES

CSE	APPLIED CRYPTOGRAPHY	3	0	0	3
------------	-----------------------------	----------	----------	----------	----------

Course Objective:

- To understand the mathematical background for cryptography .
- To understand the taxonomy of cryptography primitives
- To understand the Symmetric key encryption system, public key encryption system
- To implement cryptographic algorithms

UNIT I - INTRODUCTION

9

Cryptography goals – Taxonomy of cryptography primitives – Background on functions – Basic terminology – Definition and examples – Block ciphers, stream cipher, substitution ciphers, transposition ciphers – Composition of ciphers – Digital signature – Construction of digital signature – Public key cryptography – Hash functions – Protocol and mechanism – Key establishment and management – Pseudo random numbers – Classes of attack.

UNIT II - NUMBER THEORY

9

Probability theory – Information theory – Complexity theory – Number theory – Abstract algebra – Finite fields – Primality test – Prime number generation – Irreducible polynomial.

UNIT III - RANDOM GENERATORS

9

Pseudo random bits and sequences – Random bit generation – Pseudorandom bit generation – statistical tests – Stream Cipher.

UNIT IV - ENCRYPTION ALGORITHMS

9

Block cipher – DES – FEAL – IDEA – SAFAR – Public key encryption – RSA – Rabin – Elgamal – Mc Eliece – Knapsack.

UNIT V - HASH ALGORITHMS

9

Hash function and data integrity – Classification and framework – Basic constructions and general results – Unkeyed hash functions – Keyed hash functions – data integrity and message authentication – Advanced attacks and hash function.

TOTAL: 45 h

TEXT BOOK :

1. A.Menezes, P.Van Oorschot and S. Vanstone, “Hand book of Applied Cryptography” CRC Press, Fifth Printing, 2001.

REFERENCEBOOKS :

1. Charlie Kaufman, Radia Perlman, Mike Speciner, “ Network Security, Private communication in public world” PHI 2nd edition 2002.
2. Bruce Schneier, Neils Ferguson, “Practical Cryptography”, Wiley Dreamtech India Pvt Ltd, 2003
3. Douglas R Simson “Cryptography – Theory and practice”, CRC Press 1995. 3. Stallings, “Cry ptography& Network Security”, Pearson Education, 4th Edition 2006.

Course Outcome	Description	Knowledge Level
----------------	-------------	-----------------

CO1	Understand the basics of cryptographic algorithms and protocols	K3
CO2	Analyze the concept of Public key cryptography, Hash functions, Key establishment and management	K4
CO3	Acquire knowledge on encryption algorithms such as Block cipher, DES, FEAL, IDEA and SAFAR	K3
CO4	Evaluate the performance of Hash function, data integrity and message authentication	K5
CO5	Assess existing applications of cryptography and develop new protocols and applications that employ cryptography.	K6

CSE	Big Data Programming	3	0	0	3
-----	----------------------	---	---	---	---

Course Objectives

- To explore the fundamental concepts of big data analytics, Hadoop, R programming and HiveQL
- To learn big data analytics using R Programming

UNIT I Introduction to Big Data 9

Introduction to Big Data Platform – Challenges of Conventional Systems - Nature of Data- Evolution Of Analytic Scalability - Intelligent data analysis- Analytic Processes and Tools - Analysis vs. Reporting - Modern Data Analytic Tools - Statistical Concepts: Sampling Distributions - Re-Sampling - Statistical Inference - Prediction Error

UNIT II Hadoop 9

History of Hadoop- The Hadoop Distributed File System – Components of Hadoop-Analyzing the Data with Hadoop Scaling Out- Hadoop Streaming- Design of HDFS-Java interfaces to HDFS Basics- Developing a Map Reduce Application-How Map Reduce Works-Anatomy of a Map Reduce Job run-Failures-Job Scheduling-Shuffle and Sort – Task execution - Map Reduce Types and Formats- Map Reduce Features

UNIT III HiveQL 9

Introduction to HiveQL- Databases in Hive-HiveQL: Queries- SELECT ... FROM Clauses , Specify Columns with Regular Expressions , Computing with Column Values , Arithmetic Operators, Using Functions- Mathematical functions, Aggregate functions, Table generating functions, Other built-in functions ,LIMIT Clause ,Nested SELECT Statements, CASE ... WHEN ... THEN Statements, WHERE Clauses, Predicate Operators, LIKE and RLIKE, GROUP BY Clauses , HAVING Clauses ,JOIN Statements -Inner JOIN ,LEFT OUTER JOIN,RIGHT OUTER JOIN, FULL OUTER JOIN, Cartesian Product JOINS , Map-side Joins, ORDER BY and SORT BY, DISTRIBUTE BY with SORT BY , CLUSTER BY

UNIT IV Big Data Analytics Using R Programming 9

Analyzing, Visualization and Exploring the Data, Statistics for Model Building and Evaluation, Introduction to R and RStudio, Basic analysis in R, Intermediate R, Intermediate analysis in R, Advanced Analytics - K-means clustering, Association rules-Speedup, Linear Regression, Logistic Regression, Naïve Bayes, Decision Trees, Time Series Analysis, Text Analysis

UNIT V Frameworks 9

Applications on Big Data Using Pig and Hive – Data processing operators in Pig – Hive services – fundamentals of HBase and ZooKeeper - IBM InfoSphere BigInsights and Streams. Visualizations - Visual data analysis techniques, interaction techniques; Systems and applications

TOTAL : -- 45 hours

COURSE OUTCOMES

CO1:	Identify the purpose and need of big data programming and compare it with conventional systems.	K3
CO2:	Examine and compare various Components of Hadoop and develop a Map Reduce application.	K4
CO3:	Develop Hive queries using HiveQL interface.	K3
CO4:	Discuss various statistics modeling techniques and its evaluation using R and other clustering methods.	K6
CO5:	Discuss various big data frameworks, Applications on Big Data Using Pig, fundamentals HBASE, Zookeeper, IBM Info Sphere Big Insights and also test Visual data analysis techniques	K6

CSE	Bioinformatics	3	0	0	3
------------	-----------------------	---	---	---	---

Course Objectives

- To study the scope of Bioinformatics, types of Databases and their uses, Tools and Algorithms
- To learn the Pair wise Sequence Alignment methods

UNIT I Bioinformatics: An Introduction 9

Introduction-Historical Overview and Definition- Bioinformatics Applications - Major Databases in Bioinformatics- Data Management and Analysis- Molecular Biology and Bioinformatics- Central Dogma of Molecular Biology

UNIT II Databases 9

Introduction- Characteristics of Bioinformatics Databases- Categories of Bioinformatics Databases- Navigating databases- Sequence Databases-Nucleotide sequence database- secondary Nucleotide sequence database – protein sequence databases- structure databases- Structure file formats- Protein Structure Database Collaboration- PDB- CATH –SCOP- Other databases- Enzyme Databases- MEROPS- Pathway Databases:CAZy

UNIT III Tools 9

Introduction- Need for Tools- Knowledge Discovery- Data- Mining Tools- Data Submission tools- Nucleotide Sequence Submission and Protein Submission tools- Data Analysis tools- Prediction Tools- Phylogenetic trees and Phylogenetic Analysis- Modelling Tools

UNIT IV Algorithms 9

Introduction- Classification of Algorithms- Biological Algorithms- Implementing Algorithms- Biological Algorithms- Bioinformatics Tasks and Corresponding Algorithms- Data Analysis Algorithms- Sequence Comparison Algorithms – Substitution Matrices Algorithms –Sequence Alignment Optimal Algorithms- Prediction Algorithms- Phylogenetic prediction Algorithm – Protein Structure Prediction

UNIT V Genome Analysis and Sequence Alignment 9

Introduction- Genome Analysis- Genome mapping- The Sequence Assembly Problem- Genome Sequencing- Biological Motivation of Alignment Problems Methods of Sequence Alignments- Using Scoring matrices- Measuring Sequence Detection Efficiency- Working with FASTA and BLAST

COURSE OUTCOMES

CO1:	Comprehend the data management and analysis of Bio Informatics	K3
CO2:	Understand the Structure Database Collaboration like PDB, CATH, SCOP	K3
CO3:	Analyze the various Tools for data mining, submission and prediction	K4
CO4:	Implement the Classification of Algorithms and prediction of protein structure	K6
CO5:	Measure sequence detection efficiency in bioinformatics	K5

OCSE01	CLOUD COMPUTING	3	0	0	3
---------------	------------------------	----------	----------	----------	----------

Course Objectives

- To understand the concept of cloud and utility computing.
- To understand the various issues in cloud computing.
- To familiarize with the types of virtualization and the lead players in cloud.

UNIT I INTRODUCTION, PRINCIPLES AND ARCHITECTURE 9

Cloud Computing : Vision, reference model, characteristics and challenges – historical development – building cloud computing environment – computing platforms and Technologies – Parallel Vs distributed computing – Elements of parallel and distributed computing – Technologies for distributed computing. Cloud Computing Architecture: Cloud reference model - NIST Cloud Computing Reference Architecture – types of Clouds - economics – open challenges.

UNIT II VIRTUALIZATION 9

Characteristics of virtualized environments - Taxonomy of virtualization techniques - Execution virtualization -Machine reference model - Hardware-level virtualization – Hypervisors - Hardware virtualization techniques -Operating system-level virtualization - Programming 210 language-level virtualization - Application-level virtualization - Other types - Virtualization and cloud computing - Pros and cons of virtualization - Technology examples - Xen: Paravirtualization - VMware: full virtualization - Full virtualization and binary translation - Microsoft Hyper-V.

UNIT III CLOUD INFRASTRUCTURE 9

Cloud Computing and Services Model – Public, Private and Hybrid Clouds – Cloud Eco System - IaaS - PaaS – SaaS. Architectural Design of Compute and Storage Clouds – Layered Cloud Architecture Development – Design Challenges - Inter Cloud Resource Management – Resource Provisioning and Platform Deployment – Global Exchange of Cloud Resources. Case Study: Amazon Web Service reference, GoGrid, Rackspace

UNIT IV CLOUD PROGRAMMING AND SOFTWARE ENVIRONMENT 9

Cloud capabilities and platform features – data features and databases - Parallel and Distributed Programming Paradigms – MapReduce , Twister and Iterative MapReduce – Hadoop Library from Apache – Dryad and DryadLINQ – sawzall and Pig Latin - Mapping Applications - Programming Support of Google App Engine - Amazon AWS –Microsoft Azure - Cloud Software Environments -Eucalyptus, Open Nebula, OpenStack. Case Study: Amazon Web Service reference, GoGrid, Rackspace.

UNIT V CLOUD PLATFORMS AND APPLICATION 9

Amazon web services - Compute services - Storage services - Communication services - Google AppEngine - Architecture and core concepts – Cloud Security and Trust management. Application life cycle - Cost model – Observations - Microsoft Azure - SQL Azure – Scientific Applications –Business and Consumer Application – Energy efficiency in clouds - Market-based management of clouds - Federated clouds/InterCloud - Third-party cloud services.

10. <https://www.w3schools.in/cloud-computing>.

COURSE OUTCOMES

CO1:	Understand the broad perspective of cloud architecture, key technologies, principles, strengths, limitations as well as the possible applications of the state-of-art of cloud computing.	K2, K3
CO2:	Gain a basic knowledge of virtualization and its categorization and Design & develop highly scalable cloud-based applications by creating and configuring virtual machines.	K3, K6
CO3:	Compare, contrast, and evaluate the key trade-offs between multiple approaches to cloud system design, and Identify appropriate design choices when solving real - world cloud computing problems.	K4

CO4:	Interpret some important cloud computing driven commercial systems such as: Google Apps, Microsoft Azure and Amazon Web Services and other businesses cloud applications.	K5
CO5:	Build and deploy cloud application using popular cloud platforms.	K6

OCSE01	CRYPTOGRAPHY AND NETWORK SECURITY	3	0	0	3
---------------	--	----------	----------	----------	----------

Course Objectives

- To understand the fundamental principles, algorithms of cryptographic techniques and expose them to various scenarios of cyber crime with an introduction to cyber law along with a thrust on security on the internet
- To develop an understanding of information assurance as practiced in computer operating systems, distributed systems, networks and representative applications.

UNIT I INTRODUCTION 9 hours

OSI Security Architecture - Classical Encryption techniques – Cipher Principles – Data Encryption Standard – The strength of DES - Block Cipher Design Principles and Modes of Operation - Evaluation criteria for AES – AES Cipher – Multiple Encryption and Triple DES – Placement of Encryption Function – Traffic Confidentiality – Key distribution – Random Number Generation

UNIT II PUBLIC KEY CRYPTOGRAPHY 9 hours

Key Management - Diffie- Hellman key Exchange – Elliptic Curve Arithmetic - Elliptic Curve Cryptography - Introduction to Number Theory – Confidentiality using Symmetric Encryption – Public Key Cryptography/RSA

UNIT III AUTHENTICATION AND HASH FUNCTION 9 hours

Authentication requirements – Authentication functions – Message Authentication Codes – Hash Functions – Security of Hash Functions and MACs – MD5 message Digest algorithm - Secure Hash Algorithm – RIPEMD – HMAC Digital Signatures – CMAC Digital Signatures - Digital Signatures - Authentication Protocols – Digital Signature Standard.

UNIT IV NETWORK SECURITY 9 hours

Authentication Applications: Kerberos – X.509 Authentication Service – Electronic Mail Security: Pretty good privacy, S/MIME – IP Security – Web Security: Web security considerations, Secure socket layer and Transport layer Security – Authentication Header – Encapsulating Security Payload – Combining Security Associations – Key Management.

UNIT V SYSTEM LEVEL SECURITY 9 hours

Intruders: Intrusion detection – password management – Malicious software: Viruses and related Threats, Virus Counter measures, Distributed Denial of Service Attacks – Firewalls: Firewall Design Principles, Trusted Systems, Common Criteria for Information Technology Security Evaluation – Internet standards and internet security.

TOTAL : 45 hours

Text Books:

T1 William Stallings, "Cryptography and Network Security – Principles and Practices", Prentice Hall of India, Third Edition, 2003.

T2 Atul Kahate, "Cryptography and Network Security", Tata McGraw-Hill, 2013

Reference Books:

R1 Bruce Schneier, "Applied Cryptography", John Wiley & Sons Inc, 2001.

R2 Charles B. Pfleeger, Shari Lawrence Pfleeger, "Security in Computing", Third Edition, Pearson education

Web Links:

2. https://onlinecourses.nptel.ac.in/noc21_cs16/preview

COURSE OUTCOMES

C01:	Understand OSI security architecture and the design principles of Block cipher	K3
C02:	Acquire knowledge on block cipher modes of operation	K3
C03:	Describe key management in public key cryptography	K5
C04:	Implement the Hash Functions and Authentication Protocols	K6
C05:	Analyze the Electronic Mail Security and IP Security	K4

CSE	CYBER FORENSICS	3	0	0	3
------------	------------------------	----------	----------	----------	----------

Course Objective:

- To understand the fundamentals of Computer Forensics and computing Investigations.
- To recognize the legal underpinnings and critical laws affecting forensics
- To apply the tools and methods to uncover hidden information in digital systems.
- To learn about current licensing and certification requirements to build the career in digital forensic.

UNIT I INTRODUCTION 9

The Scope of Computer Forensics - Windows Operating and File Systems –Handling Computer Hardware – Anatomy of Digital Investigation.

UNIT II INVESTIGATIVE SMART PRACTICES 9

Forensics Investigative Smart Practices – Time and Forensics – Incident closure

UNIT III LAWS AND PRIVACY CONCERNS 9

Laws Affecting Forensic Investigations – Search Warrants and Subpoenas – Legislated Privacy Concerns – The admissibility of Evidence – First Response and Digital Investigator

UNIT IV DATA ACQUISITION AND REPORT WRITING 9

Data Acquisition – Finding Lost Files – Document Analysis – Case Management and Report Writing – Building a Forensics Workstation

UNIT V TOOLS AND CASE STUDIES 9

Tools of the Digital Investigator - Licensing and Certification – Case Studies: E-mail Forensics – Web Forensics – Searching the Network – Excavating a Cloud – Mobile device Forensics.

TOTAL: 45 h

TEXT BOOKS:

1. Michael Graves, —Digital Archaeology: The Art and Science of Digital Forensics, Addison-Wesley Professional, 2014.
2. Darren R. Hayes, —Practical Guide to Computer Forensics Investigation, Pearson, 2015.
3. Albert J. Marcella and Frederic Guillosoy, —Cyber Forensics: From Data to Digital Evidence —, Wiley, 2015.

<https://nptel.ac.in/courses/106106129>

<https://www.techtarget.com/searchsecurity/definition/computer-forensics>

COURSE OUTCOMES:

At the end of this course the students will be able to,

Course Outcome	Description	Knowledge Level
CO1	Acquire knowledge on Forensic Investigative smart practices.	K3
CO2	Analyze the importance and need for smart practices in computer investigation.	K4
CO3	Analyze the ethical standards of the profession and apply those standards to all aspects of the study and practice of digital forensics.	K4
CO4	Evaluate the effectiveness of available digital forensics tools and use them in a way that optimizes the efficiency and quality of digital forensics investigations.	K5
CO5	Describe web and mobile device forensics.	K6

CSE	DATA WAREHOUSING AND DATA MINING	3	0	0	3
-----	---	---	---	---	---

Course Objective:

- ✓ To introduce the concept of data warehousing with special emphasis on architecture and design.
- ✓ To introduce the concept of data mining with a detail coverage of basic tasks, metrics, issues, and implication.
- ✓ To learn the core topics like classification, clustering and association rules.

UNIT I DATA WAREHOUSING

9

Data warehousing Components: Data Warehouse Database, Sourcing, Acquisition, Cleanup and Transformation Tool, Data Warehouse Administration and Management, **Information Delivery System** – Building a Data warehouse – Mapping the Data Warehouse to a Multiprocessor Architecture – DBMS Schemas for Decision Support – Data Extraction, Cleanup, and Transformation Tools – Metadata.

UNIT II BUSINESS ANALYSIS

9

Reporting and Query tools and Applications – Tool Categories – The Need for Applications – Cognos Impromptu Online Analytical Processing (OLAP) – Need – Multidimensional Data Model – OLAP Guidelines – Multidimensional versus Multirelational OLAP – Categories of Tools – OLAP Tools and the Internet -Data Cube Technology, From Data warehousing to Data Mining.

UNIT III DATA MINING

9

Introduction – Data – Types of Data – Data Mining Functionalities – Interestingness of Patterns – Classification of Data Mining Systems- comparison of classification and prediction methods – Data Mining Task Primitives – Integration of a Data Mining System with a Data Warehouse – Issues – Data Preprocessing-, Mining Descriptive

Statistical Measures in Large Databases.

UNIT IV ASSOCIATION RULE MINING AND CLASSIFICATION

9

Mining Frequent Patterns, Associations and Correlations – Mining Methods – Mining various Kinds of Association Rules – Correlation Analysis – Constraint Based Association Mining – Classification and Prediction - Basic Concepts - Decision Tree Induction - Bayesian Classification – Rule Based Classification – Classification By Backpropagation – Support Vector Machines – Associative Classification – Lazy Learners – Other Classification

Methods – Prediction

UNIT V CLUSTERING, APPLICATIONS AND TRENDS IN DATA MINING

9

Cluster Analysis - Types of Data – Categorization of Major Clustering Methods – K-means– Partitioning Methods–Hierarchical Methods - Density-Based Methods–Grid Based Methods– Model-Based Clustering Methods–Clustering High Dimensional Data- Constraint – Based Cluster Analysis – Outlier Analysis – Data Mining Applications.- Case Study.

OCSE01	E COMMERCE	3	0	0	3
---------------	-------------------	---	---	---	---

Course Objectives

- To understand the nature of e-Commerce and recognize the business impact and potential of e-Commerce
- To learn the technologies required to make e-Commerce viable.
- To know about the current drivers and inhibitors facing the business world in adopting and using e-Commerce

UNIT I Introduction 9

Traditional commerce and Ecommerce - Categories of Electronic commerce – Business models – Revenue models – Business processes. Internet and WWW–role of WWW–value chains–strategic business – Revenue Strategy issues – Industry value chains - supply chain management–role of Ecommerce

UNIT II Infrastructure for E-Commerce 9

Packet switched networks–Routing packets. TCP/IP protocol script: IP Addressing – Domain names – E-mail protocols. Internet utility programs–SGML,HTML and XML–web client and servers–Web client/server architecture– intranet and extranets – Public and private networks – Virtual private network

UNIT III Web Based Tools for E-Commerce 9

Web server: Server computers –performance evaluation – Hardware architectures. Web server software feature sets–web server software and tools– Internet Utility programs – Data analysis software – Link checking utilities. web protocol–search engines–intelligent agents –EC software– webhosting–cost analysis

CSE	ETHICAL HACKING	3	0	0	3
------------	------------------------	---	---	---	---

Course Objectives

- To understand how intruders escalate privileges.
- To understand Intrusion Detection, Policy Creation, Social Engineering, Buffer Overflows and different types of Attacks and their protection mechanisms
- To learn about ethical laws and tests

UNIT I Ethical Hacking

9 hours

Types of Data Stolen From the Organizations, Elements of Information Security, Authenticity and Non-Repudiation, Security Challenges, Effects of Hacking, Hacker – Types of Hacker, Ethical Hacker, Hacktivism - Role of Security and Penetration Tester, Penetration Testing Methodology, Networking & Computer Attacks – Malicious Software (Malware), Protection Against Malware, Intruder Attacks on Networks and Computers, Addressing Physical Security – Key Loggers and Back Doors

UNIT II Foot Printing and Social Engineering

9 hours

Web Tools for Foot Printing, Conducting Competitive Intelligence, Google Hacking, Scanning, Enumeration, Trojans & Backdoors, Virus & Worms, Proxy & Packet Filtering, Denial of Service, Sniffer, Social Engineering – shoulder surfing, Dumpster Diving, Piggybacking

UNIT III Data Security**9 hours**

Physical Security – Attacks and Protection, Steganography – Methods, Attacks and Measures, Cryptography – Methods and Types of Attacks, Wireless Hacking, Windows Hacking, Linux Hacking

UNIT IV Network Protection System & Hacking Web Servers**9 hours**

Routers, Firewall & Honeypots, IDS & IPS, Web Filtering, Vulnerability, Penetration Testing, Session Hijacking, Web Server, SQL Injection, Cross Site Scripting, Exploit Writing, Buffer Overflow, Reverse Engineering, Email Hacking, Incident Handling & Response, Bluetooth Hacking, Mobiles Phone Hacking

UNIT V Ethical Hacking Laws and Tests**9 hours**

An introduction to the particular legal, professional and ethical issues likely to face the domain of ethical hacking, ethical responsibilities, professional integrity and making appropriate use of the tools and techniques associated with ethical hacking – Social Engineering, Host Reconnaissance, Session Hijacking, Hacking - Web Server, Database, Password Cracking, Network and Wireless, Trojan, Backdoor, UNIX, LINUX, Microsoft, NOVEL Server, Buffer Overflow, Denial of Service Attack, Methodical Penetration Testing

TOTAL : 45 hours**TEXT BOOKS:**

T1: Michael T. Simpson, Kent Backman, James E. “Corley, Hands-On Ethical Hacking and Network Defense”, Second Edition, CENGAGE Learning, 2010.

CSE	GAME PROGRAMMING	3	0	0	3
------------	-------------------------	---	---	---	---

Course Objectives

- To provide an in-depth introduction to technologies and techniques currently used in the game industry
- To understand game design and development
- To understand the processes, mechanics, issues in game design, and game engine development
- To understand modeling, techniques, handling situations, and logic
- To build and then integrate technologies such as multimedia, artificial intelligence, and physics modeling into a cohesive, interactive game application.

UNIT I Introduction to Game Programming & Game engine architecture

9

Overview of game programming -Structure of a typical game team - game industry - game engine history
 -Real Time Game Architecture - Engine Support: Subsystem Start-Up and Shut-Down - Memory Management - Containers and Strings - Resource Management: File System, Resource Manager.

UNIT II Basics of 2D & 3D Graphics and Mathematics in Gaming & Rendering engine

9

2D Graphics: Sprites, Tiled Images and Backgrounds - 3D Graphics: 3D Graphics Pipeline, 3D Math, Coordinates and Coordinate Systems - Quaternion Mathematics - Transformations & Geometry - The Rendering Engine: Triangle Rasterization, The Rendering Pipeline

UNIT III Lighting and Texturing Effects in game environment

9

Ray Tracing - Lighting in Computer Graphics - Types of Light Sources - Light Models - Materials: Lambert Diffuse, Phong - Bump Mapping - Lighting Technique: Point Lights, Bloom - Shadows in Games: Real-Time Versus Preprocessed Shadows, Types of Shadows, Texture mapping techniques - Special Effects: Blurring, Particle Systems, Weapon Effects

UNIT IV Introduction to Artificial Intelligence in Game

9

Why Games for Artificial Intelligence - Why Artificial Intelligence for Games - Game AI Panorama: Methods (Computer) Perspective, End User (Human) Perspective, Player-Game Interaction Perspective.

UNIT V Solving search problems for Game move prediction and optimization using AI 9

Tree Search: Uninformed Search, Best-First Search, Minimax, Monte Carlo Tree Search - Evolutionary Algorithms - Supervised Learning: Artificial Neural Networks, Support Vector Machines.

TOTAL:45 h

COURSE OUTCOMES

At the end of this course the students will be able to,

CO1: Understand the basics of Game Programming and Game Engine Architecture. 2

CO2: Develop 2D and 3D Images using Mathematical coordinates 4

CO3: Apply various Lighting and Texturing Effects in game environment. 3

CO4: Extend the Game Programming using Artificial Intelligence. 2

CO5: Solve search problems for Game move prediction and optimization using AI. 6

CSE	INFORMATION RETRIEVAL TECHNIQUES	3	0	0	3
------------	---	----------	----------	----------	----------

COURSE OBJECTIVES

1. To understand the basics of information retrieval with pertinence to modeling
2. To understand various components of IR system
3. To understand machine learning techniques for text classification and clustering
4. To explore various IR applications.

UNIT I INTRODUCTION AND MODELING 9

Basic Concepts: Retrieval process – Architecture – Boolean retrieval; IR Models: Taxonomy and characterization of IR models – Classical IR models – Alternative algebraic models – Models for Browsing – Retrieval Evaluation: Performance evaluation.

UNIT II INDEXING AND QUERYING 9

Indexing: Inverted indices – Suffix trees – Suffix arrays – Compression; Querying: Query languages; Query Operations: Relevance feedback and query expansion – Automatic local and global analysis.

UNIT III SEARCHING 9

Searching: Sequential searching – Pattern matching; Searching the Web: Characterizing the Web – Search engines – Browsing – Searching using hyperlinks.

UNIT IV CLASSIFICATION AND CLUSTERING 9

Text Classification: Naive Bayes; Vector Space Classification: Rocchio – k-Nearest Neighbour; Flat Clustering: K-Means – Model-based clustering – Hierarchical clustering – Matrix decompositions and latent semantic indexing.

UNIT V APPLICATIONS 9

XML Retrieval – Multimedia IR – Parallel and Distributed IR – Digital Libraries – Social Media Retrieval – Content-based Image Retrieval – Online Public Access Catalogs (OPACs).

Total Periods: 45

COURSE OUTCOMES

After the completion of this course, students will be able to:

1. Describe various IR modeling techniques (K3)

2. Identify and design the various components of an Information Retrieval system (K3)
3. Apply machine learning techniques to text classification and clustering for efficient Information Retrieval (K3)
4. Describe various IR applications (K2)
5. Apply IR evaluation metrics to measure the performance of IR systems (K3).

CSE	Internet of Things	3	0	0	3
------------	---------------------------	----------	----------	----------	----------

COURSE OBJECTIVES:

- To understand the basics of IoT and its application sectors
- To understand M2M and IoT
- To understand and become proficient in IoT platforms
- To understand and apply IoT protocols appropriately
- To design and develop IoT based applications

UNIT I INTRODUCTION AND CONCEPTS OF IOT

9 hours

Introduction to IOT, definition and characteristics of IOT - Architecture of Internet of Things, Physical and logical design of IOT, IOT enabling technologies, IOT levels and deployment templates-Domain specific IOTs, home automation, cities, environment, Domain specific IOTs, Energy, retail, agriculture, industry, health and lifestyle

UNIT II IOT AND M2M COMMUNICATION

9 hours

M2M, difference between IOT and M2M, ETSI M2M Architecture, system architecture -ETSI M2M SCL resource structure, Security in ETSI M2M framework, SDN and NFV for IOT, IOT system management, need for IOT system management -SNMP, Network operator requirements, NETCONF-YANG, IOT system management with NETCONF-YANG, IoT Design methodology-case study on IOT system for Weather Monitoring

UNIT III IOT PLATFORMS

9 hours

Introduction to Hardware used for IoT: Microcontrollers, Microprocessors, SoC, Sensors -Introduction to Arduino, Pi, Spark, Intel Galileo

UNIT IV IOT TECHNICAL STANDARDS AND PROTOCOLS

9 hours

RF Protocols: RFID, NFC; IEEE 802.15.4: ZigBee, Z-WAVE, THREAD; Bluetooth Low Energy (BLE), IPv6 for Low Power and Lossy Networks (6LoWPAN) and Routing Protocol for Low power and lossy networks (RPL) -CoAP, XMPP, Web Socket, AMQP, MQTT, WebRTC, PuSH -Architectural Considerations in Smart Object Networking

UNIT V DEVELOPING INTERNET OF THINGS

9 hours

IoT platforms design methodology, IoT Physical devices and endpoints -IoT Systems: Logical design using Python, IoT physical servers and cloud offerings (Cloud computing for IoT)

TOTAL: 45 hours

OCSE01	OBJECT ORIENTED ANALYSIS AND DESIGN	3	0	0	3
---------------	--	----------	----------	----------	----------

Course Objective:

- To understand the system modelling and design based on requirements, converting design to code.
- To use various UML design diagrams and to apply the appropriate design patterns.
- To learn the basic Object oriented analysis and design skills through an elaborate case study.
- To apply the process of OOAD in software development.

Introduction to OOAD – What is OOAD? – What is UML? An Overview of Object Oriented Systems Development - Object Basics – Object Oriented Systems Development Life Cycle: The Software Development Process – Building High-Quality Software – OOSD: A Use-Case Driven Approach - Use case Modeling - Relating Use cases: include, extend and generalization.

UNIT II OBJECT ORIENTED METHODOLOGIES

9

Rumbaugh Methodology - Booch Methodology - Jacobson Methodology - Patterns – Frameworks – Unified Approach – Unified Modeling Language: Static and dynamic model – UML diagrams - UML class diagram – Use case diagram UML dynamic modeling (Sequence diagram, Collaboration Diagram, State Diagram) - Activity Diagram – Implementation diagrams (Component diagram, Deployment diagram).

UNIT III OBJECT ORIENTED ANALYSIS

9

Identifying use cases : Business object analysis – The unified approach- Business process modeling – Use case model – Developing effective documentation - Object Analysis Classification : Classifications theory – Approaches for identifying classes – Noun phrase approach – Common class patterns approach – Use case driven approach – Classes, responsibilities and collaborators – Naming classes - Identifying Object relationships, Attributes and Methods: Associations – Super sub class relationship – A part of relationships (aggregation) – Class responsibility – Object responsibility.

UNIT IV OBJECT ORIENTED DESIGN

9

Design Axioms: The object oriented design process – Design axioms – Corollaries – Design patterns – Designing Classes: The process - Class visibility – Refining attributes – Designing methods and protocols. Access Layer: Object Storage and Object Interoperability: DBMS – Distributed databases and client server computing – Object relational systems – Multidatabase systems – Designing Access layer classes.

UNIT V SOFTWARE QUALITY AND USABILITY

9

View Layer : Designing Interface Objects : Designing view layer classes – Macro level , Micro level process – Purpose of a view layer interface – Prototyping the user interface- Software Quality Assurance: Quality Assurance Tests – Testing strategies – Impact of Object Orientation – Test Cases – Test Plan – Myer’s Debugging Principles – System Usability and Measuring User Satisfaction : Usability Testing – User Satisfaction Test (Test Templates) – Mapping design to code.

TOTAL: 45 h

TEXT BOOKS:

1. Ali Bahrami, “Object Oriented Systems Development”, Tata McGraw-Hill, 1999.
2. Craig Larman, "Applying UML and Patterns: An Introduction to object-oriented Analysis and Design and iterated development", Third Edition, Pearson Education, 2005.

REFERENCE BOOKS:

1. Mike O’Docherty, “Object-Oriented Analysis & Design: Understanding System Development with UML 2.0”, John Wiley & Sons, 2005.

2. James W- Cooper, Addison-Wesley, “Java Design Patterns – A Tutorial”, 2000.

COURSE OUTCOMES

CO1 Construct the Software Development Process. K6

CO2 Analyze object oriented design methodologies. K5

CO3 Use Attributes and Methods in use case driven approach K3

CO4 Design Object relational and Multidatabase systems. K6

CO5 Be Familiar with the test Cases, test Plan and Myer’s Debugging Principles K3

CSE	SOFTWARE ENGINEERING	3	0	0	3
------------	-----------------------------	----------	----------	----------	----------

Course Objective:

- To understand the phases in a software project
- To understand the fundamental concepts of requirements engineering and Analysis Modeling.
- To understand the various software design methodologies

- To learn various testing and maintenance measures

UNIT I SOFTWARE PROCESS AND AGILE DEVELOPMENT 9

Introduction to Software Engineering, Software Process, Perspective and Specialized Process Models – Introduction to Agility-Agile process-Extreme programming-XP Process.

UNIT II REQUIREMENTS ANALYSIS AND SPECIFICATION 9

Software Requirements: Functional and Non-Functional, User requirements, System requirements, Software Requirements Document – Requirement Engineering Process: Feasibility Studies, Requirements elicitation and analysis, requirements validation, requirements management-Classical analysis: Structured system Analysis, PetriNets- Data Dictionary.

UNIT III SOFTWARE DESIGN 9

Design process – Design Concepts-Design Model– Design Heuristic – Architectural Design -Architectural styles, Architectural Design, Architectural Mapping using Data Flow- User Interface Design: Interface analysis, Interface Design –Component level Design: Designing Class based components, traditional Components.

UNIT IV TESTING AND MAINTENANCE 9

Software testing fundamentals-Internal and external views of Testing-white box testing – basis path testing-control structure testing-black box testing- Regression Testing – Unit Testing – Integration Testing – Validation Testing – System Testing And Debugging –Software Implementation Techniques: Coding practices-Refactoring-Maintenance and Reengineering-BPR model-Reengineering process model-Reverse and Forward Engineering.

UNIT V PROJECT MANAGEMENT 9

Software Project Management: Estimation – LOC, FP Based Estimation, Make/Buy Decision COCOMO I & II Model – Project Scheduling – Scheduling, Earned Value Analysis Planning – Project Plan, Planning Process, RFP Risk Management – Identification, Projection – Risk Management-Risk Identification-RMMM Plan-CASE TOOLS

Total: 45h

TEXT BOOKS:

CSE	SOFTWARE PROJECT MANAGEMENT	3	0	0	3
-----	-----------------------------	---	---	---	---

Course Objective:

- To understand the basic knowledge of software management principles.

- To familiarize in choosing an appropriate project development methodology and identifying project risks, monitoring and tracking project deadlines.

- To develop the capability to work in a team environment and be aware of different modes of communications.

UNIT I INTRODUCTION TO SOFTWARE PROJECT MANAGEMENT

9

Project Definition – Contract Management – Activities Covered by Software Project Management – Plans, Methods and Methodologies – Management – Objectives – Stakeholders – Requirement Specification – Management control – Activities Covered By Software Project Management – Overview Of Project Planning – Stepwise Project Planning.

UNIT II PROJECT EVALUATION

9

Strategic Assessment – Technical Assessment – Cost Benefit Analysis –Cash Flow Forecasting – Cost Benefit Evaluation Techniques : Net Profit – Payback Period – Return on Investment – Net Present Value – Internal Rate of Return – Risk Evaluation : Identification and Ranking – Cost-benefit Analysis – Risk Profile Analysis – Using Decision Trees.

UNIT III ACTIVITY PLANNING

9

Objectives – Project Schedule – Sequencing and Scheduling Activities –Network Planning Models – Forward Pass – Backward Pass – Activity Float – Shortening Project Duration – Activity on Arrow Networks – Risk Management – Nature Of Risk – Types Of Risk – Managing Risk – Hazard Identification – Hazard Analysis – Risk Planning and Control.

UNIT IV MONITORING AND CONTROL

9

Creating Framework – Collecting The Data – Visualizing Progress – Cost Monitoring – Earned Value Analysis – Prioritizing Monitoring – Getting Project Back to Target – Change Control – Managing Contracts – Introduction – Types Of Contract – Stages In Contract Placement – Typical Terms Of A Contract – Contract Management – Acceptance.

UNIT V MANAGING PEOPLE AND ORGANIZING TEAMS

9

Introduction – Understanding Behavior – Organizational Behaviour : a Background – Selecting The Right Person For The Job – Instruction In The Best Methods – Motivation– The Oldman – Hackman Job Characteristics Model – Working In Groups – Becoming A Team –Decision Making – Leadership – Organizational Structures – Stress –Health and Safety – Case Studies.

CSE	SOFTWARE QUALITY ASSURANCE	3	0	0	3
------------	-----------------------------------	---	---	---	---

Course Objective:

- To understand the quality management processes and to distinguish between various activities of quality assurance, quality planning and quality control.
- To know the importance of standards in the quality management process and their impact on the final product.
- To understand the SQA processes from planning till execution.

UNIT I FUNDAMENTALS OF SOFTWARE QUALITY ASSURANCE 9

The Role of SQA: Objectives – Benefits – Goals – Role – Process - SQA Plan : Need and Content of SQA Plan – SQA considerations – SQA people : Roles and Responsibilities of SQA People – Characteristics of Good SQA Engineer – Quality Management – Software Configuration Management : SCM Plan – Roles – Activities – Baselines – Requirement Phase – Implementation Phase.

UNIT II MANAGING SOFTWARE QUALITY 9

Managing Software Organizations: Commitment – Management System – Managing Software Quality: Measurement Criteria – Establishing a Software Quality Program – Estimating Software Quality – Removal Efficiency – Quality Goals and Plans – Tracking and Controlling Software Quality – Defect Prevention - Software Quality Assurance Management.

UNIT III SOFTWARE QUALITY ASSURANCE METRICS 9

Software Quality : Views – Measuring Quality – Criteria - Total Quality Management (TQM) : Principles – Cost – TQM Implementation Approaches – Ways of Improving Quality – Methods for Generating Ideas – Advantages – Barriers – Software Quality Metrics: Product Quality – In-Process – Maintenance quality – Software Quality Metrics Analysis.

UNIT IV SOFTWARE QUALITY PROGRAM 9

Software Quality Program Concepts – Establishment of a Software Quality Program: Tasks – Scope – Minimal Quality Assurance Effort – Quality Plan – Software Quality Assurance Planning: An Overview – Purpose & Scope: Management – Documentation – SPCM – Reviews and Audits – Validation, Verification and Testing – Problem Reporting.

UNIT V SOFTWARE QUALITY ASSURANCE STANDARDIZATION 9

Software Standards–ISO 9000 Quality System Standards : Process Model - Capability Maturity Model and the Role of SQA in Software Development Maturity – SEI CMM Level 5 –Comparison of ISO 9000 Model

with SEI's CMM : Model Orientation – ISO 9000 Weaknesses – CMM Weaknesses - SPICE (Software Process Improvement and Capability Determination).

1. Gordon G Schulmeyer, "Handbook of Software Quality Assurance", Third Edition, Artech House Publishers 2007.
2. Nina S Godbole, "Software Quality Assurance: Principles and Practice", Alpha Science International, Ltd, 2004.

Course Outcomes

At the end of this course the students will be able to,

Course Outcome	Description	Knowledge Level
CO1	Identify the roles and responsibilities of SQA(software quality assurance)people	K3
CO2	Create and apply a software quality assurance plan for all software projects.	K5
CO3	Maintain appropriate metrics to measure and maintain quality	K6
CO4	Facilitate inspections, product reviews, walk-throughs, and audits.	K5
CO5	Discuss the roles of SQA in software development maturity models	K6

CSE	SOFTWARE TESTING	3	0	0	3
------------	-------------------------	---	---	---	---

Course Objectives

- To learn the principles of validation testing, defect testing, system and component testing
- To understand the strategies for generating system test cases
- To understand the essential characteristics of tool used for test automation

UNIT I Introduction 9

Testing as an Engineering Activity – Role of Process in Software Quality – Testing as a Process – Basic Definitions – Software Testing Principles – The Tester’s Role in a Software Development Organization – Origins of Defects – Defect Classes – The Defect Repository and Test Design – Defect Examples – Developer/Tester Support for Developing a Defect Repository.

UNIT II TEST CASE DESIGN 9

Introduction to Testing Design Strategies – The Smarter Tester – Test Case Design Strategies – Using Black Box Approach to Test Case Design Random Testing – Requirements based testing – positive and negative testing — Boundary Value Analysis – decision tables - Equivalence Class Partitioning state-based testing— cause effect graphing – error guessing - compatibility testing – user documentation testing – domain testing Using White–Box Approach to Test design – Test Adequacy Criteria –static testing vs. structural testing – code functional testing - Coverage and Control Flow Graphs – Covering Code Logic – Paths – Their Role in White–box Based Test Design – code complexity testing – Evaluating Test Adequacy Criteria.

UNIT III LEVELS OF TESTING 9

The Need for Levels of Testing – Unit Test – Unit Test Planning –Designing the Unit Tests. The Test Harness – Running the Unit tests and Recording results – Integration tests – Designing Integration Tests – Integration Test Planning – scenario testing – defect bash elimination -System Testing – types of system testing - Acceptance testing –performance testing - Regression Testing – internationalization testing – ad-hoc testing -Alpha – Beta Tests – testing OO systems – usability and accessibility testing

UNIT IV TEST MANAGEMENT 9

People and organizational issues in testing – organization structures for testing teams –testing services - Test Planning – Test Plan Components – Test Plan Attachments –Locating Test Items – test management – test process - Reporting Test Results – The role of three groups in Test Planning and Policy Development – Introducing the testspecialist – Skills needed by a test specialist – Building a Testing Group.

UNIT V CONTROLLING AND MONITORING 9

Software test automation – skills needed for automation – scope of automation – design and architecture for automation – requirements for a test tool – challenges in automation- Test metrics and measurements –project, progress and productivity metrics – Status Meetings – Reports and Control Issues – Criteria for Test Completion – SCM – Types of reviews – Developing a review program – Components of Review Plans– Reporting Review Results. – evaluating software quality – defect prevention – testing maturity Model.

TOTAL : -- 45 hours

TEXT BOOKS:

1. Srinivasan Desikan and Gopaldaswamy Ramesh, “ Software Testing – Principles and Practices”, Pearson education, 2006.

2. Aditya P.Mathur, “Foundations of Software Testing”, Pearson Education,2008.

REFERENCE BOOKS:

1. Boris Beizer, “Software Testing Techniques”, Second Edition, Dreamtech, 2003

2. Elfriede Dustin, “Effective Software Testing”, First Edition, Pearson Education, 2003.

3. Renu Rajani, Pradeep Oak, “Software Testing – Effective Methods, Tools and Techniques”, Tata McGraw Hill,

COURSE OUTCOMES

CO1:	Identify the defects by applying the testing principles	K3
CO2:	Develop test strategies and test cases to prioritize and execute them	K6
CO3:	Apply the testing techniques in an effective manner	K3
CO4:	Design and implement comprehensive test plans	K6
CO5:	Assess the various test metrics and measurements.	K5

✓	✓	✓	✓	✓				
CSE	SYSTEM SOFTWARE				3	0	0	3

Course Objectives

- To understand the relationship between system software and machine architecture.
- To know the design and implementation of assemblers, linkers and loaders.
- To understand the macroprocessors, system software tools and internal working of hardware and software interface of a typical system.

UNIT I INTRODUCTION

9

System software and machine architecture – The Simplified Instructional Computer (SIC) Machine architecture: Memory- Registers-Data and instruction formats - addressing modes -instruction sets – Input / Output – SIC/XE Machine Architecture: Memory-Registers- Data and instruction formats - addressing modes -instruction sets – Input / Output – Programming examples.

UNIT II ASSEMBLERS

8

Basic assembler functions : A simple SIC assembler – Assembler algorithm and data structures - Machine dependent assembler features : Instruction formats and addressing modes – Program relocation - Machine independent assembler features : Literals –Symbol-defining statements – Expressions – Assembler Design Options : One pass assemblers and Multi pass assemblers - Implementation example : MASM assembler.

UNIT III LOADERS AND LINKERS

8

Basic loader functions: Design of an Absolute Loader – A Simple Bootstrap Loader -Machine dependent loader features: Relocation – Program Linking – Algorithm and Data Structures for a Linking Loader - Machineindependent loader features: Automatic Library Search – Loader Options - Loader design options: Linkage Editors - Dynamic Linking – Bootstrap Loaders.

UNIT IV MACRO PROCESSORS & VIRTUAL MACHINES

10

Basic macro processor functions : Macro Definition and Expansion – Macro Processor Algorithm and data structures - Machine-Independent Macro Processor Features : Concatenation of Macro Parameters – Generation of Unique Labels – Conditional Macro Expansion – Keyword Macro Parameters - Macro within Macro - Implementation example : MASM Macro Processor - Introduction to Virtual Machines (VM) – Computer Architecture- Virtual machine basics – Process virtual machines – System virtual machines

UNIT V SYSTEM SOFTWARE TOOLS

10

Database Management Systems : Basic concept of a DBMS – Levels of Data Description – Use of a DBMS - Text editors : Overview of the Editing Process - User Interface – Editor Structure - Interactive debugging systems: Debugging functions and capabilities – Relationship with other parts of the system – User Interface Criteria- Instruction Set Issues – Profiling – Code optimization.

TOTAL: 45 hours

Text Books:

T1: Leland L. Beck, "System Software – An Introduction to Systems Programming", 3rd Edition, Pearson education Asia, 2006.

T2: John R. Levine, "Linkers & Loaders", Morgan Kauffman, 2003.

Reference Books:

R1: John J. Donovan "Systems Programming", Tata McGraw-Hill Edition, 2000.

R2: D. M. Dhamdhere, "Systems Programming and Operating Systems", Second Revised Edition, Tata McGraw Hill, 2000.

R3: John R. Levine, Linkers & Loaders – Harcourt India Pvt. Ltd., Morgan Kaufmann Publishers, 2000.

R4: Srimanta Pal, " Systems Programming " , Oxford University Press, 2011.

COURSE OUTCOMES

After completion of course, students would be able to:

CO1: Demonstrate the machine architecture of SIC and SIC/XE.

CO2: Identify the different assembler modes and features.

CO3: Analyse different loaders with various linkage methods.

CO4: Identify the functionalities of macro processing and analyse the virtual machine implementation.

CO5: Apply the basic concepts of data base management systems with programming coding standards.

MAPPING OF COURSE OUTCOMES TO PROGRAM OUTCOMES

CSE	INTRODUCTION TO DATA ANALYTICS	3	0	0	3
------------	---------------------------------------	---	---	---	---

Course Objectives

- To provide the knowledge and expertise to become a proficient data scientist
- To explore the fundamental concepts of big data & data analytics.
- To gain knowledge on Hadoop related tools such as MongoDB, Cassandra, Pig, and Hive for big data analytics

UNIT I Introduction to Big Data

9 hours

Types of Digital Data-Characteristics of Data – Evolution of Big Data – Definition of Big Data – Challenges with Big Data – 3Vs of Big Data – Non Definitional traits of Big Data – Business Intelligence vs. Big Data – Data warehouse and Hadoop environment – Coexistence.

UNIT II Big Data Analytics

9 hours

Classification of analytics – Data Science – Terminologies in Big Data – CAP Theorem – BASE Concept. NoSQL: Types of Databases – Advantages – NewSQL – SQL vs. NOSQL vs NewSQL

UNIT III Introduction to Hadoop

9 hours

Features – Advantages – Versions – Overview of Hadoop Eco systems – Hadoop distributions – Hadoop vs. SQL – RDBMS vs. Hadoop – Hadoop Components – Architecture – HDFS – Map Reduce: Mapper – Reducer – Combiner – Partitioner – Searching – Sorting – Compression. Hadoop 2 (YARN): Architecture – Interacting with Hadoop Eco systems

UNIT IV No SQL databases

9 hours

Mongo DB: Introduction – Features – Data types – Mongo DB Query language – CRUD operations – Arrays – Functions: Count – Sort – Limit – Skip – Aggregate – Map Reduce. Cursors – Indexes – Mongo Import – Mongo Export. Cassandra: Introduction – Features – Data types – CQLSH – Key spaces – CRUD operations – Collections – Counter – TTL – Alter commands – Import and Export – Querying System tables.

UNIT V Hadoop Eco systems

9 hours

Hive – Architecture – data type – File format – HQL – SerDe – User defined functions – Pig: Features – Anatomy – Pig on Hadoop – Pig Philosophy – Pig Latin overview – Data types – Running pig – Execution modes of Pig – HDFS commands – Relational operators – Eval Functions – Complex data type – Piggy Bank – User defined Functions – Parameter substitution – Diagnostic operator

TOTAL : -- 45 hours

TEXT BOOKS:

T1: Seema Acharya, Subhashini Chellappan, "Big Data and Analytics", Wiley Publication, 2015

REFERENCE BOOKS:

R3: Kyle Banker, "Mongo DB in Action", Manning Publications Company, 2012.

R4: Russell Bradberry, Eric Blow, "Practical Cassandra A developers Approach", Pearson Education, 2014

COURSE OUTCOMES

CO1:	Identify the need of big data	K3
CO2:	Interpret basic concepts of data analytics	K5
CO3:	Analyze the framework for storing the data	K4
CO4:	Examine about NoSQL databases	K4
CO5:	Choose an appropriate framework to solve real world problems	K3

OCSE01	USER INTERFACE DESIGN	3	0	0	3
---------------	------------------------------	---	---	---	---

Course Objectives

- To gain knowledge about how to create a User Interface, how to use different type of controls, Menu usage.
- To learn different types and components, different methodologies used to implement User Interface and how to use multimedia, prototypes and analyzing different types of testing

UNIT I INTRODUCTION

9

Human Computer Interface – A brief History of Screen Design - Characteristics Of Graphics Interface – Direct Manipulation Graphical System – Web User Interface –Popularity –Characteristic of Web Interface Principles of User Interface Design

UNIT II HUMAN COMPUTER INTERACTION

9

User Interface Design Process – Obstacles –Usability –Human Characteristics In Design – Human Interaction Speed–Business Functions and Requirement Analysis : Direct Methods and Indirect Methods – Basic Business Functions -Design Standards – System Training – Structures Of Menus – Functions Of Menus–Contents Of Menu– Formatting-Phrasing The Menu – Selecting Menu Choice–navigating Menus– Kinds of Graphical Menus.

UNIT III WINDOWS

9

Window Characteristics– Components– Presentation Styles– Types– Managements– Organizations– Operations– Web Systems– Device Based Controls Characteristics–Screen Based Controls Characteristics – Operate Control – Text Entry Controls – Selection Control–Combination Control– Custom Control– Presentation Control.

UNIT IV MULTIMEDIA

9

Text For Web Pages – Providing the Proper Feedback– Guidance & Assistance–International Consideration – Accessibility– Icons– Image– Multimedia – Coloring.

UNIT V WINDOWS LAYOUT– TEST

9

Prototypes – Kinds Of Tests – Analyze ,Modify and Retest – Evaluating the Working System - Information Search – Visualization –Hypermedia – Software Tools : Interface Design Tools,Software Testing Tools

TOTAL:45 h

TEXT BOOKS:

- T1: Wilbent. O. Galitz ,“The Essential Guide To User Interface Design”, John Wiley& Sons, 2007.
- T2: Ben Sheiderman, “Design The User Interface”, Pearson Education, 2008.

COURSE OUTCOMES

At the end of this course the students will be able to,

CO1: Identify the concept of Human Computer Interface and Direct Manipulation Graphical System.

CO2: Discuss User Interface Design Process, Obstacles and Usability

CO3: Compare Window Characteristics, Presentation Styles, Organizations and Operations.

CO4: Discuss International Consideration and Accessibility of multimedia

CO5: Analyze the concept of Visualization and Hypermedia

CSE	VIRTUAL REALITY	3	0	0	3
------------	------------------------	---	---	---	---

Course Objectives

- To understand geometric modeling and Virtual environment.
- To study about Virtual Hardwares and Softwares
- To develop Virtual Reality applications

UNIT I INTRODUCTION TO VIRTUAL REALITY 9

Virtual Reality & Virtual Environment : Introduction – Computer graphics – Real time computer graphics –Flight Simulation – Virtual environments –requirement – benefits of virtual reality- Historical development of VR : Introduction-Scientific Landmark -3D Computer Graphics :Introduction – The Virtual world space – positioning the virtual observer – the perspective projection – human vision – stereo perspective projection – 3D clipping – Colour theory – Simple 3D modeling – Illumination models – Reflection models – Shading algorithms- Radiosity – Hidden Surface Removal – Realism-Stereographic image.

UNIT II GEOMETRIC MODELLING 9

Geometric Modeling: Introduction – From 2D to 3D – 3D space curves – 3D boundary representation - Geometrical Transformations: Introduction – Frames of reference – Modeling transformations – Instances –Picking – Flying – Scaling the VE – Collision detection - A Generic VR system: Introduction – The virtual environment – the Computer environment – VR Technology – Model of interaction – VR Systems.

UNIT III VIRTUAL ENVIRONMENT 9

Animating the Virtual Environment: Introduction – The dynamics of numbers – Linear and Non-linear interpolation - The animation of objects – linear and nonlinear translation - shape & object inbetweening – free from deformation – particle system- Physical Simulation : Introduction – Objects falling in a gravitational field – Rotating wheels – Elastic collisions – projectiles – simple pendulum – springs – Flight dynamics of an aircraft.

UNIT IV VR HARDWARES & SOFTWARES 9

Human factors : Introduction – the eye - the ear- the somatic senses - VR Hardware : Introduction – sensor hardware - Head-coupled displays –Acoustic hardware – Integrated VR systems-VR Software: Introduction –Modeling virtual world –Physical simulation- VR toolkits – Introduction to VRML.

UNIT V VR APPLICATION 9

Virtual Reality Applications: Introduction – Engineering – Entertainment – Science – Training – The Future: Introduction – Virtual environments – modes of interaction.

TOTAL: 45 h

TEXT BOOK :

T1: John Vince, “Virtual Reality Systems “, Pearson Education Asia, 2007.

REFERENCE BOOKS:

L4: www.w3.org/MarkUp/VRML

COURSE OUTCOMES

At the end of this course the students will be able to,

CO1:Assess the concept of Virtual Reality, Virtual Environment and 3D Computer Graphics Shading algorithms

CO2:Explain Geometric Modelling Know ,Geometric Transformations and Generic VR system

CO3:Appraise the details of Physical Simulation in Virtual Environment

CO4:Explain Integrated VR systems, VR Software and VRML

CO5:Develop a Virtual Reality Applications with different modes of interaction

CSE	AGILE METHODOLOGIES	3	0	0	3
-----	---------------------	---	---	---	---

Course Objectives

- To provide students with a theoretical as well as practical understanding of agile software development practices and how small teams can apply them to create high-quality software.
- To provide a good understanding of software design and a set of software technologies and APIs.
- To do a detailed examination and demonstration of Agile development and testing techniques.
- To understand the benefits and pitfalls of working in an Agile team.
- To understand Agile development and testing.

UNIT I AGILE METHODOLOGY

9 Hours

Theories for Agile Management – Agile Software Development – Traditional Model vs. Agile Model - Classification of Agile Methods – Agile Manifesto and Principles – Agile Project Management – Agile Team Interactions – Ethics in Agile Teams - Agility in Design, Testing – Agile Documentations – Agile Drivers, Capabilities and Values

UNIT II AGILE PROCESSES

9 Hours

Lean Production - SCRUM, Crystal, Feature Driven Development- Adaptive Software Development - Extreme Programming: Method Overview – Lifecycle – Work Products, Roles and Practices.

UNIT III AGILITY AND KNOWLEDGE MANAGEMENT

9 Hours

Agile Information Systems – Agile Decision Making - Earl'S Schools of KM – Institutional Knowledge Evolution Cycle – Development, Acquisition, Refinement, Distribution, Deployment , Leveraging – KM in Software Engineering – Managing Software Knowledge – Challenges of Migrating to Agile Methodologies – Agile Knowledge Sharing – Role of Story-Cards – Story-Card Maturity Model (SMM).

UNIT IV AGILITY AND REQUIREMENTS ENGINEERING

9 Hours

Impact of Agile Processes in RE–Current Agile Practices – Variance – Overview of RE Using Agile – Managing Unstable Requirements – Requirements Elicitation – Agile Requirements Abstraction Model – Requirements Management in Agile Environment, Agile Requirements Prioritization – Agile Requirements Modeling and Generation – Concurrency in Agile Requirements Generation.

UNIT V AGILITY AND QUALITY ASSURANCE

9 Hours

Agile Product Development – Agile Metrics – Feature Driven Development (FDD) – Financial and Production Metrics in FDD – Agile Approach to Quality Assurance - Test Driven Development – Agile Approach in Global Software Development.

TOTAL : -- 45 Hours

12. <https://www.inflectra.com/Ideas/Whitepaper/Introduction%20to%20Agile%20Development%20Method%20.aspx>

COURSE OUTCOMES

CO1:	Realize the importance of interacting with business stakeholders in determining the requirements for a software system	K4
CO2:	Perform iterative software development processes: how to plan them, how to execute them.	K3
CO3:	Point out the impact of social aspects on software development success	K1
CO4:	Develop techniques and tools for improving team collaboration and software quality.	K6

CO5:	Perform Software process improvement as an ongoing task for development teams.	K3

CSE	INFORMATION SECURITY	3	0	0	3
------------	-----------------------------	---	---	---	---

Course Objective:

- To understand the basics of Information Security and to know the legal, ethical and professional issues in Information Security.
- To know the aspects of risk management and to become aware of various standards and the technological aspects of Information Security.

UNIT I INTRODUCTION

9

Information security: Definition, History, Critical Characteristics of Information-NSTISSC Security Model- Components of an Information System- Securing the Components-Balancing Security and Access-The System Development Life Cycle- The Security System Development Life Cycle

UNIT II SECURITY INVESTIGATION

9

Need for Security- Business Needs: protecting the functionality of an organization, enabling the safe operation of an application, protecting the data that organization collects and use, safeguarding technology assets in organization- Threats-Attacks- Legal, Ethical and Professional Issues: Law and ethics in Information security, relevant U.S Laws, International laws and legal bodies, ethics and information security, codes of ethics and professional organization.

UNIT III SECURITY ANALYSIS

9

Risk Management: Introduction- Risk Identification: plan and organize the process, asset identification and inventory, classifying and prioritizing information assets, information assets valuation, identifying and prioritizing threats, vulnerability identification and Assessing Risk, Assessing and Controlling Risk

UNIT IV LOGICAL DESIGN

9

Blueprint for Security- Information Security Policy, Standards and Practices- ISO17799/BS 7799-NIST Models-VISA International Security Model- Design of Security Architecture- Planning for Continuity: Business impact analysis, incident response planning, disaster recovery planning, business continuity planning, crisis management, model for a consolidated contingency plan, law enforcement involvement.

UNIT V PHYSICAL DESIGN

9

Security Technology- IDS- Scanning and Analysis Tools-Cryptography: Foundation of cryptology, cipher methods, cryptographic algorithms, cryptographic tools, protocols for secure communications, attacks on cryptosystems- Access Control Devices- Physical Security-Security and Personnel

TOTAL: 45h

TEXT BOOK:

1. Michael E Whitman and Herbert J Mattord, "Principles of Information Security", Vikas Publishing House, New Delhi, 2003

REFERENCE BOOKS:

1. Micki Krause, Harold F. Tipton, " Handbook of Information Security Management", Vol 1-3 CRC Press LLC, 2004.

OCSE01	SOFTWARE DEFINED NETWORKS	3	0	0	3
---------------	----------------------------------	----------	----------	----------	----------

Course Objectives

- To learn about the use and application of SDN in Data centers
- To understand the separation of the data plane and the control plane

UNIT I INTRODUCTION

9 hours

History of Software Defined Networking (SDN) – Modern Data Center – Traditional Switch Architecture – Why SDN – Evolution of SDN – How SDN Works – Centralized and Distributed Control and Date Planes

UNIT II OPEN FLOW & SDN CONTROLLERS

9 hours

Open Flow Specification – Drawbacks of Open SDN, SDN via APIs, SDN via Hypervisor-Based Overlays – SDN via Opening up the Device – SDN Controllers – General Concepts

UNIT III DATA CENTERS

9 hours

Multitenant and Virtualized Multitenant Data Center – SDN Solutions for the Data Center Network – VLANs – EVPN – VxLAN – NVGRE

UNIT IV SDN PROGRAMMING

9 hours

Programming SDNs: Northbound Application Programming Interface, Current Languages and Tools, Composition of SDNs – Network Functions Virtualization (NFV) and Software Defined Networks: Concepts,

Implementation and Applications.

UNIT V SDN

9 hours

Juniper SDN Framework – IETF SDN Framework – Open Daylight Controller – Floodlight Controller – Bandwidth Calendaring – Data Center Orchestration

TOTAL : -- 45 hours

Text Books:

1. Thomas D. Nadeau, Ken Gray, —SDN: Software Defined Networks, O'Reilly Media, 2013.
2. Paul Goransson and Chuck Black, —Software Defined Networks: A Comprehensive Approach, First Edition, Morgan Kaufmann, 2014.

Reference Books:

1. Siamak Azodolmolky, —Software Defined Networking with Open Flow, Packet Publishing, 2013.
2. Vivek Tiwari, —SDN and Open Flow for Beginners, Amazon Digital Services, Inc., 2013.

OCSE01	APPLICATIONS OF AI	3	0	0	3
--------	--------------------	---	---	---	---

Course Objectives

- To give deep knowledge of AI and how AI can be applied in various fields to make the life easy

UNIT I

9hours

Linguistic aspects of natural language processing, A.I. And Quantum Computing, Applications of Artificial Intelligence (AI) in business.

UNIT II

9hours

Emotion Recognition using human face and body language, AI based system to predict the diseases early, Smart Investment analysis, AI in Sales and Customer Support

UNIT III

9hours

Robotic Processes Automation for supply chain management.

UNIT IV

9 hours

PROFESSIONAL ELECTIVE COURSE (BLENDED)

CSE	DATA EXPLORATION AND VISUALIZATION	3	0	0	3
-----	------------------------------------	---	---	---	---

Course Objectives

- To understand the basics of Data Explorations and the concepts of Data visualization
- To explore and apply various data visualization techniques for a variety of tasks using R language

UNIT I INTRODUCTION TO DATA EXPLORATION

9 hours

Introduction to Single variable: Distribution Variables - Numerical Summaries of Level and Spread - Scaling and Standardizing – Inequality - Smoothing Time Series.

UNIT II INTRODUCING TWO VARIABLE AND THIRD VARIABLE

9 hours

Relationships between Two Variables - Percentage Tables - Analyzing Contingency Tables - Handling Several Batches - Scatter plots and Resistant Lines – Transformations - Introducing a Third Variable - Causal Explanations - Three-Variable Contingency Tables and Beyond - Longitudinal Data.

CSE	BIG DATA ANALYTICS	3	0	0	3
------------	---------------------------	----------	----------	----------	----------

Course Objectives:

1. To understand the need of Hadoop framework to process the Big Data
2. Introduction to theoretical techniques and practical tools used in data analytics
3. Applications in various engineering and scientific domains.

UNIT I Introduction Big Data and Hadoop Framework

12 hours

Data Storage and Analysis - Characteristics of Big Data – Big Data Analytics - Typical Analytical Architecture – Requirement for new analytical architecture – Challenges in Big Data Analytics –

Need of big data frameworks, Introduction to Hadoop ecosystems. Hadoop Framework: Hadoop – Requirement of Hadoop Framework - Design principle of Hadoop –Comparison with other system - Hadoop Components –Hadoop Daemon’s – Working with HDFS Commands

UNIT II Mapreduce Programming **6 hours**

Map Reduce working principle, Map Reduce types and formats, MapReduce features, Combiner optimization, Map side join, Reduce SideJoin, Secondary sorting, Pipelining MapReduce jobs.

UNIT III R Programming **9 hours**

History and overview of R , Install and configuration of R programming environment , Basic language elements and data structures, Data input/output, Data storage formats , Subsetting objects.

UNIT IV Visualization Using R **6 hours**

Vectorization, Control structures, Functions, Scoping Rules, Loop functions, R Graphs and visualization using lattice, ggplot2

UNIT V Spark Framework and Data Analysis Models **12 hours**

Overview of Spark – Hadoop vs Spark – Cluster Design – Cluster Management – performance, Application Programming interface(API): Spark Context, Resilient Distributed Datasets, Creating RDD, RDD Operations, Saving RDD - Lazy Operation – Spark Jobs-spark ML library.

Association and correlation analysis- regression models- Predictive analytics -Exploratory analysis. Prescriptive analysis.

Lab session: Recent Trends **2 hours**

Projects may be given as group projects.

The project component should be taken as real time applications like e-commerce, social media, streaming data and so on . The students should use the technologies learnt in theory to develop and implement the project.

Total Lecture Hours: **45 hours**

Course Outcomes

At the end of this course the students will be able to,

Course Outcome	Description	Knowledge Level
CO1	Discuss the challenges and their solutions in Big Data and work on Hadoop Framework	k1
CO2	Understand the concepts of R programming and its applications.	k2
CO3	Implement different statistical methods on sample data using R Programming library.	k5
CO4	Analyse the Big Data using Map-reduce programming in Both Hadoop and Spark framework.	k4
CO5	Demonstrate spark programming with different programming languages	k5

CSE	NOSQL DATABASE	3	0	0	3
------------	-----------------------	----------	----------	----------	----------

Course Objectives

- To explore the origins of NoSQL databases and the characteristics that distinguish them from traditional relational database management systems
- To understand the architectures and common features of the main types of NoSQL databases (key-value stores, document databases, column-family stores, graph databases)
- To discuss the criteria that decision makers should consider when choosing between relational and non-relational databases and techniques for selecting the NoSQL database that best addresses specific use cases

UNIT I NOSQL DATA ARCHITECTURE PATTERNS 12 hours

NoSQL Data model: Aggregate Models- Document Data Model- Key-Value Data Model- Columnar Data Model, Graph Based Data Model Graph Data Model, NoSQL system ways to handle big data problems, Moving Queries to data, not data to the query, hash rings to distribute the data on clusters, replication to scale reads, Database distributed queries to Data nodes.

UNIT II KEY VALUE DATA STORES 12 hours

From array to key value databases, Essential features of key value Databases, Properties of keys, Characteristics of Values, Key-Value Database Data Modeling Terms, Key-Value Architecture and implementation Terms, Designing Structured Values, Limitations of Key- Value Databases, Design Patterns for Key-Value Databases, Case Study: Key-Value Databases for Mobile Application Configuration

UNIT III DOCUMENT ORIENTED DATABASE 12 hours

Document, Collection, Naming, CRUD operation, querying, indexing, Replication, Sharding, Consistency Implementation: Distributed consistency, Eventual Consistency, Capped Collection, Case studies: document oriented database: Mongo DB and/or Cassandra

UNIT IV COLUMNAR DATA MODEL 12 hours

Data warehousing schemas: Comparison of columnar and row-oriented storage, Column-store Architectures: C-Store and Vector-Wise, Column-store internals and, Inserts/updates/deletes, Indexing, Adaptive Indexing and Database Cracking. Advanced techniques: Vectorized Processing, Compression, Write penalty, Operating Directly on Compressed Data Late Materialization Joins , Group-by, Aggregation and Arithmetic Operations, Case Studies

UNIT V DATA MODELING WITH GRAPH 12 hours

Comparison of Relational and Graph Modeling, Property Graph Model Graph Analytics: Link analysis algorithm- Web as a graph, Page Rank- Markov chain, page rank computation, Topic specific page rank (Page Ranking Computation techniques: iterative processing, Random walk distribution Querying Graphs: Introduction to Cypher, case study: Building a Graph Database Application- community detection

TOTAL : -- 60 hours

Text Books:

 L3 <https://www.ibm.com/cloud/learn/nosql-databases>
 L4 <https://www.coursera.org/lecture/nosql-databases/introduction-to-nosql-VdRNp>

COURSE OUTCOMES

CO1:	Differentiate and identify right database models for real time applications	K4
CO2:	Outline Key value architecture and characteristics	K2
CO3:	Design Schema and implement CRUD operations, distributed data operations	K6
CO4:	Compare data ware housing schemas and implement various column store internals	K4
CO5:	Develop Application with Graph Data model	K6

	ROBOTICS AND ITS APPLICATION	3	0	0	3
--	-------------------------------------	----------	----------	----------	----------

COURSE OBJECTIVES

1. To understand the basic concepts associated with the design, functioning, applications and social aspects of robots
2. To study about the electrical drive systems and sensors used in robotics for various applications

1. Understand the concepts of industrial robots(K2)
2. Examine different sensors and actuators for applications like maze solving and self driving cars (K2)
3. Design a 2R robot & an end-effector and solve the kinematics and dynamics of motion for robots (K3)
4. Understand the navigation and path planning techniques for robot motion planning (K2)
5. Undertstand the impact and progress of AI in the field of robotics (K2).

CSE	CONCEPTS OF VIRTUAL AND AUGMENTED REALITY	3	0	0	3
------------	--	----------	----------	----------	----------

Course Objectives

- To learn about the principles and multidisciplinary features of virtual reality.
- To study the technology for multimodal user interaction and perception in VR, in particular the visual, audial and haptic interface and behavior.
- To teach students the technology for managing large scale VR environment framework development tools in real time.

UNIT I Virtual reality and virtual environments:

9 hours

The historical development of VR, scientific landmarks computer graphics, real-time computer graphics, virtual environments, requirements for VR, benefits of virtual reality. Hardware technologies for 3D user interfaces: visual displays, auditory displays, haptic displays, choosing output devices for 3D user interfaces.

UNIT II 3D user interface input hardware and Software technologies: **9 hours**

Input device characteristics, desktop input devices, tracking devices, 3d mice, special purpose input devices, direct human input, home - brewed input devices, choosing input devices for 3D interfaces. Software technologies: database - world space, world coordinate, world environment, objects - geometry, position / orientation, hierarchy, bounding volume, scripts and other attributes, VR environment - VR database, tessellated data, LODs, Cullers and Occluders, lights and cameras, scripts, VR toolkits, available software in the market.

UNIT III 3D interaction techniques: **9 hours**

3D manipulation tasks, interaction techniques for 3D manipulation, design guidelines – 3D travel tasks, travel techniques, design guidelines - theoretical foundations of wayfinding, user centered wayfinding support, environment centered wayfinding support, evaluating wayfinding aids, design guidelines - system control, classification, graphical menus, voice commands, Gestural commands, tools, multimodal system control techniques, design guidelines.

UNIT IV Advances in 3D user interfaces: **9 hours**

3D user interfaces for the real world, AR interfaces as 3D data browsers, 3D augmented reality interfaces, augmented surfaces and tangible interfaces, agents in AR, transitional AR-VR interfaces - 3d interaction techniques, 3d UI design and development, 3D UI evaluation and other issues.

UNIT V Virtual reality applications: **9 hours**

Engineering, architecture, education, medicine, entertainment, science, training.

TOTAL : -- 45 hours

Text Books:

1. Paul Mealy, Virtual & Augmented Reality for Dummies, John Wiley & Sons.
2. Alan B Craig, William R Sherman and Jeffrey D Will, “Developing Virtual Reality Applications: Foundations of Effective Design”, Morgan Kaufmann.

Reference Books:

1. Gerard Jounghyun Kim, “Designing Virtual Systems: The Structured Approach”.
2. Doug A Bowman, Ernest Kuijff, Joseph J LaViola, Jr and Ivan Poupyrev, “3D User Interfaces, Theory and Practice”, Addison Wesley, USA

18. <https://www.intel.com/content/www/us/en/tech-tips-and-tricks/virtual-reality-vs-augmented-reality.html>

COURSE OUTCOMES

CO1:	Articulate the historical development of VR and design of visual displays.	K3
CO2:	Integrating the 3D user interface input hardware and Software technologies	K3
CO3:	Hypothesizing the interaction techniques for 3D manipulation, design guidelines	K5
CO4:	Implement the AR-VR interfaces in 3d UI interaction techniques	K3
CO5:	Mind mapping the view of Virtual reality applications in Engineering, architecture, entertainment.	K4

CSE	DIGITAL IMAGE PROCESSING	3	0	0	3
------------	---------------------------------	---	---	---	---

Course Objective:

- Understand the digital image fundamentals.
- Improve their ability in image enhancement and restoration.
- Equip themselves with image segmentation and compression techniques
- Familiarize with the image representation and recognition
- Develop codes for various image processing techniques/applications using MATLAB Image Processing Toolbox

UNIT I: DIGITAL IMAGE FUNDAMENTALS

9

Introduction -Origin – Fundamental Steps in Digital Image Processing – Components – Elements of Visual Perception -Image Sensing and Acquisition – Image Sampling and Quantization -Relationships between pixels -Introduction to Image processing toolbox in MATLAB

UNIT II: IMAGE ENHANCEMENT

9

Spatial Domain: Gray level transformations – Histogram processing -Basics of Spatial Filtering–Smoothing and Sharpening Spatial Filtering -**Frequency Domain:** Basics of filtering – Smoothing and Sharpening frequency domain filters. -MATLAB code for histogram equalization, spatial and frequency domain filter.

UNIT III: IMAGE RESTORATION AND SEGMENTATION

9

Noise models – Mean Filters – Order Statistics – Adaptive filters – Band reject Filters – Band pass Filters – Inverse Filtering – Wiener -**Segmentation:** Point, Line, and Edge Detection- Marr-Hildreth & Canny edge detector –Edge Linking and Boundary detection Local & Regional processing – Region based segmentation -Morphological processing – Watershed segmentation algorithm. -MATLAB code for restoring an image after degradation using adaptive and wiener filter – Edge detection operators

UNIT IV: WAVELETS AND IMAGE COMPRESSION

9

Wavelets – Sub band coding – Multi resolution expansions -**Compression:** Fundamentals – Image Compression methods – Huffman, Arithmetic coding -LZW coding, Run Length Encoding, Block Transform coding, Wavelet coding, JPEG standard. -MATLAB code for image compression: Huffman coding , Arithmetic coding, wavelet coding

UNIT V: IMAGE REPRESENTATION AND RECOGNITION

9

Boundary representation – Chain Code – Polygonal approximation, signature, boundary segments - Boundary description – Shape number – Fourier Descriptor -Patterns and Pattern classes – Recognition

based on matching -MATLAB code for image boundary segments, Fourier Descriptor, Recognition based on matching

TOTAL : 45 h

COURSE OUTCOMES:

At the end of this course the students will be able to,

Course Outcome	Description	Knowledge Level
CO1	Develop various algorithms for restoring an image after degradation.	K6
CO2	Apply image compression & segmentation	K3
CO3	Apply various coding techniques to perform image compression	K3
CO4	Design matlab code to perform histogram equalization in spatial and frequency domain	k6
CO5	Elaborate boundary segments and recognize based on matching	K6

OPEN ELLECTIVE COURSES

OCSE01	Data Structures and Algorithms	3	0	0	3
---------------	---------------------------------------	---	---	---	---

COURSE OBJECTIVES:

- To understand the basic concepts of data structures and algorithms.
- To differentiate linear and non-linear data structures and the operations upon them.
- To perform sorting and searching in a given set of data items.
- To comprehend the necessity of time complexity in algorithms.

UNIT I Introduction to Algorithms and Analysis 9 hours

Overview and importance of algorithms and data structures. Fundamentals of algorithm analysis, Space and time complexity of an algorithm, Types of asymptotic notations and orders of growth, Algorithm efficiency – best case, worst case, average case, Analysis of non-recursive and recursive algorithm

UNIT II Linear Data Structures 9 hours

Array- 1D and 2D array, Stack - Applications of stack: Expression Evaluation - Conversion of Infix to postfix and prefix expression, Tower of Hanoi. Queue - Types of Queues: Circular Queue, Double Ended Queue (deQueue), Applications – Priority Queue using Arrays - List - Singly linked lists – Doubly linked lists - Circular linked lists

UNIT III Sorting and Search Techniques 9 hours

Searching - Linear Search and binary search, Applications - Finding square root of 'n'-Longest Common Prefix- Sorting – Insertion sort - Selection sort – Bubble sort – Quick sort- Merge sort, Analysis, Applications

UNIT IV Non-linear Data Structures 9 hours

Tree, Binary Tree – Terminology and Properties, Tree Traversals, Binary Search Trees – operations in BST – insertion, deletion, finding min and max, Applications - Graph – basic definition and Terminology – Representation of Graph – Graph Traversal: Breadth First Search (BFS), Depth First Search (DFS) - Minimum Spanning Tree: Prim's, Kruskal's Algorithm.

UNIT V Hashing and Balanced Binary Search Trees 9 hours

Hash functions, open hashing-separate chaining, closed hashing - linear probing, quadratic probing, double hashing, random probing, rehashing, extendible hashing, Applications - AVL trees – Terminology - basic operations (rotation, insertion and deletion) - Recent trends in algorithms and data structures

TOTAL: 60 hours

TEXT BOOKS:

T3: Thomas H. Cormen, C.E. Leiserson, R L.Rivest and C. Stein, Introduction to Algorithms, Third edition, MIT Press, 2009.

T4: Mark A. Weiss, Data Structures & Algorithm Analysis in C++, 3rd edition, 2008, PEARSON.

REFERENCE BOOKS:

R2: Kurt Mehlhorn, and Peter Sanders – Algorithms and Data Structures, The Basic Toolbox, Springer-Verlag Berlin Heidelberg, 2008.

3. <https://archive.nptel.ac.in/courses/106/106/106106127/>

COURSE OUTCOMES:

CO1:	Understand the fundamental analysis and compute time complexity for a given problem	K3
CO2:	Articulate linear data structures and perform various operations permitted on them	K2
CO3:	Design and apply a suitable algorithm for searching and sorting problems	K6
CO4:	Develop an algorithm using non-linear data structures	K6
CO5:	Understand and apply appropriate hashing techniques to find solutions for practical problems	K6

ASSESSMENT METHODS:

OCSE02	INTERNET OF THINGS	3	0	0	3
---------------	---------------------------	----------	----------	----------	----------

COURSE OBJECTIVES:

- To understand the basics of IoT and its application sectors
- To understand M2M and IoT
- To understand and become proficient in IoT platforms
- To understand and apply IoT protocols appropriately
- To design and develop IoT based applications

UNIT I INTRODUCTION AND CONCEPTS OF IOT 9 hours

Introduction to IOT, definition and characteristics of IOT - Architecture of Internet of Things, Physical and logical design of IOT, IOT enabling technologies, IOT levels and deployment templates-Domain specific IOTs, home automation, cities, environment, Domain specific IOTs, Energy, retail, agriculture, industry, health and lifestyle

UNIT II IOT AND M2M COMMUNICATION 9 hours

M2M, difference between IOT and M2M, ETSI M2M Architecture, system architecture -ETSI M2M SCL resource structure, Security in ETSI M2M framework, SDN and NFV for IOT, IOT system management, need for IOT system management -SNMP, Network operator requirements, NETCONF-YANG, IOT system management with NETCONF-YANG, IoT Design methodology-case study on IOT system for Weather Monitoring

UNIT III IOT PLATFORMS 9 hours

Introduction to Hardware used for IoT: Microcontrollers, Microprocessors, SoC, Sensors -Introduction to Arduino, Pi, Spark, Intel Galileo

UNIT IV IOT TECHNICAL STANDARDS AND PROTOCOLS 9 hours

RF Protocols: RFID, NFC;IEEE 802.15.4: ZigBee, Z-WAVE, THREAD; Bluetooth Low Energy (BLE), IPv6 for Low Power and Lossy Networks (6LoWPAN) and Routing Protocol for Low power and lossy networks (RPL) -CoAP, XMPP, Web Socket, AMQP, MQTT, WebRTC, PuSH -Architectural Considerations in Smart Object Networking

UNIT V DEVELOPING INTERNET OF THINGS 9 hours

IoT platforms design methodology, IoT Physical devices and endpoints -IoT Systems: Logical design using Python, IoT physical servers and cloud offerings (Cloud computing for IoT)

TOTAL: 45 hours

TEXT BOOKS:

T4: ArshdeepBahga, Vijay Madiseti, "Internet of Things, A Hands -on Approach", 1st Edition 2015, University Press, ISBN: 978-81-7371- 954-7

Quiz	MCQ	Projects	Seminars	Demonstration/ Presentation	Open book test
✓	✓		✓		

OCSE03	PYTHON PROGRAMMING	3	0	0	3
---------------	---------------------------	---	---	---	---

COURSE OBJECTIVES:

- To understand the basic and advanced features of core language built in functions
- To handle and control system/OS level features
- To communicate using sockets, write client and server-side scripts
- To design and implement basic applications with database connectivity

UNIT I PYTHON BASICS 9 hours

Introduction to Python, Python Interpreter and its working, Syntax and Semantics- Data Types: Booleans - Numbers - Lists - Tuples – Set - Dictionaries - Comprehensions - Assignments and Expressions, Control Flow Statements - Functions and lambda expressions

UNIT II PYTHON ADVANCED FEATURES 9 hours

Iterations and Comprehensions - Handling text files - Modules, Classes and OOP - Exception Handling - Strings and Regular Expressions

UNIT III SYSTEM PROGRAMING 9 hours

System tools: OS and Sys modules - Directory Traversal tools - Parallel System tools: threading and queue, Program Exits

UNIT IV NETWORK AND WEB PROGRAMMING 9 hours

Socket Programming: Handling Multiple Clients - Client side scripting, urllib - Server Side Scripting: CGI Scripts with User Interaction, Passing Parameters

UNIT V GUI PROGRAMMING AND DATABASE CONNECTIVITY 9 hours

Introduction to tkinter, Top Level Windows, Dialogs, Message and Entry - Event Handling, Menus, Listboxes and Scrollbars, Text - SQL Database interfaces with sqlite3: Basic operations and table load scripts

TOTAL: 45 hours

TEXT BOOKS:

- T1: Allen B. Downey, "Think Python: How to Think Like a Computer Scientist", 2nd edition, Shroff/O'Reilly Publishers, 2016.

COURSE OUTCOMES:

CO1:	To build programs using List,Tuples,Set,Dictionary	K3
CO2:	To Utilize string functions and regular expression	K3
CO3:	To performdirectory traversalsand parallel processing	K4
CO4:	To develop server side and client side scripting	K3
CO5:	To create programs with database connectivity	K6

ASSESSMENT METHODS:

CAT 1	CAT 2	Model Exam	End Semester Exams	Assignments	Case Studies
✓	✓	✓	✓	✓	✓
Quiz	MCQ	Projects	Seminars	Demonstration/ Presentation	Open book test
✓	✓		✓		✓

OCSE04	ARTIFICIAL INTELLIGENCE	3	0	0	3
---------------	--------------------------------	---	---	---	---

COURSE OBJECTIVES:

- To know about the basic knowledge representation, problem solving and learning methods,
- To design an intelligent agent that can solve ontological problems and to learn about the search strategies,
- To learn the applicability, strengths and weaknesses to solve particular engineering problems.

UNIT I INTRODUCTION

9 hours

Artificial Intelligence: Definition-Turing Test-Relation with other Disciplines-History of AI Applications-Agent: Intelligent Agent-Rational Agent - Nature of Environments-Structure of Agent-Problem Solving Agent - Problems: Toy Problems and Real-world Problems-Uninformed Search Strategies: BFS, DFS, DLS, IDS, Bidirectional Search - comparison of uninformed search strategies

UNIT II PROBLEM SOLVING

9 hours

Informed Search Strategies-Greedy best-first search-A* search-Heuristic functions-Local search Algorithms and Optimization problems - Online Search Agent-Constraint Satisfaction Problems-Backtracking Search for CSP's – Local Search for Constraint Satisfaction Problems-Structure of Problems - Adversarial Search-Optimal Decision in Games-Alpha-Beta Pruning-Imperfect Real Time Decisions-Games that Include an Element of Chance

UNIT III KNOWLEDGE REPRESENTATION

9 hours

First-Order Logic:Syntax and Semantics of First-Order Logic: Models for first-order logic, Symbols and Interpretations, Terms, Atomic sentences, Complex sentences, Quantifiers, Equality - Using First-Order-Logic-Knowledge Engineering in First-Order-Logic- Inference in First-Order Logic: Inference rules-Unification and Lifting-Forward Chaining-Backward Chaining-Resolution

UNIT IV LEARNING

9 hours

Learning from Observations: Forms of Learning - Learning Decision Trees: Decision Trees as Performance elements, Expressiveness of decision trees, Inducing decision trees from examples, Choosing Attribute tests, Assessing the performance of the learning algorithm, Noise and Overfitting, Broadening the applicability of decision trees – Ensemble Learning - A Logical Formulation of Learning - Knowledge in Learning - Explanation-Based Learning - Learning using Relevance Information - Inductive Logic Programming

UNIT V APPLICATIONS

9 hours

Communication –Communication as action -A formal grammar for a fragment of English – Syntactic Analysis – Augmented Grammars – Semantic Interpretation – Ambiguity and Disambiguation – Discourse Understanding – Grammar Induction. Perception –Image Formation –Early Image Processing Operations

– Extracting Three Dimensional Information – Object Recognition – Using Vision for Manipulation and Navigation

TOTAL: 45 hours

OCSE05	CLOUD COMPUTING	3	0	0	3
Course Objectives					
<ul style="list-style-type: none"> ➤ To understand the concept of cloud and utility computing. ➤ To understand the various issues in cloud computing. ➤ To familiarize with the types of virtualization and the lead players in cloud. 					
UNIT I	INTRODUCTION, PRINCIPLES AND ARCHITECTURE	9			
<p>Cloud Computing : Vision, reference model, characteristics and challenges – historical development – building cloud computing environment – computing platforms and Technologies – Parallel Vs distributed computing – Elements of parallel and distributed computing – Technologies for distributed computing. Cloud Computing Architecture: Cloud reference model - NIST Cloud Computing Reference Architecture – types of Clouds - economics – open challenges.</p>					
UNIT II	VIRTUALIZATION	9			
<p>Characteristics of virtualized environments - Taxonomy of virtualization techniques - Execution virtualization -Machine reference model - Hardware-level virtualization – Hypervisors - Hardware virtualization techniques -Operating system-level virtualization - Programming 210 language-level virtualization - Application-level virtualization - Other types - Virtualization and cloud computing - Pros and cons of virtualization - Technology examples - Xen: Paravirtualization - VMware: full virtualization - Full virtualization and binary translation - Microsoft Hyper-V.</p>					
UNIT III	CLOUD INFRASTRUCTURE	9			
<p>Cloud Computing and Services Model – Public, Private and Hybrid Clouds – Cloud Eco System - IaaS - PaaS – SaaS. Architectural Design of Compute and Storage Clouds – Layered Cloud Architecture Development – Design Challenges - Inter Cloud Resource Management – Resource Provisioning and Platform Deployment – Global Exchange of Cloud Resources. Case Study: Amazon Web Service reference, GoGrid, Rackspace</p>					
UNIT IV	CLOUD PROGRAMMING AND SOFTWARE ENVIRONMENT	9			
<p>Cloud capabilities and platform features – data features and databases - Parallel and Distributed Programming Paradigms – MapReduce , Twister and Iterative MapReduce – Hadoop Library from Apache – Dryad and DryadLINQ – sawzall and Pig Latin - Mapping Applications - Programming Support of Google App Engine - Amazon AWS –Microsoft Azure - Cloud Software Environments -Eucalyptus, Open Nebula, OpenStack. Case Study: Amazon Web Service reference, GoGrid, Rackspace.</p>					
UNIT V	CLOUD PLATFORMS AND APPLICATION	9			
<p>Amazon web services - Compute services - Storage services - Communication services - Google AppEngine - Architecture and core concepts – Cloud Security and Trust management. Application life cycle - Cost model – Observations - Microsoft Azure - SQL Azure – Scientific Applications –Business and Consumer</p>					

Application – Energy efficiency in clouds - Market-based management of clouds - Federated clouds/InterCloud - Third-party cloud services.

TOTAL : 45 hours

COURSE OUTCOMES

CO1:	Understand the broad perspective of cloud architecture, key technologies, principles, strengths, limitations as well as the possible applications of the state-of-art of cloud computing.	K2, K3
CO2:	Gain a basic knowledge of virtualization and its categorization and Design & develop highly scalable cloud-based applications by creating and configuring virtual machines.	K3, K6
CO3:	Compare, contrast, and evaluate the key trade-offs between multiple approaches to cloud system design, and Identify appropriate design choices when solving real - world cloud computing problems.	K4

CO4:	Interpret some important cloud computing driven commercial systems such as: Google Apps, Microsoft Azure and Amazon Web Services and other businesses cloud applications.	K5
CO5:	Build and deploy cloud application using popular cloud platforms.	K6

OCSE01	E COMMERCE	3	0	0	3
---------------	-------------------	---	---	---	---

Course Objectives

- To understand the nature of e-Commerce and recognize the business impact and potential of e-Commerce
- To learn the technologies required to make e-Commerce viable.
- To know about the current drivers and inhibitors facing the business world in adopting and using e-Commerce

UNIT I Introduction 9

Traditional commerce and Ecommerce - Categories of Electronic commerce – Business models – Revenue models – Business processes. Internet and WWW–role of WWW–value chains–strategic business – Revenue Strategy issues – Industry value chains - supply chain management–role of Ecommerce

UNIT II Infrastructure for E-Commerce 9

Packet switched networks–Routing packets. TCP/IP protocol script: IP Addressing – Domain names – E-mail protocols. Internet utility programs–SGML,HTML and XML–web client and servers–Web client/server architecture– intranet and extranets – Public and private networks – Virtual private network

UNIT III Web Based Tools for E-Commerce 9

Web server: Server computers –performance evaluation – Hardware architectures. Web server software feature sets–web server software and tools– Internet Utility programs – Data analysis software – Link checking utilities. web protocol–search engines–intelligent agents –EC software– webhosting–cost analysis

UNIT IV Security 9

Computer security classification–copyright and Intellectual property–electronic commerce threats: Secrecy threats – Integrity threats – Necessity threats Encryption solutions. Protecting client computers– electronic payment systems– electronic cash–strategies for marketing–sales and promotion– cryptography – authentication

UNIT V Intelligent Agents 9

Definition and capabilities–limitation of agents – History of software agents – Characteristics and properties a of agents – Tele script Agent Language – safe-Tcl –security–web based marketing– search engines and Directory registration–online advertisements– Portables and info mechanics–website design issues.

TOTAL : -- 45 hours

Text Books:

T1 Ravi Kalakota, Andrew B. Whinston “ Frontiers of Electronic Commerce”, Pearson Education, 2008

T2 Gary PSchneider “Electronic commerce”, Thomson learning & James TPeny Cambridge USA, 2001

T3 Manlyn Greenstein and Miklos “Electronic commerce” McGraw-Hill, 2002.

Reference Books:

R1 Efraim TurvanJ.Lee, David Kug and Chung, “Electronic Commerce” Pearson EducationAsia2001.

R2 Brenda Kienew Ecommerce Business Prentice Hall,2001.

COURSE OUTCOMES

CO1:	Construct the implement various business models of E-Commerce	K3
CO2:	Develop a policy and regulatory issues in E-commerce	K4
CO3:	Evaluate the basic networking concepts	K5
CO4:	Make use of the web client server architecture	K3
CO5:	Develop and acquire knowledge on web server concepts and its performance evaluation	K6

MAPPING OF COURSE OUTCOMES TO PROGRAM OUTCOMES

OCSE08	BLOCK CHAIN TECHNOLOGIES	3	0	0	3
---------------	---------------------------------	---	---	---	---

Course Objectives

- To introduce Bit coin and other crypto currencies
- To study the algorithms and techniques in block chain
- To understand the practical aspects in the design of crypto currency
- To understand the function of Block chains as a method of securing distributed ledgers
- To design, code, deploy and execute a smart contract

UNIT I Introduction to Blockchain 9 hours

Basics of blockchain-Public Ledgers-Block Chain as Public Ledgers-Types of Block chains- Pillars of Block chain-Government Initiatives of BlockChain-Bitcoin-SmartContracts

UNIT II Architecture and Conceptualization of Block Chain, Crypto Currencies 9 hours

Block in a Block chain-find Transactions-Distributed Consensus-Proof of work, Stake, Space-Attacks on POW-Ethereum-Pos/POW Hybrids-Crypto currency to block chain 2.0, Model of Blockchain-Algorand

UNIT III Crypto Primitives, Securing and Interconnecting Public and Private Block Chains 9 hours

Hash Function and Merle Tree-Security Properties-Security Considerations for block chain-Digital Signature-Public Key Cryptography-Bit coinblock chain incentive structures- Nash Equilibriums- evolutionary stable strategies, and Pareto- efficiency (game theory) Weaknesses and news Points of Failure- Mitigation Methods-Redundancies and fall-back methods

UNIT IV Mining and Crypto Currencies - How to use and Interact 9 hours

Mining-Pools-Impact of CPU and GPU-Transaction in Bit coin Network- Block Mining-Block propagation and block relay

UNIT V Blockchain Use Cases-Applications in Different Areas 9 hours

Industry applications of Blockchain-Blockchain in Government-Government use cases-Preventing Cybercrime through block chain-Block Chain in defense, tax payments

TOTAL :45 hours

TEXT BOOKS:

- T1: Mastering Bitcoin: Unlocking Digital Cryptocurrencies, by Andreas Antonopoulos O'Reilly, First Edition, 2014.
- T2: Blockchain by Melanie Swa, O'Reilly Media 2015
- T3: Zero to Block chain - An IBM Redbooks course, by Bob Dill, David Smits

REFERENCE BOOKS:

R1: The Basics of Bitcoins and Blockchains: An Introduction to Cryptocurrencies and the Technology that Powers Them, 2018 by Antony Lewis

R2: The Truth Machine: The Blockchain and the Future of Everything Paperback – 5 March 2019

COURSE OUTCOMES

CO1:	Explain the structure of a block chain	K5
CO2:	Analyze the incentive structure in a block chain based system	K4
CO3:	Judge the scenario where “smart” contract is most appropriate	K5
CO4:	Identify basic knowledge of Bitcoin, Ethereum	K3
CO5:	Apply Blockchain in future use cases for security	K3

ASSESSMENT METHODS:

CAT 1	CAT 2	Model Exam	End Semester Exams	Assignments	Case Studies
✓	✓	✓	✓	✓	
Quiz	MCQ	Projects	Seminars	Demonstration/ Presentation	Open book test
✓	✓		✓	✓	

OCSE09	INTRODUCTION TO DATA ANALYTICS	3	0	0	3
---------------	---------------------------------------	----------	----------	----------	----------

Course Objectives

- To provide the knowledge and expertise to become a proficient data scientist
- To explore the fundamental concepts of big data & data analytics.
- To gain knowledge on Hadoop related tools such as MongoDB, Cassandra, Pig, and Hive for big data analytics

UNIT I Introduction to Big Data 9 hours

Types of Digital Data-Characteristics of Data – Evolution of Big Data – Definition of Big Data – Challenges with Big Data – 3Vs of Big Data – Non Definitional traits of Big Data – Business Intelligence vs. Big Data – Data warehouse and Hadoop environment – Coexistence.

UNIT II Big Data Analytics 9 hours

Classification of analytics – Data Science – Terminologies in Big Data – CAP Theorem – BASE Concept. NoSQL: Types of Databases – Advantages – NewSQL – SQL vs. NOSQL vs NewSQL

UNIT III Introduction to Hadoop 9 hours

Features – Advantages – Versions – Overview of Hadoop Eco systems – Hadoop distributions – Hadoop vs. SQL – RDBMS vs. Hadoop – Hadoop Components – Architecture – HDFS – Map Reduce: Mapper – Reducer – Combiner – Partitioner – Searching – Sorting – Compression. Hadoop 2 (YARN): Architecture – Interacting with Hadoop Eco systems

UNIT IV No SQL databases 9 hours

Mongo DB: Introduction – Features – Data types – Mongo DB Query language – CRUD operations – Arrays – Functions: Count – Sort – Limit – Skip – Aggregate – Map Reduce. Cursors – Indexes – Mongo Import – Mongo Export. Cassandra: Introduction – Features – Data types – CQLSH – Key spaces – CRUD operations – Collections – Counter – TTL – Alter commands – Import and Export – Querying System tables.

UNIT V Hadoop Eco systems 9 hours

Hive – Architecture – data type – File format – HQL – SerDe – User defined functions – Pig: Features – Anatomy – Pig on Hadoop – Pig Philosophy – Pig Latin overview – Data types – Running pig – Execution modes of Pig – HDFS commands – Relational operators – Eval Functions – Complex data type – Piggy Bank – User defined Functions – Parameter substitution – Diagnostic operator

TOTAL : -- 45 hours

TEXT BOOKS:

T2: Seema Acharya, Subhashini Chellappan, “Big Data and Analytics”, Wiley Publication, 2015

REFERENCE BOOKS:

R5: Judith Hurwitz, Alan Nugent, Dr. Fern Halper, Marcia Kaufman, "Big Data for Dummies", John Wiley & Sons, Inc., 2013.

R6: Tom White, "Hadoop: The Definitive Guide", O'Reilly Publications, 2011.

R7: Kyle Banker, "Mongo DB in Action", Manning Publications Company, 2012.

R8: Russell Bradberry, Eric Blow, "Practical Cassandra A developers Approach", Pearson Education, 2014

COURSE OUTCOMES

CO1:	Identify the need of big data	K3
CO2:	Interpret basic concepts of data analytics	K5
CO3:	Analyze the framework for storing the data	K4
CO4:	Examine about NoSQL databases	K4
CO5:	Choose an appropriate framework to solve real world problems	K3

ASSESSMENT METHODS:

CAT 1	CAT 2	Model Exam	End Semester Exams	Assignments	Case Studies
✓	✓	✓	✓	✓	✓
Quiz	MCQ	Projects	Seminars	Demonstration/ Presentation	Open book test
✓	✓		✓	✓	

OCSE10	Fundamentals of AI and ML	3	0	0	3
---------------	----------------------------------	---	---	---	---

Course Objectives

- To understand the basics of Machine Learning (ML)
- To program in Python ML Packages
- To understand the methods of Machine Learning
- To visualize a dataset

UNIT I INTRODUCTION TO ARTIFICIAL INTELLIGENCE 9 hours

Introduction – Foundations of AI – History of AI – Intelligent agent – Types of agents- Structure of agents – Problem solving agents –Uninformed search strategies – Breadth first search – Uniform cost search – Depth first search – Depth limited search

UNIT II INTRODUCTION TO MACHINE LEARNING 9 hours

Machine learning: Types of Machine Learning - Understanding data – Continuous variable, categorical variable, Independent variable, dependent variable -Regression and classification- linear regression - Machine Learning Life cycle - Data Preprocessing techniques – Feature selection

UNIT III MACHINE LEARNING ALGORITHMS 9 hours

Classification and Regression- Naïve bayes- Decision trees- Support Vector Machine (SVM) – Random forest- Linear Regression-Logistic Regression - Unsupervised learning - K-means clustering- Principal component analysis

UNIT IV MODEL EVALUATION 9 hours

Model Evaluation and Selection methods, Precision-Recall and ROC Curves Confusion Matrices, Regression Evaluation, Optimizing Classifiers for Different Evaluation Metrics

UNIT V MACHINE LEARNING APPLICATIONS 9 hours

Image Recognition – Speech Recognition – Email spam and Malware Filtering – Online fraud detection – Medical Diagnosis

TOTAL: 45 hours

VELS

INSTITUTE OF SCIENCE, TECHNOLOGY & ADVANCED STUDIES (VISTAS)
(Deemed to be University Estd. u/s 3 of the UGC Act, 1956)
PALLAVARAM - CHENNAI

ACCREDITED BY **NAAC** WITH '**A**' GRADE

*Marching Beyond **30** Years Successfully*

B.Tech - IT Cloud and Mobile Based Application Development

Curriculum and Syllabus

Regulation 2022

(Based on Choice Based Credit System (CBCS)
and
Outcome Based Education (OBE))

**Effective from the Academic year
2022 – 2023**

**Department of Computer Science and
Engineering
School of Engineering**

VISION AND MISSION OF THE DEPARTMENT

Vision

To develop a knowledge hub for Computer Science Engineers and Technocrats in application of their competence for the betterment of the Individual, Industry and Society.

Mission

- To nurture the students to be industry ready by providing a strong conceptual foundation and by enhancing their employability and entrepreneurial skills.
- To provide holistic growth by conducting relevant enrichment programs, which includes curricular, co-curricular, extra-curricular and extension activities.
- To inculcate innovation and creativity through practically viable Internships and Project works.
- To create a research oriented mindset and focus in fulfilling growing demands of the society through mentoring and lifelong learning.

Program Educational Objectives (PEOs)

- PEO 1: To adopt a systematic approach to design, develop, implement and innovate integrated systems that include people, technology, information and resources.
- PEO 2: To apply principles and practices in information technology to solve multiple real world problems.
- PEO 3: To become Entrepreneurs or Employees of reputed Organizations or pursue Higher Education for better adaptability.
- PEO 4: To accomplish any tasks with ethical values and commitment to meet the Social needs.

PROGRAM OUTCOMES (PO)

- PO 1: Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- PO 2: Problem analysis:** Identify, formulate, research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- PO 3: Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- PO 4: Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- PO 5: Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- PO 6: The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- PO 7: Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- PO 8: Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- PO 9: Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- PO 10: Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- PO 11: Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- PO 12: Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PROGRAMME SPECIFIC OUTCOME (PSO)

PSO 1: An expert with an aptitude and competence to analyse, design, model, develop, test and manage information systems to offer customized solutions.

PSO 2: A professional with learning abilities to face upcoming challenges in the field of Information Technology.

Competencies and Performance Indicators

PO 1: Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialisation for the solution of complex engineering problems.

1.1	Demonstrate competence in mathematical modelling	1.1.1	Apply the knowledge of discrete structures, linear algebra, statistics and numerical techniques to solve problems
		1.1.2	Apply the concepts of probability, statistics and queuing theory in modeling of computer-based system, data and network protocols.
1.2	Demonstrate competence in basic sciences	1.2.1	Apply laws of natural science to an engineering problem
1.3	Demonstrate competence in engineering fundamentals	1.3.1	Apply engineering fundamentals
1.4	Demonstrate competence in specialized engineering knowledge to the program	1.4.1	Apply theory and principles of computer science and engineering to solve an engineering problem

PO 2: Problem analysis: Identify, formulate, research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

2.1	Demonstrate an ability to identify and formulate complex engineering problem	2.1.1	Evaluate problem statements and identifies objectives
		2.1.2	Identify processes/modules/algorithms of a computer-based system and parameters to solve a problem
		2.1.3	Identify mathematical algorithmic knowledge that applies to a given problem
2.2	Demonstrate an ability to formulate a solution plan and methodology for an engineering problem	2.2.1	Reframe the computer-based system into interconnected subsystems
		2.2.2	Identify functionalities and computing resources.
		2.2.3	Identify existing solution/methods to solve the problem, including forming justified approximations and assumptions
		2.2.4	Compare and contrast alternative solution/methods to select the best methods
		2.2.5	Compare and contrast alternative solution processes to select the best process.
2.3	Demonstrate an ability to formulate and interpret a model	2.3.1	Able to apply computer engineering principles to formulate modules of a system with required applicability and performance.
		2.3.2	Identify design constraints for required performance criteria.
2.4	Demonstrate an ability to execute a solution process and analyze results	2.4.1	Applies engineering mathematics to implement the solution.
		2.4.2	Analyze and interpret the results using contemporary tools.
		2.4.3	Identify the limitations of the solution and sources/causes.
		2.4.1	Arrive at conclusions with respect to the objectives.

PO 3: Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for public health and safety, and cultural, societal, and environmental considerations.

3.1	Demonstrate an ability	3.5.1	Able to define a precise problem statement with objectives
-----	------------------------	-------	--

	to define a complex/ open-ended problem in engineering terms		and scope
		3.1.2	Able to identify and document system requirements from stake- holders
		3.1.3	Able to review state-of-the-art literature to synthesize system requirements.
		3.1.4	Able to choose appropriate quality attributes as defined by ISO/IEC/IEEE standard
		3.1.5	Explore and synthesize system requirements from larger social and professional
		3.1.6	Able to develop software requirement specifications (SRS).
3.2	Demonstrate an ability to generate a diverse set of alternative design solutions	3.2.1	Able to explore design alternatives.
		3.2.2	Able to produce a variety of potential design solutions suited to meet functional requirements.
		3.2.3	Identify suitable non-functional requirements for evaluation of alternate design solutions.
3.3	Demonstrate an ability to select optimal design scheme for further development	3.3.1	Able to perform systematic evaluation of the degree to which several design concepts meet the criteria.
		3.3.2	Consult with domain experts and stakeholders to select candidate engineering
3.4	Demonstrate an ability to advance an engineering design to defined end state	3.4.1	Able to refine architecture design into a detailed design within the existing constraints.
		3.4.2	Able to implement and integrate the modules.
		3.4.3	Able to verify the functionalities and validate the design.

PO 4: Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.			
4.1	Demonstrate an ability to conduct investigations of technical issues consistent with their level of knowledge and understanding	4.1.1	Define a problem for purposes of investigation, its scope and importance
		4.1.2	Able to choose appropriate procedure/algorithm, dataset and test cases.
		4.1.3	Able to choose appropriate hardware/software tools to conduct the experiment.
4.2	Demonstrate an ability to design experiments to solve open-ended problems	4.2.1	Design and develop appropriate procedures/methodologies based on the study objectives
4.3	Demonstrate an ability to analyze data and reach a valid conclusion	4.3.1	Use appropriate procedures, tools and techniques to collect and analyze data
		4.3.2	Critically analyze data for trends and correlations, stating possible errors and limitations
		4.3.3	Represent data (in tabular and/or graphical forms) so as to facilitate analysis and explanation of the data, and drawing of conclusions
		4.3.4	Synthesize information and knowledge about the problem from the raw data to reach appropriate conclusions

PO 5: Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

5.1	Demonstrate an ability to identify/create modern engineering tools, techniques and resources	5.1.1	Identify modern engineering tools, techniques and resources for engineering activities
		5.1.2	Create/adapt/modify/extend tools and techniques to solve engineering problems
5.2	Demonstrate an ability to select and apply disciplinespecific tools, techniques and resources	5.2.1	Identify the strengths and limitations of tools for (i) acquiring information, (ii) modeling and simulating, (iii) monitoring system performance, and (iv) creating engineering designs.
		5.2.2	Demonstrate proficiency in using discipline-specific tools
5.3	Demonstrate an ability to evaluate the suitability and limitations of tools used to solve an engineering problem	5.3.1	Discuss limitations and validate tools, techniques and resources
		5.3.2	Verify the credibility of results from tool use with reference to the accuracy and limitations, and the assumptions inherent in their use.
PO 6: The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal, and cultural issues and the consequent responsibilities relevant to the professional engineering practice.			
6.1	Demonstrate an ability to describe engineering roles in a broader context, e.g. pertaining to the environment, health, safety, legal and public welfare	6.1.1	Identify and describe various engineering roles; particularly as pertains to protection of the public and public interest at the global, regional and local level
6.2	Demonstrate an understanding of professional engineering regulations, legislation and standards	6.2.1	Interpret legislation, regulations, codes, and standards relevant to your discipline and explain its contribution to the protection of the public
PO 7: Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and the need for sustainable development.			
7.1	Demonstrate an understanding of the impact of engineering and industrial practices on social, environmental and in economic contexts	7.1.1	Identify risks/impacts in the life-cycle of an engineering product or activity
		7.1.2	Understand the relationship between the technical, socio-economic and environmental dimensions of sustainability
7.2	Demonstrate an ability to apply principles of sustainable design and development	7.2.1	Describe management techniques for sustainable development
		7.2.2	Apply principles of preventive engineering and sustainable development to an engineering activity or product relevant to the discipline
PO 8: Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.			
8.1	Demonstrate an ability to recognize ethical dilemmas	8.1.1	Identify situations of unethical professional conduct and propose ethical alternatives
8.2	Demonstrate an ability to apply the Code of Ethics	8.2.1	Identify tenets of the ASME professional code of ethics
		8.2.2	Examine and apply moral & ethical principles to known case studies
PO 9: Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in			

multidisciplinary settings.			
9.1	Demonstrate an ability to form a team and define a role for each member	9.1.1	Recognize a variety of working and learning preferences; appreciate the value of diversity on a team
		9.1.2	Implement the norms of practice (e.g. rules, roles, charters, agendas, etc.) of effective team work, to accomplish a goal.
9.2	Demonstrate effective individual and team operations-- communication, problem solving, conflict resolution and leadership skills	9.2.1	Demonstrate effective communication, problem-solving, conflict resolution and leadership skills
		9.2.2	Treat other team members respectfully
		9.2.3	Listen to other members
		9.2.4	Maintain composure in difficult situations
9.6	Demonstrate success in a team-based project	9.6.1	Present results as a team, with smooth integration of contributions from all individual efforts
PO 10: Communication: Communicate effectively on complex engineering activities with the engineering community and with the society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions			
10.1	Demonstrate an ability to comprehend technical literature and document project work	10.1.1	Read, understand and interpret technical and non-technical information
		10.1.2	Produce clear, well-constructed, and well-supported written engineering documents
		10.1.3	Create flow in a document or presentation - a logical progression of ideas so that the main point is clear
10.2	Demonstrate competence in listening, speaking, and presentation	10.2.1	Listen to and comprehend information, instructions, and viewpoints of others
		10.2.2	Deliver effective oral presentations to technical and non-technical audiences
10.3	Demonstrate the ability to integrate different modes of communication	10.3.1	Create engineering-standard figures, reports and drawings to complement writing and presentations
		10.3.2	Use a variety of media effectively to convey a message in a document or a presentation
PO 11: Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's work, as a member and leader in a team, to manage projects and in multidisciplinary environments. Competency			
11.1	Demonstrate an ability to evaluate the economic and financial performance of an engineering activity	11.1.1	Describe various economic and financial costs/benefits of an engineering activity
		11.1.2	Analyze different forms of financial statements to evaluate the financial status of an engineering project
11.2	Demonstrate an ability to compare and contrast the costs/benefits of alternate proposals for an engineering activity	11.2.1	Analyze and select the most appropriate proposal based on economic and financial considerations.

11.3	Demonstrate an ability to plan/manage an engineering activity within time and budget constraints	11.3.1	Identify the tasks required to complete an engineering activity, and the resources required to complete the tasks.
		11.3.2	Use project management tools to schedule an engineering project, so it is completed on time and on budget.
PO 12: Life-long learning: Recognise the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.			
12.1	Demonstrate an ability to identify gaps in knowledge and a strategy to close these gaps	12.1.1	Describe the rationale for the requirement for continuing professional development
		12.1.2	Identify deficiencies or gaps in knowledge and demonstrate an ability to source information to close this gap
12.2	Demonstrate an ability to identify changing trends in engineering knowledge and practice	12.2.1	Identify historic points of technological advance in engineering that required practitioners to seek education in order to stay current
		12.2.2	Recognize the need and be able to clearly explain why it is vitally important to keep current regarding new developments in your field
12.3	Demonstrate an ability to identify and access sources for new information	12.3.1	Source and comprehend technical literature and other credible sources of information
		12.3.2	Analyze sourced technical and popular information for feasibility, viability, sustainability, etc.
PSO 1: An expert with an aptitude and competence to analyse, design, model, develop, test and manage information systems to offer customized solutions.			
13.1	Ability to investigate complex problems	13.1.1	Identify problem statements and develop smart solutions for real time applications
		13.1.2	Investigate all the probable solutions towards the identified problem
13.2	Design and Develop solutions systematically	13.2.1	Specify the design tools that may help in finding the solution
		13.2.2	Systematically evaluate and identify the testing strategies to develop an optimal solution
		13.2.3	Implement a customized solution for the problem
PSO 2: A professional with learning abilities to face upcoming challenges in the field of Information Technology.			
14.1	Develop cost benefit solutions using engineering principles and practices	14.1.1	Describe the rationale for choosing solutions based on engineering principles
		14.1.2	Conduct feasibility and cost-benefit analysis for implementing the solution
14.2	Ability to understand and develop solutions in the field of Information Technology	14.2.1	Identify the problem and develop an appropriate solution
		14.2.2	Develop an innovative solution with ethics in IT sector

VELS INSTITUTE OF SCIENCE, TECHNOLOGY & ADVANCED STUDIES(VISTAS)

(Deemed to be University Estd. u/s 3 of the UGC ACT, 1956)

SCHOOL OF ENGINEERING**DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING****The Panel members for Board of studies meeting are listed below**

S. No	Name of the Board Member	Designation	Institute / Industry
Internal Members			
1	Dr. R. Anandan	Professor & Head Department of Computer Science and Engineering Vels Institute of Science, Technology & Advanced Studies (VISTAS)	Chairman
2	Dr. S. Arun	Director, IQAC Vels Institute of Science, Technology & Advanced Studies (VISTAS)	Internal Member
3	Dr. R. A. Karthika	Associate Professor Department of Computer Science and Engineering Vels Institute of Science, Technology & Advanced Studies (VISTAS)	Internal Member
4	Dr. A. Rajesh	Associate Professor Department of Computer Science and Engineering Vels Institute of Science, Technology & Advanced Studies (VISTAS)	Internal Member
5	Dr. K. Kalaivani	Assistant Professor Department of Computer Science and Engineering Vels Institute of Science, Technology & Advanced Studies (VISTAS)	Internal Member
External Expert Members			
1	Dr. Asnath Victry Phamila Y	Associate Professor School of Computer Science and Engineering Vellore Institute of Technology - VIT Chennai	Academic Expert
2	Mr. Santhosh Gopynadhan	Senior Director Optum Global Solutions (India) Private Limited, Chennai	Industrial Expert
Student Member			
1	Mr. Pavan Srivatsav	Project Associate Cognizant Technology Solutions, Chennai	Alumni

-----------	------------------------------	----------	----------	----------	----------

Course Objectives

- To learn about the molecular orbitals, ionic interactions and periodic properties.
- Rationalise periodic properties such as ionization potential, electronegativity, oxidation states and electro negativity.
- List major chemical reactions that are used in the synthesis of molecules.

UNIT I Atomic and molecular structure, Intermolecular forces and potential energy surfaces 9

Molecular orbitals of diatomic molecules and plots of the multicentre orbitals. Equations for atomic and molecular orbitals. Energy level diagrams of diatomics. Pi-molecular orbitals of butadiene, benzene and aromaticity. Valence Bond Theory and the energy level diagrams for transition metal ions and their magnetic properties. Ionic, dipolar and van Der Waals interactions, potential energy surfaces of H₃, H₂F and HCN.

UNIT II Spectroscopic techniques and applications 9

Principles of spectroscopy and selection rules. Electronic spectroscopy. Vibrational, rotational spectroscopy of diatomic molecules, Morse equations and Mossbauer spectroscopy . Applications. Diffraction and scattering

UNIT III Use of free energy in chemical equilibria 9

Thermodynamic functions: energy, entropy , free energy and fugacity. Estimations of entropy and free energies. Free energy and emf. Cell potentials, the Nernst equation and applications. Acid base, oxidation reduction and solubility equilibria. Water chemistry. Corrosion.

UNIT IV Periodic properties 9

Variations of s, p, d and f orbital energies of atoms in the periodic table, electronic configurations, atomic and ionic sizes, ionization energies, electron affinity and electronegativity, diagonal relationship, anomalous behaviour of Lithium, carbon and Nitrogen, polarizability, oxidation states, coordination numbers and geometries, hard soft acids and bases, molecular geometries.

UNIT V Organic reactions and synthesis of a drug molecule 9

Introduction to reactions involving substitution, addition, elimination, oxidation, reduction, cyclization, Coupling reaction and ring openings. Synthesis of a commonly used drug molecule.

TOTAL: 45 hours

Text Books

- T1: Chemistry: Principles and Applications, by M. J. Sienko and R. A. Plane.
 T2: Fundamentals of Molecular Spectroscopy, by C. N. Banwell.
 T3: Engineering Chemistry (NPTEL Web-book), by B. L. Tembe, Kamaluddin and M. S. Krishnan.

Reference Books

COURSE OUTCOMES

At the end of this course the students will be able to,

- CO1: Analyze microscopic chemistry in terms of atomic and molecular orbitals and intermolecular forces.
CO2: Distinguish the ranges of the electromagnetic spectrum used for exciting different molecular energy levels in various spectroscopic techniques.
CO3: Analyze bulk properties and processes using thermodynamic considerations.
CO4: Classify the properties and reactivity of different types of elements based on the periodic table.
CO5: Apply the basic terms involved in an Organic reactions and synthesis of a drug molecule.

IT	Mathematics-I (Calculus and Linear Algebra)	3	1	0	4
-----------	--	----------	----------	----------	----------

Course Objectives

The objective of this course is to familiarize the prospective engineers with techniques in basic calculus and linear algebra. It aims to equip the students with standard concepts and tools at an intermediate to advanced level that will serve them well towards tackling more advanced level of mathematics and applications that they would find useful in their disciplines

Unit-I: Calculus (12 hours)

Rolle's theorem-Mean value theorems-Taylor's and Maclaurin theorems -Indeterminate forms and L'Hospital's rule-Curvature-radius of curvature – Evolutes and envelopes.

Unit-II: Multivariable Calculus (12hours)

Limits-continuity- partial derivative – total derivative – maxima and minima- saddle points-method of Lagrange multipliers

Unit-III: Sequence and series (12hours)

Convergence of sequence and series – test for convergence- power series – Comparison test- Root test, D'Alembert's test and Leibnitz's test

Unit-IV: Matrices (12 hours)

Introduction to Matrices- Rank of matrix- Linear systems of equations-symmetric- skew symmetric matrix and orthogonal matrices-Eigen values and Eigen vectors Diagonalization of matrices- Cayley-Hamilton theorem and orthogonal transformation.

Unit-V: Vector spaces (12 hours)

Vector Space- linear Independence and dependence of vectors, basis, dimension- Linear transformations (maps), range and kernel of a linear map, rank and nullity- Inner product spaces-Gram-Schmidt Orthogonalization.

Total Hours:

60Textbooks:

1. G.B.Thomas and R.L.Finney, Calculus and Analytic geometry, 9th Edition, Pearson, Reprint, 2002.
2. Ramana B.V., Higher Engineering Mathematics, Tata McGraw Hill New Delhi, 11, Reprint, 2010
3. N.P. Bali and Manish Goyal, A text book of Engineering Mathematics, Laxmi Publications, Reprint, 2008.

Reference books:

1. P. Sivaramakrishna Das and C. Vijayakumari, Mathematics-I, First Edition, Pearson India Education services Pvt. Ltd.
2. Erwin Kreyszig, Advanced Engineering Mathematics, 9 Edition, John Wiley & Sons, 2006.

3. VeerarajanT.,Engineering Mathematics for firstyear,TataMcGraw-Hill,NewDelhi,2008.
4. D.Poole, LinearAlgebra: A ModernIntroduction,2nd Edition, Brooks/Cole,2005.
5. B.S.Grewal, Higher Engineering Mathematics, Khanna Publishers, 36 Edition,2010.

Course Outcome

CO1:	Apply the concept of differential calculus and to evaluate the curvature, radius of curvature and envelope	K3
CO2:	Understand the concept of limits, continuity and to evaluate derivatives	K2
CO3:	Analyze the convergence of the series using root test, D'Alembert's test, Leibnitz's test	K3
CO4:	Determine the rank of a matrix, linear system of Equation and Eigen values and Eigenvectors	K3
CO5:	Evaluate the linear independence and dependence of vectors, linear transformations and inner product space.	K4

Category : Engineering Science Course

Course Objective:

- This course provides conceptual and foundational knowledge of the Fundamentals of technologies in the context of software and programming.
- The contents of this course will ensure a student’s interest in the subject is well founded and sows a seed for a conceptual understanding of History of Computing, including programming and the Open Source concepts.
- The course includes enough hands on exercises for the students to be glued on to it.

UNIT I INTRODUCTION TO OPEN SOURCE PARADIGM 9

Brief History of Computing - Art and Science of Programming - Open Standards, Open Source, and IBM - What is an Open Standard - Open Standards Model - Industries needing standards - The Impact of Standards - Open Source Software - Open Source - Open Source Technology - The OPEN Proposition

UNIT II INTRODUCTION TO LINUX 9

What is Linux - Background of Linux - Why is Linux so popular - What can you do with Linux - Linux Distributions - Linux Technology Center - Future of Linux.

UNIT III INTRODUCTION TO EMERGING AREAS OF TECHNOLOGY 9

Cloud Computing – Pros and Cons of Cloud computing – Case study - Business Analytics – Need for Analytics - Mobile Apps Development – Social Business - Information Security.

UNIT IV INDUSTRY USAGE OF COMPUTER PROGRAMMING 9

Industry Session on C Programming - Background of C, Getting Started with C, Constructs, Loops & Arrays, Functions, Pointers, User Defined Types, Binary I/O With Structures..

UNIT V FILE HANDLING 9

File Handling in C – Stream File – Text File functions – Binary File functions – File System functions – Command Line Parameters – File Handling Programs.

TOTAL : 45 h + 30 h (Lab)

TEXT BOOK:

1. IBM Career Education IBM CE – Software Foundation and Programming 1, IBM Student Course Material

Course Outcome:

Course Outcome	Description	Knowledge Level
CO1	Analyze the need of Open Source Standards and its impact in industries	K4
CO2	Analyze the advantages and limitations of Linux.	K4
CO3	Understand the emerging areas of technology like cloud, data analytics and mobile app development	K2
CO4	Create programming code for various applications using C language	K5
CO5	Implement the various file operations in C	K3

MAPPING OF COURSE OUTCOMES TO PROGRAM OUTCOMES

IT	SOFTWARE FOUNDATION AND PROGRAMMING 1 LABORATORY	0	0	2	1
-----------	---	----------	----------	----------	----------

Module Title : Essentials of Software Foundation and Programming - Part 1

Programme : BTech (IT) in Cloud & Mobile Based Application

Development in association with IBM

Term : 1 st year 1st Semester

Credits :

Time required in terms of Student Learning: -

Learning	Hours
Contact Classes	40
Total	40

Aim & Objectives:

Teaching and Learning Approach:

The course will focus on using a teacher-student interactive and decision-oriented learning exercises.

For the active learning mode in the course to be effective, participating in class discussions is extremely important along with self paced learning to clear the concepts of software.

In addition to the lectures, discussions and demonstrations, students would be required to work on sample applications and exercises

Assessment:

Assessment of the student will be based on mid-term and end term examination and continuous assessment subject to class participation, assignments and presentations.

VELS UNIVERSITY

COURSE MODULE FOR BTech (IT) in Cloud & Mobile Based Application Development in association with IBM

Indicative Contents:

Topic	Coverage	No. of Lectures
1	Brief History of Computing, Introduction to computing	6
2	The Structure of C programs, Literals, variables and types, Expressions, operators, Conditionals, Loops and random numbers, Arrays, Functions, Pointers and Dynamic Memory Allocation, Structures, Applications: searching and sorting, File input and output	28
3	Open Standards, Open Source and IBM, Introduction to Linux, Introduction to PHP	6

Text Material & resources: IBM Course Material

Essentials of Software Foundation and Programming - Part 1

IT	CHEMISTRY LABORATORY	0	0	2	1
-----------	-----------------------------	----------	----------	----------	----------

Course Objectives

- The chemistry laboratory
- course will consist of experiments illustrating the principles of chemistry relevant to the study of science and engineering.
- The students will learn to:
 - Estimate rate constants of reactions from concentration of reactants/products as a function of time.
 - Measure molecular/system properties such as surface tension, viscosity, conductance of solutions, redox potentials, chloride content of water, etc
 - Synthesize a small drug molecule.

Experiments

1. Determination of the rate constant of a reaction.
2. Determination of the partition coefficient of a substance between two immiscible liquids.
3. Determination of surface tension and viscosity.
4. Thin layer chromatography.
5. Determination of chloride content in water.
6. Determination of cell constant and conductance of solutions.
7. Synthesis of a polymer/drug.
8. Determination of saponification / acid value of an oil.
9. Determination of redox potentials and emf by Potentiometric method.
10. Estimate the adsorption of acetic acid by charcoal.

2. <https://www.youtube.com/watch?v=qdmKGskCyh8>
3. https://www.youtube.com/watch?v=7_6_dKlo67k

COURSE OUTCOMES

At the end of this course the students will be able to,

- CO1: Estimate the rate constants of reactions and partition coefficient of immiscible liquids.
 CO2: Find the viscosity and to test the purity of the compound.
 CO3: Estimate the amount of chlorine content present in drinking water and to know the conductance of a solution.
 CO4: Develop a small drug molecule and to know the saponification of an oil.
 CO5: Find out the unknown element by Potentiometric method and to remove some of the toxic chemical by charcoal method.

IT	WORKSHOP AND MANUFACTURING PRACTICES	1	0	4	3
-----------	---	----------	----------	----------	----------

GROUP A – MECHANICAL AND CIVIL ENGINEERING PRACTICES

COURSE OBJECTIVE:

- To study bench fitting drawings for making male and female fittings as per the given dimensions and Tolerances.
- To study Arc welding drawings for making common weld joints as per the given dimensions.
- To study sheet metal development drawings for making common metal parts/components as per the given dimensions.

MECHANICAL ENGINEERING PRACTICE

- 1. Welding**
To make single V, butt, lap and T fillet joint by arc welding with the back hand and fore hand welding techniques as per the given dimensions.
- 2. Basic Machining**
To make Simple Turning and Taper turning in the lathe.
- 3. Fitting Work**
To make square, hexagonal, V joint in bench fitting as per the given dimensions and Tolerances.
- 4. Sheet Metal Work**
To make simple Cubical blocks, Rectangular trays in sheet metal with the jigs as per the given dimensions.

CIVIL ENGINEERING PRACTICE

- 1. Buildings**
 - a. Study of plumbing and carpentry components of residential and industrial buildings. Safety aspects.
- 2. Plumbing Works**
 - a. Study of pipeline joints, its location and functions: valves, taps, couplings, unions, reducers, elbows in household fittings.
 - b. Basic pipe connections – Mixed pipe material connection – Pipe connections with different joining components.

TOTAL: 60 Hours

Course Outcomes

CO1:	Understand the various type of workshop machines and practices in manufacturing	K2
CO2:	Develop operating skills in different workshop machines	K3
CO3:	Develop simple objects and illustrations based on the dimensions	K3
CO4:	Measure the parameters and features of the workshop and manufacturing machines	K5
CO5:	Demonstrate the complete functioning and process of the workshop machines	K2

IT	UNIVERSAL HUMAN VALUES 2 : UNDERSTANDING HARMONY	2	0	0	0
----	--	---	---	---	---

COURSE OBJECTIVES:

1. Development of a holistic perspective based on self-exploration about themselves (human being), family, society and nature/existence.
2. Understanding (or developing clarity) of the harmony in the human being, family, society and nature/existence
3. Strengthening of self-reflection.
4. Development of commitment and courage to act.

UNIT I Course Introduction - Need, Basic Guidelines, Content and Process for Value Education

Understanding the need, basic guidelines, content and process for Value Education, Self-Exploration—what is it? - its content and process; ‘Natural Acceptance’ and Experiential Validation- as the mechanism for self exploration, Continuous Happiness and Prosperity- A look at basic Human Aspirations, Right understanding, Relationship and Physical Facilities- the basic requirements for fulfillment of aspirations of every human being with their correct priority, Understanding Happiness and Prosperity correctly- A critical appraisal of the current scenario, Method to fulfill the above human aspirations: understanding and living in harmony at various levels.

UNIT II Understanding Harmony in the Human Being - Harmony in Myself

Understanding human being as a co-existence of the sentient ‘I’ and the material ‘Body’, Understanding the needs of Self (‘I’) and ‘Body’ - Sukh and Suvridha, Understanding the Body as an instrument of ‘I’ (I being the doer, seer and enjoyer), Understanding the characteristics and activities of ‘I’ and harmony in ‘I’, Understanding the harmony of I with the Body: Sanyam and Health; correct appraisal of Physical needs, meaning of Prosperity in detail, Program to ensure Sanyam and Health

UNIT III Understanding Harmony in the Family and Society- Harmony in Human-Human Relationship

Understanding harmony in the Family- the basic unit of human interaction , Understanding values in human-human relationship; meaning of *Nyaya* and program for its fulfillment to ensure *Ubhay-tripti*; Trust (*Vishwas*) and Respect (*Samman*) as the foundational values of relationship, Understanding the meaning of *Vishwas*; Difference between intention and competence, Understanding the meaning of *Samman*, Difference between respect and differentiation; the other salient values in relationship, Understanding the harmony in the society (society being an extension of family): *Samadhan*, *Samridhi*, *Abhay*, *Sah-astitva* as comprehensive Human Goals, Visualizing a universal harmonious order in society- Undivided Society (*AkhandSamaj*), Universal Order (*SarvabhaumVyavastha*)- from family to worldfamily!.

UNIT IV Understanding Harmony in the Nature and Existence - Whole existence as Co-existence

Understanding the harmony in the Nature, Interconnectedness and mutual fulfillment among the four orders of nature- recyclability and self-regulation in nature, Understanding Existence as Co-existence (*Sah-astitva*) of mutually interacting units in all-pervasive space, Holistic perception of harmony at all levels of existence.

UNIT V Implications of the above Holistic Understanding of Harmony on Professional Ethics

Natural acceptance of human values, Definitiveness of Ethical Human Conduct, Basis for Humanistic Education, Humanistic Constitution and Humanistic Universal Order, Competence in Professional Ethics: a) Ability to utilize the professional competence for augmenting universal human order, b) Ability to identify the scope and characteristics of people-friendly and eco-friendly production systems, technologies and

management models, Case studies of typical holistic technologies, management models and production systems, Strategy for transition from the present state to Universal Human Order: a) At the level of individual: as socially and ecologically responsible engineers, technologists and managers, b) At the level of society: as mutually enriching institutions and organizations.

Course Outcomes:

On completion of this course, the students will be able to

1. Understand the significance of value inputs in a classroom, distinguish between values and skills, understand the need, basic guidelines, content and process of value education, explore the meaning of happiness and prosperity and do a correct appraisal of the current scenario in the society
2. Distinguish between the Self and the Body, understand the meaning of Harmony in the Self the Co- existence of Self and Body.
3. Understand the value of harmonious relationship based on trust, respect and other naturally acceptable feelings in human-human relationships and explore their role in ensuring a harmonious society
4. Understand the harmony in nature and existence, and work out their mutually fulfilling participation in the nature.
5. Distinguish between ethical and unethical practices, and start working out the strategy to actualize a harmonious environment wherever they work.

4. Donella H. Meadows, Dennis L. Meadows, Jorgen Randers, William W. Behrens III, 1972, Limits to Growth – Club of Rome's report, Universe Books.

IT	ENGLISH	2	0	0	2
-----------	----------------	----------	----------	----------	----------

Course Objective:

- To acquire ability to speak effectively in real life situations.
- To write letters and reports effectively in formal and business situations.
- To develop listening skills for academic and professional purposes.
- To gain effective speaking and listening skills in communication.
- To develop the soft skills and interpersonal skills to excel in their career.
- To enhance the performance of students at Placement Interviews, Group Discussions and other recruitment procedures.

UNIT I VOCABULARY BUILDING 08

General Vocabulary –Nouns--Compound nouns, Synonyms , Antonyms, Prefixes and Suffixes, Homonyms, Homographs and Homophones, Changing words from one form to another, Acronyms and Abbreviations.-Instructions.

UNIT II BASIC WRITING 08

Sentences structures –Kinds of sentences, Types of sentences, Clauses and Phrases, Punctuations, Blending and Clipping, Framing questions- Yes/No types and “Wh” questions, Summarizing, Precise writing, Paragraph Writing.

UNIT III IDENTIFYING COMMON ERRORS IN ENGLISH 08

Articles, Prepositions, Subject-verb Agreement, Pronouns - Relative pronouns, Demonstrative pronouns, Misplaced Modifiers, Redundancies, Clichés, Infinitives & Gerund, Checklist.

UNIT IV NATURE AND STYLE OF SENSIBLE WRITING 08

Situational Dialogues, Process description, Definitions, Numerical Expressions, Recommendation, Information Transfer- Flow chart Bar chart and Pie chart, , Writing introduction and conclusion.

UNIT V WRITING PRACTICES 08

Active voice and Passive voice, , Making negative sentences , Tenses, Letter Writing- Formal & Informal Letters, Report Writing- Letter Report, Accident Report, Investigation Report and Survey, Essay writing, Reading Comprehension Passages.

Course Outcomes

The student will acquire basic proficiency in English including reading and listening comprehension, writing and speaking skills.

- CO 1 Improve the language proficiency of a technical under-graduate in English with emphasis on Learn, Speak, Read and Write skills.
- CO 2 Develop listening skills for academic and professional purposes.
- CO 3 Acquire the ability to speak effectively in English in real life situations
- CO 4 Provide learning environment to practice listening, speaking, reading and writing skills.
- CO 5 Variety of self-instructional modes of language learning and develop learner autonomy.

- <https://online.rice.edu/courses/communication-skills-for-engineers-specialization>

Course Outcome

- CO1 Distinguish various listening & written contexts for understanding the implied meanings and responding to them accordingly.
- CO2 Use appropriate pronunciation and rhythm of spoken language in oral communication.
- CO3 Draft and interpret the written communication in official contexts like narrative, descriptive, creative, critical and analytical reports.
- CO4 Infer implied meanings of different genres of texts and critically analyze and evaluate them for ideas, as well as for method of oral presentation.

CO5 Make use of suitable communicative strategies to express their point of views convincingly in any type of discussions, negotiation and conversations.

IT	Physics	3	0	0	3
----	---------	---	---	---	---

Course Objectives

- To learn the basics of electronic materials, semiconducting materials and their interaction with light, new engineered semiconductor devices.
- To apply these fundamental principles to solve practical problems related to materials used for engineering applications.

UNIT I Electronic materials 9

Energy bands in solids -Types of electronic materials: metals - semiconductors and insulators - Direct and indirect band gaps - Free electron theory - electrical conductivity and thermal conductivity - Fermi distribution- Effect of temperature on Fermi function – Density of energy states - Kronig-Penny model - E-k diagram.

UNIT II Semiconductors 9

Intrinsic semiconductor - carrier concentration derivation – Variation of Fermi energy level with temperature -extrinsic semiconductors – derivation- carrier concentration in n type and p type semiconductor – Variation of Fermi energy level with temperature and impurity concentration.

UNIT III Light-semiconductor interaction 9

Optical transitions in bulk semiconductors: absorption - spontaneous emission and stimulated emission - Einstein's coefficient- derivation - Photovoltaic effect - Solar cells – principle and working - excitons

UNIT IV Semiconductor devices and Measurements 9

Semiconductor diodes: construction and working – PN diode – Zener diode – Light Emitting Diode (LED) – Measurements: UV-Vis spectroscopy - Hall effect – Determination of Hall coefficient – Applications.

UNIT V Engineered semiconductor materials 9

Shape Memory Alloys (SMA) – Characteristics, Properties of Ni-Ti alloy - Applications - Semiconductor Nanomaterials: Synthesis, properties and applications of nanophase materials – Quantum confinement - Quantum nanostructures: quantum dots - quantum wires - quantum wells.

COURSE OUTCOMES

At the end of this course the students will be able to,

CO1: Analyze the behavior of free electrons in conducting materials.

CO2: Analyze the type of semiconducting materials and their applications.

CO3: Identify the direct and indirect band gap semiconductors.

CO4: Demonstrate the construction and working of various semiconductor devices.

CO5: Develop the design and fabrication of quantum nanostructures.

IT	Mathematics-II	3	1	0	4
-----------	-----------------------	----------	----------	----------	----------

Course Objective:

The objective of this course is to familiarize the students with statistical techniques. It aims to equip the students with standard concepts and tools at an intermediate to advanced level that will serve them well towards tackling various problems in the discipline.

UNIT I: Basic Probability: (12)

Introduction to Probability-Conditional probability – Baye’s Theorem- Random Variables-Discrete random variables-Continuous Random Variables –Probability mass function-Probability density function.

UNIT II: Standard Distributions: (12)

Introduction to theoretical distribution-Discrete Distributions- Binomial, Poisson, Geometric Distributions- Continuous Distribution-Uniform, Normal, Exponential and Gamma distribution-Properties.

UNIT III: Correlation and Regression Analysis: (12)

Correlation: Types of Correlation-Methods of studying correlation- Scatter diagram method, Karl Pearson’s Coefficient of correlation, Spearman’s Rank Correlation Coefficient. Regression: Regression Lines and Regression equations - simple problems

UNIT IV: Basic Statistics: (12)

Introduction-Measures of Central tendency: Mean, Median and Mode- Measure of Dispersion- Range, Mean deviation- Standard Deviation and coefficient of variation

UNIT V: Sampling : (12)

Introduction to small sample – t-test-Single mean, difference of means, and Paired t-test- F-test- Chi-square test for goodness of fit and independence of attributes.

Total Hours: 60

Course

Outcome:

- CO1: Apply the fundamental concepts of probability.
- CO2: Understand of standard distributions which can describe real life phenomenon.
- CO3: Understand and critically discuss the issues surrounding of correlation and Regression
- CO4: Evaluate the underlying assumptions of analysis tools of measures of central tendency and dispersion
- CO5: Analyze the uses and limitations of Testing of hypothesis used in engineering

IT	Software Foundation and Programming 2	3	0	0	3
----	---------------------------------------	---	---	---	---

Module Title : Essentials of Software Foundation and Programming - Part 2
Programme : BTech (IT) in Cloud & Mobile Based Application Development in association with IBM
Term : 1st year 2nd Semester
Credits :

Time required in terms of Student Learning: -

Learning	Hours
Contact Classes	40
Total	40

Aim & Objectives:

Teaching and Learning Approach:

The course will focus on using a teacher-student interactive and decision-oriented learning exercises.

For the active learning mode in the course to be effective, participating in class discussions is extremely important along with self paced learning to clear the concepts of software.

In addition to the lectures, discussions and demonstrations, students would be required to work on sample applications and exercises

Assessment:

Assessment of the student will be based on mid-term and end term examination and continuous assessment subject to class participation, assignments and presentations.

Indicative Contents:

Topic	Coverage	No. of Lectures
Unit 1	Art and Science of Programming, Introduction to OOPS, Introduction to C++	6
Unit 2	Essentials of Programming (classes, Objects), Features of C++, Inheritance, Polymorphism & Encapsulation, Operator Overloading, I/O in C++, Template Functions, Template Classes, Exception Handling	24
Unit 3	XML Basics, Document type definitions (DTDs), XML namespaces, XML schema, XPath, XSL transformation	6
Unit 4	Introduction to - Integrated Development Environment – Eclipse, Java Development Tools, Debugging Applications, The Eclipse Architecture, Eclipse Web Tools Platform Project 1.0, Software in Real World	4

Total	40
--------------	-----------

Text Material & resources: IBM Course Material
Essentials of Software Foundation and Programming - Part 2

IT	ENGINEERING GRAPHICS AND DESIGN	1	0	4	3
-----------	--	----------	----------	----------	----------

COURSE OBJECTIVES:

- To develop in students, graphic skills for communication of concepts, ideas and design of engineering products.
- To expose them to existing national standards related to technical drawings.

CONCEPTS AND CONVENTIONS (Not for Examination)

Importance of graphics in engineering applications – Use of drafting instruments – BIS conventions and specifications – Size, layout and folding of drawing sheets – Lettering and dimensioning.

UNIT I INTRODUCTION TO ENGINEERING DRAWING AND PLANE CURVES 12

Curves used in engineering practices: Conics – Construction of ellipse, Parabola and hyperbola by eccentricity method – Construction of cycloid, Epicycloid, Hypocycloid – construction of involutes of square and circle – Drawing of tangents and normal to the above curves. Scales – Plain, Diagonal and Vernier Scales.

UNIT II PROJECTION OF POINTS, LINES AND PLANE SURFACES 12

Projection of points and straight lines located in the first quadrant – Determination of true lengths and true inclinations – Projection of polygonal surface and circular lamina inclined to both reference planes - Auxiliary Planes.

UNIT III PROJECTION OF SOLIDS 12

Projection of simple solids like prisms, pyramids, cylinder and cone when the axis is inclined to one reference plane by change of position method - Auxiliary Views.

UNIT IV 12

Sectioning of above solids in simple vertical position by cutting planes inclined to one reference plane and perpendicular to the other – Obtaining true shape of section - Auxiliary Views. Development of lateral surfaces of simple and truncated solids – Prisms, pyramids, cylinders and cones – Development of lateral surfaces of solids with cylindrical cutouts, perpendicular to the axis.

UNIT V 12

Free hand sketching: Representation of Three-Dimensional objects – General principles of orthographic projection
 – Need for importance of multiple views and their placement - layout views – Developing visualization skills through free hand sketching of multiple views from pictorial views of objects. Principles of isometric projection – isometric scale – isometric projections of simple solids, truncated prisms, pyramids, cylinders and cones.

TOTAL: 60 Hours

TEXT BOOKS:

1. N.D. Bhatt, “Engineering Drawing” Charotar Publishing House, 46 th Edition, (2003).
2. K. V. Natrajan, “A text book of Engineering Graphics”, Dhanalakshmi Publishers, Chennai (2006).

REFERENCES

1. M.S. Kumar, "Engineering Graphics", D.D. Publications, (2007).
2. K. Venugopal & V. Prabhu Raja, "Engineering Graphics", New Age International (P) Limited (2008).
3. M.B. Shah and B.C. Rana, "Engineering Drawing", Pearson Education (2005).
4. K. R. Gopalakrishnana, "Engineering Drawing" (Vol.I&II), Subhas Publications (1998).
5. Dhananjay A.Jolhe, "Engineering Drawing with an introduction to AutoCAD" Tata McGraw Hill PublishingCompany Limited (2008).
6. Basant Agarwal and Agarwal C.M., "Engineering Drawing", Tata McGraw Hill Publishing CompanyLimited, New Delhi, (2008).

Course Outcomes

CO1:	Understand the theory of projection able to know and understand the conventions and the methods of engineering drawing	K2
CO2:	Improve their visualization skills so that they can apply these skills in projections of surfaces	K3
CO3:	Improve their visualization skills so that they can apply these skills in projections of solids	K3
CO4:	Impart and inculcate a proper understanding of the theory of projection. Improve the visualization skills	K3
CO5:	Understand the various concepts like dimensioning, conventioning and standards relatedto working drawings in order to become professionally efficient. Impart the knowledge for understanding and drawing of simple residential/office buildings	K4

IT	Mathematics-III	3	1	0	4
----	-----------------	---	---	---	---

Course Objective:

This course aims to provide the students to study Fourier Transforms and some concepts of infinite Fourier Sine and Cosine transforms, finite Fourier Sine and Cosine transforms and applications to solve some infinite and boundary value problems using finite and infinite transforms.

UNIT I FOURIER SERIES

12

Dirichlet's conditions – Fourier series – Odd and even functions – Half range sine series – Half range cosine series – Complex form of Fourier Series- Parseval's identity – Harmonic Analysis.

UNIT II FOURIER TRANSFORM

12

Fourier integral theorem (without proof) – Fourier transform pair – Fourier Sine and Cosine transforms – Properties – Transforms of simple functions – Convolution theorem – Parseval's identity.

UNIT III PARTIAL DIFFERENTIAL EQUATIONS

12

Formation of partial differential equations - singular integrals- Solutions of standard types of first order partial differential equations – Lagrange's linear equation - Linear partial differential equations of second and higher order with constant coefficients of homogeneous functions.

UNIT IV APPLICATIONS OF PARTIAL DIFFERENTIAL EQUATIONS

12

Classification PDE-Method of separation of variables – One dimensional wave equation and One dimensional heat equation of heat conduction – Steady state solution of two-dimensional heat equation of heat conduction (square plate only) .

UNIT V Z -TRANSFORM AND DIFFERENCE EQUATIONS

12

Z-transform –Introduction- properties – Inverse Z-transform (using partial fraction and residues) – Convolution theorem - Formation of difference equations – Solution of difference equations using Z-transform.

Total Hours: 60

TEXTBOOKS:

1. Grewal. B.S, "Higher Engineering Mathematics", Khanna Publications, Delhi, 43rd Edition, 2013.
2. Ramana B.V, "Higher Engineering Mathematics", Tata McGraw Hill Publishing Company, New Delhi, 6th reprint, 2008.
3. Sivaramakrishna Das. P & Vijayakumari. C , A Text book of Engineering Mathematics-III

2. Erwin Kreyszig, "Advanced Engineering Mathematics", Wiley India, 9th Edition, 2011.
3. Glyn James, "Advanced Modern Engineering Mathematics", Pearson Education,3rd Edition, 2012.

Course Outcome:

At the end of the course the students will be able to

CO1: Develop Fourier series for different types of functions.

CO2: Acquaint the student with Fourier Transform techniques used in wide variety of situations.

CO3: Introduce the basic concepts of Partial differential equations for solving standard Partial differential equations

CO4: Analyze the student with Fourier series techniques in solving heat flow problems used in various situations.

CO5: Understand the z-transforms and its properties

IT	DIGITAL ELECTRONICS	3	1	0	4
-----------	----------------------------	----------	----------	----------	----------

COURSE OBJECTIVES:

1. To introduce basic postulates of Boolean algebra and shows the correlation between Boolean expressions
2. To introduce the methods for simplifying Boolean expressions
3. To outline the formal procedures for the analysis and design of combinational circuits and sequential circuits
4. To introduce the concept of memories and programmable logic devices.

UNIT I LOGIC GATES, BOOLEAN ALGEBRA AND MINIMIZATION

TECHNIQUES

9

Logic Simplification and Combinational Logic Design: Review of Boolean Algebra and De-Morgan's Theorem, Minimum of Boolean Expressions, Minterm, Maxterm, Sum of Products (SOP) & Product of Sums (POS) forms, Canonical forms, Karnaugh maps, Quine McCluskey method of minimization

UNIT II COMBINATIONAL LOGIC DESIGN

9

Half Adder, Full Adder, Half Subtractor, Full Subtractor, Parallel Adder/ Subtractor, Code Converters, Magnitude Comparator, Multiplexer, Demultiplexer, Encoder, Decoder.

UNIT III SEQUENTIAL LOGIC DESIGN

9

Flip Flop design: SR, JK, D and T Flip Flop, Realization of Flip flops, Counters: Modulo N Counter, UP/DOWN Counter, Ripple Counter, Ring Counter, Shift registers- SISO, SIPO, PIPO, PISO, Races, Hazards.

UNIT IV MEMORIES, PROGRAMMABLE LOGIC DEVICES AND LOGIC

FAMILIES

9

Memories: ROM, PROM, EPROM, EEPROM, RAM, Static RAM cell, Bipolar RAM cell, MOSFET RAM cell, Dynamic RAM CELL. Programmable logic devices: Programmable Logic Array (PLA), Programmable Array Logic (PAL), Field Programmable Gate Array (FPGA).

UNIT V VHDL CONCEPTS IN DIGITAL DESIGN

9

Design entry: Different modeling styles in VHDL, Dataflow, Behavioral and Structural Modeling, VHDL constructs and codes for combinational and sequential circuits.

TOTAL: 45 h

COURSE OUTCOME:

At the end of this course the students will be able to,

CO1:	Examine the laws of Boolean algebra and Simplify minterms and maxterms using K map and tabulation methods.	K4
CO2:	Analyze combinational logic circuits like adders, subtractors, multiplexers and Demultiplexers.	K4
CO3:	Distinguish the operations of SR,JK,T and D flip-flops.	K4
CO4:	Criticize the different types of memories and their designs.	K5
CO5:	Compile VHDL codes to design combinational and sequential circuits.	K6

IT	OPERATING SYSTEMS	3	0	0	3
-----------	--------------------------	----------	----------	----------	----------

Course Objectives

- To understand the features of operating system and its role in managing various system resources.
- To learn the Structure and functions of OS, Process scheduling, Deadlocks, Device management, Memory management and File systems

UNIT I PROCESSES AND THREADS

9 hours

Introduction to operating systems – review of computer organization – operating system structures – system calls – system programs – system structure – virtual machines. Processes: Process concept – Process scheduling – Operations on processes – Cooperating processes – Inter process communication – Communication in client-server systems. Threads: Multi-threading models – Threading issues.

UNIT II PROCESS SCHEDULING AND SYNCHRONIZATION

9 hours

CPU Scheduling: Scheduling criteria – Scheduling algorithms – Multiple-processor scheduling – Real time scheduling – Algorithm Evaluation. Process Synchronization: The critical-section problem – Synchronization hardware – Semaphores – Classic problems of synchronization – critical regions – Monitors. Deadlock: System model – Deadlock characterization – Methods for handling deadlocks – Deadlock prevention – Deadlock avoidance – Deadlock detection – Recovery from deadlock.

UNIT III STORAGE MANAGEMENT

9 hours

Memory Management: Background – Swapping – Contiguous memory allocation – Paging – Segmentation – Segmentation with paging. Virtual Memory: Background – Demand paging – Process creation – Page replacement – Allocation of frames – Thrashing.

UNIT IV FILE SYSTEMS

9 hours

File-System Interface: File concept – Access methods – Directory structure – File system mounting – Protection. File System Implementation: Directory implementation – Allocation methods – Free-space management – efficiency and performance – recovery – log-structured file systems.

UNIT V I/O SYSTEMS

9 hours

I/O Systems – I/O Hardware – Application I/O interface – kernel I/O subsystem – streams – performance. Mass storage Structure: Disk scheduling – Disk management – Swap-space management – RAID – disk attachment – stable storage – tertiary storage.

TOTAL : 45 hours

COURSE OUTCOMES

CO1:	Understand the concept of operating system structures, system calls, system programs and build user programs based on it	K2, K6
CO2:	Compare the performance of various CPU scheduling algorithms	K4
CO3:	Compare and contrast various memory management schemes	K4
CO4:	Use allocation methods to allocate disk space to the files	K3
CO5:	Evaluate the various file and disk management strategies	K5

IT	Essentials of Software Oriented Programming using Java	3	0	2	4
----	--	---	---	---	---

Module Title : Essentials of Object Oriented Programming using Java

Programme : B Tech (IT) in Cloud & Mobile Based Application Development in association with IBM

Term : 2nd year - 3rd Semester

Time required in terms of Student Learning: -

Learning	Hours
Contact Classes	40
Total	40

Aim & Objectives:

Teaching and Learning Approach:

The course will focus on using a teacher-student interactive and decision-oriented learning exercises.

For the active learning mode in the course to be effective, participating in class discussions is extremely important along with self paced learning to clear the concepts of software.

In addition to the lectures, discussions and demonstrations, students would be required to work on sample applications and exercises

Assessment:

Assessment of the student will be based on mid-term and end term examination and continuous assessment subject to class participation, assignments and presentations.

Indicative Contents:

Topic	Coverage	No. of Lectures
Unit 1	Introduction to Java and Eclipse, Object-Oriented Programming, Introduction to SDLC, Introduction to UML, Java Basics (The basic building blocks of Java, variables and primitive types, Objects and Messages, String & StringBuffer, Wrapper classes, Building Classes	8

Unit 2	Debugging, Inheritance and Refactoring, Interfaces, Collections, Serialization and Streams, Exceptions and Exception Handling, Utility Classes, Threads and Synchronization	12
Unit 3	Java Beans, Web Component Introduction, Java Servlets, Java Servlets API, Java Server Pages, JSP Spécification and Syntax, Page Designer	10
Unit 4	Debugging Web Applications, Web Archive Deployment Descriptor, Http: Session Management, Cookie API, Management of Application Data, URL Rewriting	4
Unit 5	JSP Expression Language, JSP Tag Files – Custom Tags, Xdoclets Annotations, Connecting to database, Web Application Security, Java EE Packaging and deployment, Best Practices for Server side Application	6

IT	OPERATING SYSTEMS LAB	0	0	2	1
-----------	------------------------------	----------	----------	----------	----------

Course Objective:

To practice various system calls and concepts of process management, memory management techniques.

List of Experiments:

1. Study of Linux commands.
2. Writing programs using the following system calls of UNIX operating system: fork, exec, getpid, exit, wait, close, stat, opendir, readdir
3. Writing programs using the I/O system calls of UNIX operating system (open, read, write, etc)
4. Writing C programs to simulate UNIX commands like ls, grep, etc.
5. Given the list of processes, their CPU burst times and arrival times, display/print the Gantt chart for FCFS and SJF. For each of the scheduling policies, compute and print the average waiting time and average turnaround time. (2 sessions).
6. Given the list of processes, their CPU burst times and arrival times, display/print the Gantt chart for Priority and Round robin. For each of the scheduling policies, compute and print the average waiting time and average turnaround time. (2 sessions)
7. Developing Application using Inter Process communication (using shared memory, pipes or message queues)
8. Implementation of Producer – Consumer problem using semaphores (using UNIX system calls).
9. Implementation of Deadlock avoidance using Banker’s algorithm.
10. Implementation of some memory management schemes – I
11. Implementation of some memory management schemes – II
12. Implementation of any file allocation technique (Linked, Indexed or Contiguous)

Text Books:

IT	DATA STRUCTURES USING PYTHON LAB	0	0	2	1
----	----------------------------------	---	---	---	---

Course Objectives

- Understand various data representation techniques in the real world.
- Implement linear and non-linear data structures.
- Analyze various algorithms based on their time and space complexity.
- Develop real-time applications using suitable data structure.
- Identify suitable data structure to solve various computing problems

Experiments

1. Implementation of Single Linked List operations: (i) Creation (ii) insertion (iii) deletion (iv) traversal
2. Implementation of polynomial expression in memory using single linked list.
3. Implementation of Circular Linked List operations: (i) Creation (ii) insertion (iii) deletion (iv) traversal
4. Implementation of Double Linked List operations: (i) Creation (ii) insertion (iii) deletion (iv) traversal in both ways.
5. Design and implement Stack and its operations using List.
6. Implementation of stack operations:
 - a. To convert infix expression into postfix expression.
 - b. To evaluate the postfix expression.
7. Design and implement Queue and its operations using List.
8. Implementation of binary search tree operations: a. Creation of node. b. Traverse the above binary search tree recursively in pre-order, post-order and in-order. c. Count the number of nodes in the binary search tree.
9. Implementation of searching techniques:
 - Linear search b. Binary search c. Fibonacci search
10. Implementation of sorting techniques to arrange a list of integers in ascending order. a. Bubble sort b. Insertion sort c. Selection sort
11. Implementation of sorting techniques to arrange a list of integers in ascending order. a. Quick sort b. Merge sort
12. Implementation of graph traversal algorithms: a. Depth first search. b. Breadth first search.

COURSE OUTCOMES

At the end of this course the students will be able to,

- CO1: Gain skills to design and analyze simple linear and non linear data structures.
CO2: Examine insertion, deletion and modification in singly and doubly linked list.
CO3: Construct Stack, Queue in array for which all insertions and deletions are made at both end using various operations
CO4: Apply Insertion, find and deletion operations in Binary Search Tree and Hashing functions.
CO5: Evaluate shortest path in an undirected graph using depth and breadth first algorithms

IT	PERSONALITY DEVELOPMENT I	2	0	0	2
-----------	----------------------------------	----------	----------	----------	----------

COURSE OBJECTIVES:

- To nurture and develop winning personalities and eventually leading them to become dynamic and socially responsible leaders

UNIT I	SOFT SKILLS I	6
Introduction to Personality Development – Meaning–Features of personality – Dimensions of Personality Determinants of Personality–Features and Traits– Components of self concept–Barriers–Self analysis		
UNIT II	SOFT SKILLS II	6
Importance of Soft Skills – First impression–Work Place requirements–Discipline –Cleanliness Hygiene – general Appearance—Building Confidence—Concept of Thinking and Usage –Value of Time–Focus & Commitment.		
UNIT III	SOFT SKILLS IN ACTION	6
Grooming – Attire – Understanding others– Stability & Maturity Development – Strength s – Weakness – Opportunities–threats – Merits of SWOT Analysis – Components – how to convert weakness into strengths – Goal settings		
UNIT IV	SELF AWARENESS AND SELF ESTEEM	6
Definitions – Components of Self awareness – Developing Self awareness – Self esteem – meaning –Steps to improve self esteem.		
UNIT V	SELF MOTIVATION	6
Motivation – Meaning –Techniques of self motivation–Motivation & goal setting – Motivation and emotion – Motivation at work.		
TOTAL: 30 h		

COURSE OUTCOME:

At the end of this course the students will be able to,

TEXT BOOKS:

1. Personality Development And Soft Skills Barun K Mitra, Oxford Publication
2. Seven habits of Highly Effective people – Stephen R. covey

REFERENCE BOOKS:

1. Emotion, motivation and Self regulation – Nathan C. Hall, McGill University, Canada Thomas Goetz, University of Konstanz, Germany <http://www.emeraldgroupublishing.com>.
2. Psychology of Self esteem – Nathaniel Branden, Nash (1st edition), Jossey – Bass (32 nd anniversary edition)

COURSE OUTCOMES

CO1:	Discuss the features, dimensions and determinants of personality	K2
CO2:	Make a good first impression in professional and other situations	K3
CO3:	Demonstrate confidence, punctuality and commitment as an engineer	K3

CO4:	Set goals for development using SWOT analysis	K5
CO5:	Develop self-awareness and improve self esteem	K3

ASSESSMENT METHODS:

CAT 1	CAT 2	Model Exam	End Semester Exams	Assignments	Case Studies
			✓	✓	✓
Quiz	MCQ	Projects	Seminars	Demonstration/ Presentation	Open book test

IT	BASIC LIFE SKILLS	2	0	0	0
-----------	--------------------------	----------	----------	----------	----------

COURSE OBJECTIVE:

1. To provide value education to improve the students' character, understanding of principled life, physical health, maintaining youthfulness, measures and methods in five aspects of life.

UNIT I PHYSICALHEALTH 6

Manavalakalai (SKY) Yoga: Introduction - Education as a means for youth empowerment - Greatness of Education - Yoga for youth Empowerment.Simplified Physical Exercises: Hand, Leg, Breathing, Eye exercises - Kapalabathi, Makarasana Part I, Makarasana Part II, Body Massage, Acu pressure, Relaxation exercises - Benefits.Yogasanas: Pranamasana – HasthaUttanasana - PadaHasthasana – AswaSanjalana Asana – ThuvipathaasvaSanjalana asana – AstangaNamaskara - Bhujangasana–AthaMukthaSavasana – AswaSanjalana Asana - PadaHasthasana–HasthaUttanasana - Pranamasana.Pranayama: Naddisuddi - Clearance Practice - Benefits.

UNIT II LIFE FORCE 6

Reasons for Diseases - Natural reasons (Genetic / imprints, Planetary Position, Natural calamities and climatic changes) - Unnatural reasons (Food habits, Thoughts, Deeds).Philosophy of Kaya kalpa - Physical body - Sexual vital fluid - Life force -Bio-Magnetism - Mind. Maintaining youthfulness. Postponing old age - Transformation of food into seven components - Importance of sexual vital fluid Measure and method in five aspects of life - Controlling undue Passion.Kayakalpa practice - Aswini Mudra - Ojas breath - Benefits of Kaya Kalpa.

UNIT III MENTAL HEALTH 6

Mental Frequencies - Beta, Apha, Theta and Delta wave - Agna Meditation explanation - benefits. Shanthi Meditation explanation – Benefits - Thuriya Meditation explanation – Benefit.Benefits of Blessing - Self blessing (Auto suggestion) - Family blessing - Blessing the others - World blessing - Divine protection

UNIT IVVALUES 6

Human Values Self-control - Self-confidence - Honesty Contentment - Humility – ModestyTolerance - Adjustment - Sacrifice – ForgivenessPurity (Body, Dress, Environment) - Physical purity - Mental purity - Spiritual puritySocial Values:Non-violence– ServicePatriotism – EqualityRespect for parents and elders - care and protection - Respect for teacher Punctuality - Time Management.

UNIT V MORALITY (VIRTUES) 6

Importance of Introspection - I - Mine (Ego, Possessiveness).Six Evil Temperaments - Greed - Anger - Miserliness - Immoral sexual passion - Inferiority and superiority Complex – Vengeance.Maneuvering of Six Temperaments - Contentment - Tolerance - Charity - Chastity - Equality - Pardon (Forgiveness).Five essential Qualities acquired through Meditation: Perspicacity - Magnanimity - Receptivity - Adaptability – Creativity. Improved Memory Power - Success in the Examination.

TOTAL: 30 h

COURSE OUTCOME:

At the end of this course the students will be able to,

- CO1: Utilize skills developed through participation in Manavalakalai (SKY) Yoga to help maintain lifelong health and fitness.
- CO2: Demonstrate foundational standing, sitting, balance postures with proper alignment and Maintain youthfulness through kaya kalpa practice.
- CO3: Explore relaxation techniques to observe thoughts and to manage emotions and stress, and reflect on those techniques which are most effective to them.
- CO4: Demonstrate an understanding of anatomy and physiology as it applies to the intentional integration of breath, postures, and movement within the practice of yoga to understand the human values.
- CO5: Achieve a greater sense of awareness, wisdom, introspection, and a deeper sense of relaxation through meditation to keep up morality in life.

IT	Mathematics-IV (Random Process & Queuing Theory)	3	1	0	4
----	---	----------	----------	----------	----------

Course Objective:

- To understand and conduct computer systems modeling and performance analysis.
- To introduce the basic probability tools and concepts this is useful in modeling, such as Markov models and queuing theory.
- To provide necessary mathematical support and confidence to tackle real life problems.
- To provide the required mathematical support to develop probabilistic models which can be used in several areas of science and engineering.

UNIT I: CLASSIFICATION OF RANDOM PROCESSES 12

Definition and examples – First order – Second order – Strictly stationary – Wide-sense stationary and ergodic process – Markov process – Poisson and Normal process.

UNIT II: QUEUEING THEORY-I 12

Markovian queues – Birth and Death Queuing models- Steady state results- Single server queuing models- (M/M/1): (∞ /FIFO) Model – (M/M/1): (k/FIFO) Model - Characteristics of parameters of models.

UNIT III: QUEUEING THEORY-II 12

Multiple server queuing models- Little's Formula - queues with finite waiting rooms- Finite source models.- (M/M/C): (∞ /FIFO) Model – Characteristics of parameters of models, (M/M/C): (k/FIFO) Model – Characteristics of parameters of models.

UNIT IV: NON-MARKOVIAN QUEUES 12

Finite source models - M/G/ ∞ queues – Pollaczek -Khinchine formula - M/G/1:(∞ /GD) model as special cases.

UNIT V: QUEUEING NETWORKS 12

Queueing Networks - Classification and Basic Concepts. Open and Closed Networks of M/M/m Type Queues, Jackson's Theorem.

Total hours:60

TEXT BOOKS:

- T1: Gross. D. and Harris C.M, "Fundamentals of Queueing Theory", Wiley Student edition, 2004.
T2: Sivaramakrishna Das. P and Vijayakumari. C, "Probability & Queueing Theory", Pearson Education Asia, 6th Edition, 2013.
T3. S.Palaniammal, "Probability & Queueing Theory", Eastern Economy Edition, 2012.

REFERENCE BOOKS:

- R1. A.O. Allen, "Probability, "Statistics and Queueing Theory with Computer Applications", Elsevier, 2nd edition, 2005.
- R2. G.Balaji, "Probability &Queueing Theory", Balaji Publishers, 2018.
- R3. T.Veerarajan , Probability Statistics and Random Process, M c Graw Hill,2018.

COURSE OUTCOMES

At the end of this course the students will be able to,

CO1:	Demonstrate the problems on Ergodic process, Poisson process and Markov chain.	K2
CO2:	Analyzethe basic characteristic features of a queuing system and acquire skills in analyzing queuing models.	K4
CO3:	Apply M/M/C model with finite and infinite capacity.	K3
CO4:	Analyze a network of queues with Poisson external arrivals, exponential service requirements and independent routing. (Jackson networks)	K4
CO5:	Identifyvarious elements of a queuing networks and each of its description	K3

Course Outcomes:

At the end of this course the students will be able to,

Course Outcome	Description	Knowledge Level
CO1	Apply the basic features of operational concepts with its functional operations.	K3
CO2	Determine hardware blocks and control lines are used for specific instructions that execute at different operational level.	K5
CO3	Demonstrate the operation like add and multiply integers and floating-point numbers using two's complement and IEEE floating point representation for various models.	K5
CO4	Analyze clock periods, performance, and instruction throughput of single-cycle, multi-cycle, and pipelined implementations of a simple instruction set	K4
CO5	Deduct and describe the pipeline hazards and identify possible solutions to those hazards	K5

IT	DATABASE MANAGEMENT SYSTEMS	3	0	0	3
-----------	------------------------------------	----------	----------	----------	----------

Course Objectives

- To help the learner to understand the concepts, techniques, security features, how data is stored in the system, Query Languages used and different types of Statements used in the Query Processing in Database Management Systems.

UNIT I INTRODUCTION 9

Database system application-Purpose of database system-View of data-Database language-Relational database-Data storage and queuing-Transaction management-Database architecture-Database users and administrators-History of database system

UNIT II INTRODUCTION TO SQL 9

SQL Data Definition and its types – Specifying Constraints in SQL – Basic Retrieval Queries in SQL – INSERT,UPDATE ,DELETE Statements in SQL – Aggregate Functions in SQL – GROUPING : The GROUP BY and HAVING Clause – JOIN Expressions - VIEWS - TRANSACTIONS – SUBQUERIES

UNIT III DATABASE DESIGN& PROGRAMMING TECHNIQUES 9

Functional Dependencies – First, Second, Third Normal Forms, Dependency Preservation – Boyce/Codd Normal Form–Multi-valued Dependencies and Fourth Normal Form – Join Dependencies and Fifth Normal Form– Entity relationship Model –Entity relationship Diagram and Examples

UNIT IV TRANSACTION MANAGEMENT AND DATABASE SECURITY 9

Transaction - Simple Transaction Model – Serialz ability- Lock based protocols-Time stamp based protocol-Deadlock handling- Two Phase Commit – Introduction to Database Security Issues – Access Control Based on Granting and Revoking Privileges – Challenges of Database Security

UNIT V DATA STORAGE AND QUERYING 9

Overview of Physical storage Media - Magnetic disks - RAID-Tertiary storage – File organization- Organization of records in files- B+ - tree index files - B-tree Index files- Static Hashing- Dynamic Hashing -Overview of query processing-CASE STUDY-ORACLE

TOTAL : 45 hours

Text Books:

- T3: Abraham Silberschatz, Henry F.korthS.Sudharshan, "Database system concepts" sixth edition,tata mcgraw hill 2010.
- T4: Ramez Elmasri, Shamkant B. Navathe, "Fundamentals of Database Systems", FourthEdition , Pearson / Addison wesley, fifth edition, 2009.

Reference Books:

- R3: Raghu Ramakrishnan, "Database Management Systems", Third Edition, McGraw Hill, 2003.
- R4: S.K.Singh, "Database Systems Concepts, Design and Applications", Second Edition, Pearson Education, 2011.

Web Links:

- https://onlinecourses.nptel.ac.in/noc22_cs51/preview.
- https://www.w3schools.com/mysql/mysql_rdbms.asp.

COURSE OUTCOMES

CO1:	Identify the purpose and need of database management system and compare it with conventional systems	K3
CO2:	Construct various SQL queries such as DDL & DML statements, Joins, Aggregate functions, Views and sub queries	K5
CO3:	Compare and distinguish all the five normal forms in Database management system	K4
CO4:	Apply and assess the transaction management and database security	K5
CO5:	Examine various data storage and querying techniques such as RAID, B tree and B+ tree index files, static and dynamic hashing and query processing	K6

IT	Python Programming	3	0	0	3
----	--------------------	---	---	---	---

Course Objectives

- To learn the basic concepts of Python
- To create a web application using Django
- To explore GUI Programming in tkinter and PyQt5

UNIT I PYTHON BASICS

9 Hours

Introduction to Python, Python Interpreter and its working, Syntax and Semantics- Data Types: Booleans - Numbers - Lists - Tuples – Set - Dictionaries - Comprehensions - Assignments and Expressions, Control Flow Statements - Functions and lambda expressions

UNIT II PYTHON : ADVANCED FEATURES

9 Hours

Iterations and Comprehensions - Handling text files - Modules, Classes and OOP - Exception Handling -- Strings and Regular Expressions

UNIT III PYTHON WEB FRAMEWORK

9 Hours

Introduction to Frameworks, Full Stack Frameworks vs Micro Frameworks, Installing Django creating an application using Django and project folder structure- URLs and views -Models –Migrating the models- Experimenting with models API - Django Template Engine-Creating an Administration Interface- Users, groups, and permissions - Object relational mapper

UNIT IV GUI PROGRAMMING - tkinter

9 Hours

Introduction to tkinter, Top Level Windows, Dialogs, Message and Entry - Event Handling, Menus, List boxes and Scrollbars, Text - SQL Database interfaces with sqlite3 : Basic operations and table load scripts

UNIT V GUI PROGRAMMING - PyQt5

9 Hours

Creating a User Interface with Qt Components – Radio button, Checkbox, List. Combo box, Scrollbars, Progress bar- Understanding dialog-Layout, Displaying tabular data using Table Widget, Database Handling

TOTAL : 45 Hours

Text Books:

- T1: Sanjeev Jaiswal Ratan Kumar, “Learning Django Web Development”, Packt Publishing
T2: B.M. Harwani, ” Qt5 Python GUI Programming Cookbook, Packt Publishing

IT	Introduction to AI and ML	3	0	2	4
-----------	----------------------------------	----------	----------	----------	----------

Course Objectives

- To understand the basics of Machine Learning (ML)
- Able to program in Python ML Packages
- To understand the methods of Machine Learning
- To visualize a dataset

UNIT I INTRODUCTION TO ARTIFICIAL INTELLIGENCE 12 hours

Introduction – Foundations of AI – History of AI – Intelligent agent – Types of agents- Structure of agents – Problem solving agents –Uninformed search strategies – Breadth first search – Uniform cost search – Depth first search – Depth limited search –Bidirectional search – Searching with partial Information.

UNIT II INTRODUCTION TO MACHINE LEARNING 12 hours

Machine learning: Types of Machine Learning - Understanding data – Continuous variable, categorical variable, Independent variable, dependent variable -Regression and classification- linear regression introduction- Over fitting and Underfitting - Bias and Variance -Machine Learning Life cycle -- Data Preprocessing techniques – Feature selection

UNIT III MACHINE LEARNING ALGORITHMS 12 hours

Classification and Regression- Naïve bayes- Decision trees- support vector machine (SVM) – Random forest- Linear Regression- Multiple Linear Regression-Logistic Regression. -K-nearest neighbor - Unsupervised learning - k-means clustering- Principal component analysis

UNIT IV MODEL EVALUATION 12 hours

Model Evaluation and Selection methods, Precision-Recall and ROC Curves Confusion Matrices, Regression Evaluation, Optimizing Classifiers for Different Evaluation Metrics

UNIT V MACHINE LEARNING USING PYTHON 12 hours

Scikit- learn Dataset - Understanding Dataframe-slicing a dataframe-managing data -Data Loading with NumPy and pandas- creating training and test sets - Implementation of Machine learning algorithms - predictions - implementation of metrics for validating machine learning algorithms - Scaling and normalization- Data visualization

TOTAL : --60 hours

IT	DATABASE MANAGEMENT SYSTEMS LAB	0	0	3	1
-----------	--	----------	----------	----------	----------

Course Objective:

To understand the various database management system concepts by working on databases.

List of Experiments:

1. DDL and DML Commands.
2. Join Queries.
3. Views and Set operations.
4. Built in functions.
5. Nested Queries
6. Triggers.
7. Aggregate Functions.
8. Roles and Privileges.
9. Cursors.
10. PL/SQL programs
11. PL/SQL cursor programs
12. Front end tools – Mini Project

COURSE OUTCOMES

CO1:	Identify the need of DML and DDL commands and Nested queries	K3
CO2:	Examine and compare various types of Joins and Set operators and write SQL queries	K4
CO3:	Design and develop Views, Triggers and Cursors using SQL	K6
CO4:	Test and solve various aggregate functions and built in functions using SQL	K6
CO5:	Discuss Roles and Privileges and develop a mini project using front end tool using SQL	K6

IT	PERSONALITY DEVELOPMENT II	2	0	0	2
-----------	-----------------------------------	----------	----------	----------	----------

UNIT I	SOFT SKILLS III	6
Basic Etiquette – Email etiquette – Business etiquette – Telephone etiquette – Meeting etiquette – Adjustment of Role & Leadership – Team Management & Development		
UNIT II	QUANTITATIVE APTITUDE I	6
Percentage – Profit Loss –Discount – Ratio Proportion – Time & Work – Time, Speed & Distance. Problems relating to ages– Permutation & Combination–Probability		
UNIT III	QUANTITATIVE APTITUDE II	6
Mensuration – Clocks and Calendars – Boats – Simple Interest – Compound Interest – Fractions and Decimals – Square roots – Functions.		
UNIT IV	ANALYTICAL PROBLEMS	6
Introduction – Linear Sequencing – Seating Arrangements – Distribution/Double Line Up – Selection – Ordering and Sequencing – Binary Logic – Venn Diagrams –Directions.		
UNIT V	LOGICAL PROBLEMS	6
Introduction to Logical problems – Cause and Effect – Course of Action – Statement and Assumption – Letter and Symbol series – Analogies.		
TOTAL: 30 h		

TEXT BOOKS:

- T1. K. R. Dhanalakshmi and N S Raghunathan, Personality Enrichment, Margham Publications, 2012
- T2. R. S. Agarwal, Quantitative Aptitude for Competitive Examinations, S. Chand Publishers, 2017

REFERENCE BOOKS:

- R1. D. P. Sabharwal, Personality Development Handbook, Fingerprint publishing, 2021
- R2. A.K Gupta, Logical and Analytical Reasoning (English), Ramesh Publishing House, 2022

COURSE OUTCOMES

CO1:	Discuss the basic, email, business, telephone and meeting etiquettes.	K2
CO2:	Solve problems on ratio proportion related to profit and loss, discounts, time and work, Time, speed and distance.	K3
CO3:	Work with fractions, decimals and square roots.	K3
CO4:	Analyze the cause, effect and course of action in logical problems.	K4
CO5:	Solve problems on the letter and symbol series.	K3

ASSESSMENT METHODS:

CSE	ENVIRONMENTAL SCIENCE AND ENGINEERING	3	0	0	3
------------	--	----------	----------	----------	----------

Course Objectives

- At the end of this course the student is expected to understand what constitutes the environment, what are precious resources in the environment, how to conserve these resources, what is the role of a human being in maintaining a clean environment and useful environment for the future
- To provide understanding of component of environment, their function, quality, issues related to environment, effect of quality degradation on human beings and their solutions

UNIT I ENVIRONMENT, ECOSYSTEMS AND BIODIVERSITY

9

Definition – Scope and importance – Need for public awareness – Concepts of an Ecosystem – Structure and Function of an Ecosystem – Producers, Consumers and Decomposers – Energy Flow in the Ecosystem – Ecological Succession – Food Chains, Food Webs and Ecological Pyramids – Introduction, Types, Characteristic Features, Structure and Function of the (A) Forest Ecosystem (B) Grassland Ecosystem (C) Desert Ecosystem (D) Aquatic Ecosystems (Ponds, Streams, Lakes, Rivers, Oceans, Estuaries) – Introduction to Biodiversity – Definition: Genetic, Species and Ecosystem Diversity – Bio-geographical Classification of India – Value of Biodiversity: Consumptive Use, Productive Use, Social, Ethical, Aesthetic and Option Values – Biodiversity at Global, National and Local Levels – India as a Mega-Diversity Nation – Hot-Spots of Biodiversity – Threats to Biodiversity: Habitat Loss, Poaching of Wildlife, Man-Wildlife Conflicts – endangered and Endemic Species of India – Conservation of Biodiversity: In-Situ and Ex-Situ conservation of Biodiversity. Field Study of Common Plants, Insects and Birds. Field study of simple ecosystems - pond, river, hill slopes, etc.

UNIT II ENVIRONMENTAL POLLUTION

9

Definition – Causes, Effects and Control Measures of (A) Air Pollution (B) Water Pollution (C) Soil Pollution (D) Marine Pollution (E) Noise Pollution (F) Thermal Pollution (G) Nuclear Hazards – Solid Waste Management:- Causes, Effects and Control Measures of municipal solid Wastes – Role of an Individual in Prevention of Pollution – Pollution Case Studies – disaster Management - Floods, Earthquake, Cyclone and Landslides. Field study of local polluted site – Urban / Rural / Industrial / Agricultural.

UNIT III NATURAL RESOURCES

9

Forest resources -Use and over – Exploitation – Deforestation – Case studies – Timber extraction – Mining – Dams and their ground water – Floods – Drought – Conflicts over water – Dams – Benefits and Problems – Mineral Resources- Use and Exploitation, Environmental Effects of Extracting and Using Mineral Resources, Case Studies – Food Resources: World Food Problems, Changes caused by Agriculture and Overgrazing, Effects of Modern Agriculture, Fertilizer- Pesticide Problems, Water Logging, salinity, Case Studies – Energy Resources:- Growing Energy Needs, Renewable and Non Renewable Energy Sources, Use of Alternate Energy Sources, Case Studies – Land Resources - Land as a Resource, Land Degradation, Man Induced Landslides, Soil Erosion and Desertification – Role of an Individual in Conservation of Natural Resources – Equitable use of Resources for Sustainable Lifestyles. Field study of local area to document environmental assets – river / forest / grassland / hill / mountain.

UNIT IV SOCIAL ISSUES AND THE ENVIRONMENT

9

From Unsustainable To Sustainable Development – Urban Problems Related to energy – Water conservation, Rain Water Harvesting, Watershed Management – Resettlement and Rehabilitation of People, its Problems and Concerns, Case Studies Role of non – governmental organization - Environmental Ethics- Issues and Possible Solutions – Climate Change, Global Warming, Acid Rain, Ozone Layer Depletion, Nuclear Accidents and Holocaust, Case Studies – Wasteland Reclamation – Consumerism and Waste Products – Environment Production Act – Air (Prevention and Control of Pollution) Act – Water (Prevention and Control of Pollution) Act – Wildlife Protection Act – Forest Conservation Act – enforcement machinery involved in environmental Legislation – Central and state pollution control boards - Public Awareness.

UNIT V HUMAN POPULATION AND THE ENVIRONMENT

9

Population Growth, Variation among Nations – Population Explosion Family Welfare Programme – environment and Human Health – Human Rights – Value Education – HIV /AIDS – Women and Child Welfare – Role of Information Technology in Environment and Human Health – Case Studies.

TOTAL: 45 HOURS

Text Books:

1. Gilbert M.Masters, 'Introduction to Environmental Engineering and Science', 2nd edition, Pearson Education (2004).
2. Benny Joseph, 'Environmental Science and Engineering', Tata McGraw- Hill, New Delhi, (2006).

Reference Books

1. R.K. Trivedi, 'Handbook of Environmental Laws, Rules, Guidelines, Compliances and Standards', Vol.I and II, Enviro Media.

4. https://onlinecourses.nptel.ac.in/noc19_ge22/preview

COURSE OUTCOMES

At the end of this course the students will be able to,

CO 1: Understand the core concepts, methods of ecological and physical sciences, their application in environmental problem-solving.

CO 2: Apply system concepts and methodologies to analyse, understand the interactions between social and environmental processes.

CO 3: Apply the ethical, cross-cultural, and historical context of environmental issues and the link between human and natural systems.

CO 4: Develop the understanding based on the observations and illustration, drawn from the experiences of physical, biological, social and cultural aspects of life, rather than abstractions.

CO 5: Reflect critically about their roles and identities as citizens, consumers and environmental actors in a complex, interconnected world.

CSE	GENDER INSTITUTION AND SOCIETY	2	0	0	0
------------	---------------------------------------	---	---	---	---

Course Objective:

The course helps the student to understand concepts of social justice and gender justice. It provides the student with the knowledge of various institutions functioning worldwide which aim to eradicate discrimination against women. The course further aids students in understanding feminism and gender in relation to the society and to study the basic constitutional remedies available to women.

UNIT – I

Social Justice and Gender Justice – Theories relating to Social Justice – Theories relating to Gender Justice – Interrelationship between Gender justice and Social Justice

UNIT – II

International Conventions for protection of Women – Convention on the Elimination of All Forms of Discrimination Against Women (CEDAW) – National Commission for women – Constitutional remedies available for women under Indian Constitution.

UNIT – III

United Nations Entity for Gender Equality and the Empowerment of Women (UN Women) - Association for Women’s Rights in Development (AWID) –Women kind worldwide – Centre for reproductive rights - Women’s Environment and Development Organization (WEDO) - Global Fund for Women

UNIT – IV

International Center for Research on Women (ICRW) - European Institute for Gender Equality (EIGE) – Promundo - International Alliance of Women (IAW) - International Women’s Development Agency (IWDA).

UNIT – V

World Health organisation – Sex and Gender – Feminism – Theories relating to Feminism – Gender and society

TEXT BOOKS

1. Law relating to Women and children, Mamta Rao
2. Gender, Politics and Institutions: Towards a Feminist Institutionalism, by Mona Lena Krook and Fiano Mackay, 2010
3. Gender Justice and Feminist Jurisprudence, Dr. Sheetal Kanwal, 2015
4. Narain’s Gender and society, P. Jain

REFERENCE BOOKS

1. Gender Justice and feminist Jurisprudence by Dr. Ishitha Chatterjee
2. Gender and Institutions, Moira Gatens and Alison Mackinnon

SUGGESTED READINGS:

1. Women and Gender : Society and Community , Siddhartha Sarkar

COURSE OUTCOMES:

After the completion of this Course, the student would be able to:

- CO 1: Understand the Concept of Social Justice and Gender Justice.
- CO 2: Learning the International Conventions and constitutional remedies available for women.
- CO 3: Identify the various gender Institutions and its functions for the development of women.
- CO 4: Assessing the International agencies.
- CO 5: Summarising the study on feminism and relation of gender and society.

IT	Computer Networks	3	1	0	4
----	-------------------	---	---	---	---

Course Objectives:

- To understand the concepts of data communications and to study the functions of different layers.
- To introduce IEEE standards employed in computer networking and to familiarize with different protocols and network components.
- To help the learner to design, calculate, and apply subnet masks and addresses to fulfill networking requirements.
- To analyze the features and operations of various application layer protocols such as Http, DNS, and SMTP.

Web links:

1. <https://www.javatpoint.com/computer-network-tutorial>

COURSE OUTCOMES

Course Outcome	Description	Knowledge Level
CO1	Discuss the functions of each layer in OSI and TCP/IP model	K6
CO2	Examine the Flow Control and Error control of Data link layer	K4
CO3	Evaluate the various functions and components of network layer	K5
CO4	Classify the protocols and techniques of transport layer	K4
CO5	Asses the important of application layer	K5

IT	Foundation Course in Enterprise Application Development using IBM Rational tools	2	0	0	2
-----------	--	----------	----------	----------	----------

Module Title : Foundation Course in Enterprise Application Development using IBM Rational Tools
Programme : BTech (IT) in Cloud & Mobile Based Application Development in association with IBM
Term : 3rd year 5th Semester

Time required in terms of Student Learning: -

Learning	Hours
Contact Classes	40
Total	40

Aim & Objectives:

Teaching and Learning Approach:

The course will focus on using a teacher-student interactive and decision-oriented learning exercises.

For the active learning mode in the course to be effective, participating in class discussions is extremely important along with self paced learning to clear the concepts of software.

In addition to the lectures, discussions and demonstrations, students would be required to work on sample applications and exercises

Assessment:

Assessment of the student will be based on mid-term and end term examination and continuous assessment subject to class participation, assignments and presentations.

Indicative Contents:

Topic	Coverage	No. of Lectures
Unit 1	J2EE Web Component Introduction, Servlet Overview, Supporting Perspectives for Developing J2EE Applications, Simple RegistrationServlet , J2EE Container Services Overview, Servlet API (Part I), Library Case Study Flow, Building the Library Database, ParameterServlet	6
Unit 2	JavaServer Pages Overview, JavaServer Pages Specifications and Syntax, Page Designer in Application Developer, Web Application Debugging, Servlet API (Part II), Web Archive Deployment Descriptor, Calling JSP Pages from a Servlet	8
Unit 3	Session State Storage Issues, Cookie API, HttpSession: Management of Application Data, URL Rewriting, Session Management, Best Practices for Session Management	6

Unit 4	JavaBeans and the Model-View-Controller Patter, Create a JavaBean, JavaServer Pages with JavaBeans, Combining Servlets,JSP Pages, and JavaBeans, JSP Expression Language, Using JSPEXpression Language, JSP Custom Tags, JSP Tag Files, Servlet Filtering	10
Unit 5	Servlet Listeners, Best Practices for Server-Side Application Development, J2EE Packaging and Deployment, Installing an Application in WebSphere Application Server V6.1, Web ApplicationSecurity	10

Total	40
--------------	-----------

Text Material : IBM Course Material

Foundation Course in Enterprise Application Development using IBM Rational Tools

IT	Computer Networks Lab	2	0	0	2
-----------	-----------------------	----------	----------	----------	----------

Course Objective:

To help the learner to understand the underlying concepts of networked systems and to be able to develop networking programs using Java.

Experiments:

1. Programs using TCP Sockets (like date and time server & client, echo server & client, etc..)
2. Programs using UDP Sockets (like simple DNS)
3. Programs using Raw sockets (like packet capturing and filtering)
4. Programs using RPC
5. Simulation of sliding window protocols
6. Experiments using simulators (like OPNET)
7. Performance comparison of MAC protocols
8. Implementing Routing Protocols
9. Performance comparison of Routing protocols
10. Implementation of Logical and Physical Address
11. Simulation of ARP/RARP Protocol
12. Study of UDP and TCP performance

TOTAL: 30 h

Text Book:

- T1. Behrouz A. Forouzan, “Data communication and Networking”, Fourth Edition, Tata McGraw-Hill, 2006.

Reference Books:

- R1. Nader F. Mir, “Computer and Communication Networks”, Pearson Education, 2007
R2. Comer, “Computer Networks and Internets with Internet Applications”, Fourth Edition, Pearson Education, 2003.

1. <https://www.cse.iitk.ac.in/users/dheeraj/cs425/>

COURSE OUTCOMES

At the end of this course the students will be able to,

Course Outcome	Description	Knowledge Level
CO1	Experiment with TCP, UDP and Raw socket programming	K3
CO2	Construct an application model for RPC	K6
CO3	Model the simulation of sliding window protocol and ARP/RARP	K3
CO4	Identify the Performance comparison of MAC protocols, Routing protocol	K3
CO5	Compose the implementation of Logical and Physical Address	K6

MAPPING OF COURSE OUTCOMES TO PROGRAM OUTCOMES

IT	Fundamentals of Blockchain & Use Cases	3	0	0	3
-----------	---	---	---	---	---

Course Objectives

- To understand a broad overview of the essential concepts of blockchain technology
- To familiarize students with Bitcoin protocol followed by the Ethereum protocol – to lay the foundation necessary for developing applications and programming
- To learn about different types of blockchain and consensus algorithms

UNIT I Basics of Blockchain 9

The Double-Spend Problem, Byzantine Generals' Computing Problems, Public-Key Cryptography, Hashing, Distributed Systems, Distributed Consensus. Technology Stack: Blockchain, Protocol, Currency

UNIT II Bitcoin Blockchain and Ethereum Blockchain 9

Bitcoin Blockchain: Structure, Operations, Features, Consensus Model, Incentive Model.

Ethereum Blockchain: Smart Contracts, Ethereum Structure, Operations, Consensus Model, Incentive Model.

UNIT III Tiers of Blockchain Technology 9

Blockchain 1.0, Blockchain 2.0, Blockchain 3.0, Types of Blockchain: Public Blockchain, Private Blockchain, Semi-Private Blockchain, Sidechains.

UNIT IV Types of Consensus Algorithms 9

Proof of Stake, Proof of Work, Delegated Proof of Stake, Proof Elapsed Time, Deposite-Based Consensus, Proof of Importance, Federated Consensus or Federated Byzantine Consensus, Practical Byzantine Fault Tolerance. Blockchain Use Case: Supply Chain Management.

UNIT V Blockchain Use Cases 9

Industry applications of Blockchain-Blockchain in Government-Government use cases-Preventing Cybercrime through block chain-Block Chain in defense, Financial Services Related Use Cases, Revolutionization of Global Trade, Healthcare Related Services, Blockchain and IOT, Blockchain and AI.

TOTAL : -- 45 hours

Text Books:

- T1: Mastering Blockchain: Deeper insights into decentralization, cryptography, Bitcoin, and popular Blockchain frameworks by Imran Bashir, Packt Publishing (2017).
T2: Mastering Bitcoin: Unlocking Digital Cryptocurrencies, by Andreas Antonopoulos O'Reilly, First Edition, 2014

Reference Books:

- R1: Kirankalyan Kulkarni, Essentials of Bitcoin and Blockchain, Packt Publishing.
 R2: Tiana Laurence, Blockchain for Dummies, 2nd Edition 2019, John Wiley & Sons.
 R3: Blockchain: Blueprint for a New Economy by Melanie Swan, Shroff Publisher O'Reilly Publisher Media; 1st edition (2015).

2. <https://nptel.ac.in/courses/106105184/>
3. https://swayam.gov.in/nd1_noc20_cs01/preview

COURSE OUTCOMES

CO1:	Explain the basic notion of distributed systems & block chain technology stack	K2
CO2:	Analyze bitcoin and ethereum blockchain	K4
CO3:	Illustrate the essential tiers of a blockchain technology	K2
CO4:	Estimate the types of consensus algorithms	K5
CO5:	Apply Blockchain in future use cases for security	K3

MAPPING OF COURSE OUTCOMES TO PROGRAM OUTCOMES

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

IT	Foundation Course in Cloud Computing	3	0	0	3
----	--------------------------------------	---	---	---	---

Module Title : Foundation Course in Cloud Computing
Programme : BTech (IT) in Cloud & Mobile Based Application Development in association with IBM
Term : 3rd year 6th Semester
Credits :

Time required in terms of Student Learning: -

Learning	Hours
Contact Classes	16
Guided study	16
Total	32

Aim & Objectives:

Teaching and Learning Approach:

The course will focus on using a teacher-student interactive and decision-oriented learning exercises.

For the active learning mode in the course to be effective, participating in class discussions is extremely important along with self paced learning to clear the concepts of software.

In addition to the lectures, discussions and demonstrations, students would be required to work on sample applications and exercises

Guided Study:

Guided study will include Online learning from IBM Career Education @ Campus Portal, text readings, articles on contemporary issues in organization, assignments, case analysis and powerpoint presentations.

Assessment:

Assessment of the student will be based on mid-term and end term examination and continuous assessment subject to class participation, assignments and presentations.

Indicative Contents:

Topic	Coverage	No. of Lectures
Unit 1	Overview of Cloud Computing, Concepts, Cloud service delivery models, Cloud deployment scenarios	2
Unit 2	Security in cloud computing, IBM cloud computing architecture, Introduction to Service Management	2
Unit 3	Virtualization, Cloud Management Platform, ITIL based Service Management and Service Orchestration -Cloud Computing and Service Management, Customer Project Experiences & How to implement Cloud services	6

Unit 4	Considerations for Building Cloud services, Cloud Performance Considerations, Cloud Resiliency, Cloud Service Metering, Accounting and Billing, Aspects of Hybrid Clouds, Disruptive Network Trends	6

Essentials of Cloud Computing

OIT01	Enterprise Mobile Application Development using IBM Worklight	3	0	0	3
--------------	---	---	---	---	---

Course Objective:

- To learn the basics of IBM Worklight studio
- To develop, deploy and publish applications for mobile platforms using IBM Worklight mobile development platform

UNIT I INTRODUCTION TO IBM WORKLIGHT 9

Mobile overview, Introduction to IBM Worklight, Overview of Worklight Studio, Developing and testing the user interface.

UNIT II IBM WORKLIGHT CLIENT-SIDE DEVELOPMENT 9

IBM Worklight client-side development: Core APIs, IBM Worklight client-side development: Local storage APIs, Working with UI frameworks.

UNIT III WORKLIGHT APIS 9

Worklight integration adapters, Native page and web page integration, Using Worklight native API

UNIT IV SECURITY IN MOBILE APPLICATION DEVELOPMENT 9

Security, Location services, Push notification.

UNIT V APPLICATION TO DEVELOPMENT 9

Migrating an application from development to production, Team development, IBM Worklight Application Center.

TOTAL: 45h

TEXT BOOK:

1. IBM Career Education IBM CE - Enterprise Mobile Application Development Using IBM , IBM Student Course Material.

Course Outcome:

At the end of this course, the Student will be able to

Course Outcome	Description	Knowledge Level
CO1	Understand the fundamentals of IBM Worklight studio	K3
CO2	Develop and test the user interface	K4
CO3	Acquire knowledge on IBM Worklight client-side development and API	K3
CO4	Understand the issues and handle security in mobile application development	K6
CO5	Develop and publish applications for mobile platforms	K6

Topic	Coverage	No. of Lectures
-------	----------	-----------------

<p>Unit 1</p>	<p>Internet of Things - An introduction</p> <p>The idea of collaborative devices working together to achieve a larger goal is not new. Beginning from the simple operational definition, the session will outline the historical perspective right from pre-internet era, specific machine-to-machine communication, radio frequency identification (RFID), context aware computing to wearables. It will conclude with the modern day high-level architecture of Internet of Things (IOT)</p> <p>Sensors & Actuators</p> <p>With a recap of contextually essential Electronics, Signals, and Control Systems concepts various popular sensors and actuators such as motion/temperature/light sensors and relays/stepper motors will be introduced.</p> <p>Processing Elements</p> <p>In the backdrop of microcontrollers, rapid prototyping boards like Raspberry Pi, Arduino, and Edison will be introduced with a special focus on Raspberry Pi - the platform around which most of the course labs will be centered</p>	<p>8</p>
<p>Unit 2</p>	<p>On Trek with JavaScript</p> <p>A refresher for those who are already familiar with JS and testing waters on how much familiar! A peep into the world of JavaScript for those who have never travelled this lane. As this module lays the foundation for the coding complexities ahead.</p> <p>Node.js</p> <p>Node.js environment will be introduced covering its installation on a Raspberry Pi and some experiments tounderstand possibilities & power.</p>	<p>8</p>
<p>Unit 3</p>	<p>Protocols</p> <p>The concepts of communication protocol between various IOTcomponents – MQ Telemetry Transport will be explained</p> <p>Node-RED</p> <p>Node-RED will be introduced covering how to wire various devices and APIs together with simple and meaningful examples</p>	<p>8</p>
<p>Unit 4</p>	<p>IoT in Action</p> <p>At this stage IBM Bluemix will be introduced outlining its capabilities and exceptional ease of use to create compelling IOT applications. This will be done via a few carefully devised</p>	

	<p>“starter” recipes to understand the process. At the end of this, student will be able to create simple IOT Apps using IBM Bluemix</p> <p>IoT - What’s Brewing</p> <p>Here real life examples, case studies will be discussed with the perspective of “how Bluemix empowers the developers and the end users to quickly leveraging IOT in real life”. The IOT landscape will be summarized and glimpses of IBM’s Vision of IOT future road map will be shared to conclude the course.</p>	<p>8</p>
